FAST Birds of a Feather
May 2022 FAST Transition Update
Presenters

Alex Kontur
Public Health Analyst, Office of the National Coordinator (ONC), FAST Lead

Linda Michaelson
Director, Healthcare Interoperability Standards Optum
Professional Associations, such as HL7, which bring together competing entities are subject to strict scrutiny under applicable antitrust laws.

HL7 recognizes that the antitrust laws were enacted to promote fairness in competition and, as such, supports laws against monopoly and restraints of trade and their enforcement.

Each individual participating in HL7 meetings and conferences, regardless of venue, is responsible for knowing the contents of and adhering to the HL7 Antitrust Policy as stated in §05.01 of the Governance and Operations Manual (GOM).
What is FAST?

The FHIR at Scale Taskforce (FAST) is a representative community of motivated healthcare industry stakeholders and health information technology experts who have identified HL7® Fast Healthcare Interoperability Resources (FHIR®) scalability gaps and are actively working on solutions to address current barriers to enable scalable data exchange using FHIR APIs.

Oct 2017 – Payer + Provider (P2) FHIR Taskforce Established

Originally focused on Payer/Provider collaboration

ONC FHIR at Scale Taskforce (FAST)

Purpose: Identify ecosystem barriers, propose solutions, and develop standards to implement solutions

2017

Analysis, Barrier identification, Solution Concepts, Gather Industry Feedback

2018

2019

2020

Implementation Guide Dev Begins

Transition to FHIR Accelerator

2021

Continued collaborative work to develop FAST solutions (IGs) under the HL7 FHIR Accelerator Program

2022 and the Future

HL7 FAST Accelerator

Purpose: Establish a durable community for addressing ecosystem-wide barriers to using FHIR to enable interoperability at scale

All content is available on the FAST Project Page.
What is the Problem?

**TODAY - Exchange**

Exchange characterized by point-to-point interfaces

Adoption trajectory is slow, expensive, and fragmented

**FUTURE - Interoperability**

A consistent infrastructure approach to API implementation

Consensus on implementation guides for key enablers, such as directory, security, patient matching, exchange and testing

**DESIRED RESULT:**

A national interoperability approach that enables consistent data exchange via API. We have this for administrative transactions (X12, clearinghouses, WEDI) and pharmacy transactions (NCPDP, Surescripts). We do not have this for HL7-FHIR.
FAST as FHIR Accelerator

HL7® FHIR® ACCELERATOR / COMMUNITY

- Payers/Provider
- DA VINCI
- Social Determinants of Health
- gravity project
- Cancer Care and Research
- CodeX
- Consumers
- carin
- Clinical Research
- VULCAN

ARCHITECTURE

- Sandbox, Testing, Feedback
- TBD
- HL7 Working Groups
- Pilots & Certification
- TBD

STAKEHOLDERS

- Non-Accelerator/Use Case Specific Initiatives
- Other FHIR Initiatives
- Others - Future

SDOs

- IHE

Networks/ HIEs

- The sequoia project
- carequality
- commonwell
- And More...

OTHERS

- Other FHIR Initiatives

Standards

- FAST

HL7 Governance Structure

- Government Participation/Contributions (ONC, CMS, CDC, VA, DoD, etc.)
FAST is an HL7 Accelerator!
Member Recruitment is Underway
FAST Founding Members

- AEGIS
- Amazon
- Anthem
- Avaneer
- Blue Cross Blue Shield Association (BCBSA)
- Centers for Medicare & Medicaid Services (CMS)
- Evernorth/ Cigna
- Google
- Health Care Service Corporation (HCSC)
- Health Level Seven (HL7)

- Humana
- Kaiser Permanente
- LexisNexis
- Optum
- Providence
- Smile CDR
- Surescripts
- The Office of the National Coordinator for Health Information Technology (ONC)
- University of California Health
- Veterans Administration (VA)
Proposed Governance Structure

Executive Committee: SC Chairs + PMO

STEERING COMMITTEE
- Payers
- Providers
- Tech/ HIT Vendors
- Govt. Agencies
- HL7

OPERATING COMMITTEE
- Use Case 1 Project Lead
- Use Case 2 Project Lead
- Use Case n+ Project Lead

Program Management Office (PMO)

Advisory Committee TBD
Membership Value

Drive cost-effective interoperability to achieve the triple aim (cost, quality, outcomes)

- **Lead Strategy & Decision-Making**
  - Prioritize projects and use cases
  - Drive what becomes the standard and how they are implemented

- **Provide Industry Thought Leadership**
  - Position yourself and your organization as an industry thought leader

- **Gain Efficiencies**
  - Save money by minimizing the need across industry stakeholders to repeatedly address common implementation barriers encountered in most projects
  - Scalable FHIR solutions leads to more ubiquitous FHIR adoption to support real-time, secure data exchange between the right stakeholders at the right time

Learn more about FAST Membership by emailing FAST@hl7.org
FAST Solutions Status
Example FHIR Transaction Journey

1. **REQUESTING SYSTEM**
   - **1.** Formulates FHIR Request
   - **2.** Looks Up the FHIR Endpoint for Recipient
   - **3.** Receives Transaction, Validates Requestor, Validates Version
   - **4.** Performs Patient Matching and Sends Back Not Found If Unable To Do So
   - **5a.** Authenticates FHIR User’s Role
   - **5b.** Filters Out Data That Does Not Have Consent
   - **6.** Generates & Returns FHIR Response

2. **RECEIVING SYSTEM**
   - **1.** Transaction Information (eg, Header) Appropriately Configured
   - **2.** Receipt of Transaction, Validates Requestor, Validates Version
   - **3.** Performs Patient Matching and Sends Back Not Found If Unable To Do So
   - **4.** Authenticates FHIR User’s Role
   - **5a.** Filters Out Data That Does Not Have Consent
   - **5b.** Generates & Returns FHIR Response

3. **DIRECTORY**
   - Requests System Receives Data

4. **EXCHANGE**
   - Exchanges Data

5. **IDENTITY**
   - Identifies Users

6. **VERSIONING**
   - Validates Version

---

**PCP needs information from Payer**

**Payer receives PCP request**

---

**Patient visits Primary Care Physician (PCP)**

**PCP views patient information**

---

**Example FHIR Transaction Journey**

- **PCP** needs information from the **Payer**.
- The **Payer** receives the PCP request.
- The **PCP** views patient information.
FAST Solutions in Development

- Directory, Version & Scale
- Identity
- Exchange Process
- Testing & Certification
- Security

A US Wide Solution for a National Healthcare Directory
- HL7 Implementation Guides (Targeting Sept 2022 Ballot Cycle):
  (1) National Directory – Exchange
  (2) National Directory – Endpoint Query
  (3) National Directory – Attestation & Validation

A US Wide Methodology for Supporting Multiple Production Versions of FHIR

US Wide Scaling Requirements for FHIR RESTful Exchange Intermediaries

National Standards Based Approaches for Individual Identity Management
- HL7 Implementation Guide: Interoperable Digital Identity and Patient Matching (May 2022 Ballot Reconciliation)

An HL7 FHIR Standard Based Solution for Exchange with or without Intermediaries
- HL7 Implementation Guide: Hybrid/Intermediary Exchange (Jan 2022 Ballot Reconciliation)

FHIR Testing & Certification Platform

US Wide Model(s) for Scalable Security Solutions
- HL7 Implementation Guide: Scalable Registration, Authentication, and Authorization (Sept 2021 Ballot Reconciliation)
Conceptual Integrated Architecture

Security (Authenticate/Authorize)
- UDAP Trusted Dynamic Client Registration
- UDAP Tiered OAuth User Authentication
- UDAP JWT-Based Client Authentication
- UDAP JWT-Based Authorization Assertions

Exchange Routing
- RESTful Headers – FHIR Meta Tags

Intermediaries

Identity
- Collaborative/Mediated Patient Matching – Collaborative/Mediated Identity Management

National Directory
- Endpoints – Profiles – Versioning – Trust - Conformance

CONFORMANCE & CERTIFICATION (Testing & Certification Program)

PILOTS (FAST Capability Vetting with Existing HL7 Accelerators)

LM
FAST Security for Scalable Registration, Authentication, and Authorization
Overview and Status – Security for Scalable Registration, Authentication, and Authorization

**BARRIER**
Lack of scalable authorization and authentication for FHIR-based information exchange. Current application registration processes are manual and time-consuming.

**SOLUTION**
Establish common security processes that facilitate automated exchange and reuse existing infrastructure where possible.

**IN SCOPE**
- Trusted Dynamic Client Registration using Unified Data Access Profiles (UDAP)
  - JWT-Based Client Authentication & Authorization

**OUT OF SCOPE**
- Directory for Endpoint Discovery, Trust Policy Governance, Requirements for a specific architecture, Patient/provider or provider/patient

**STATUS**
HL7 Sept 2021 STU Ballot Publication Pending

**OPEN ITEMS**
- Apply ballot reconciliation changes to the IG
- Continue testing at Connectathons

**CURRENT SOLUTION**
- Security for Scalable Registration, Authentication, and Authorization (CI Build)
UDAP JWT-Based Client Authentication:
Uses asymmetric cryptography to authenticate client apps

UDAP Server Metadata:
Endpoint validation for added confidence

UDAP Trusted Dynamic Client Registration:
Identify and dynamically register trusted client applications, streamlining app management

UDAP JWT-Based Authorization Assertions:
Extensible JWT-based client authorization grants & other claims incidental to a token request

UDAP Certifications & Endorsements:
Trusted informational assertion

UDAP Tiered OAuth:
Reusable identities via scalable, dynamic, cross organizational use

Trademark Notice: UDAP and the ecosystem gears design are trademarks of UDAP.org and are used with the permission of UDAP.org.
FAST Interoperable Digital Identity & Patient Matching
Overview and Status – Interoperable Digital Identity & Patient Matching

**BARRIER**
Deployment of disparate patient matching and identity management processes.

**SOLUTION**
Establish a set of patient matching and identity management patterns and best practices that the industry can adopt to reduce variability.

**IN SCOPE**
Patient matching during payer/provider interactions: Mediated Patient Matching
Patient-directed workflows focusing on identity management: Networked Identity Management

**OUT OF SCOPE**
Patient as a requester or responder, contractual arrangements. (Security and directory considerations are addressed by other FAST solutions)

**STATUS**
May 2022 STU Ballot Reconciliation

**OPEN ITEMS**
Ballot reconciliation
Continue testing at Connectathons

**CURRENT SOLUTION**
Interoperable Digital Identity and Patient Matching Implementation Guide (CI Build)
We prioritized patient directed and payer/provider interactions focus areas.

- **Mediated Patient Matching**: Best practices compliant matching service using demographic data from Requestor.
- **Networked Identity Management**: Trusted Identity Providers as source of demographic data and metadata for matching.
- **Includes Patient directed workflows Focus on identity management**: Trustworthy Identity Providers as source of demographic data and metadata for matching.

### HL7 Milestone (May 2022 Ballot Cycle) Due Date
- **Project Proposal**: ✓
- **Project Scope Statement (PSS)**: ✓
- **FHIR IG Proposal**: ✓
- **Notice of Intent to Ballot (NIB)**: ✓
- **Ballot Voting Ends**: ✓
- **Ballot reconciliation**: Q3/Q4 2022
FAST National Healthcare Directory
Overview and Status - National Directory

**BARRIER**
Lack of common methods to find FHIR endpoints and their associated capabilities and attributes. Lack of common processes for maintaining provider information and verifying its accuracy.

**SOLUTION**
One national source for verified directory information that is available to any national or local directory workflow environment.

**IN SCOPE**
Individual and entity demographics to determine endpoint relationships, computable endpoint information such as accessibility requirements, metadata for routing, trust framework, implementation guides and certification status.
Federated access by HIEs, state directories, EHRs
A FHIR standard implementation guide for use of the directory.

**OUT OF SCOPE**
Manual / portal access, creation of a trust framework, non-FHIR related endpoints, application certification process.

**STATUS**
Targeting Sept 2022 Ballot Cycle
Incorporating feedback from industry stakeholders.

**OPEN ITEMS**
IG Content development
Continue to test solutions during Connectathons.

**CURRENT SOLUTION**
1. National Directory – Exchange IG (Cl Build)
2. National Directory – Query IG (Cl Build)
3. National Directory – Attestation & Verification IG (Cl Build)
**FAST Endpoint Directory – Architecture and Workflow**

**Attestation/Verification Implementation Guide**

1. Healthcare Organizations and Providers contribute attested information
2. Providers and organizations declare relationships
3. Request validation of attested information
4. Respond to validation request
5. Issuing Organizations and Assigned Parties contribute attested Endpoint information
6. May include validation information
7. Attested Endpoint information is validated against primary sources
8. Verification and Testing and Certification

**Authenticate/Authorize**

9. On update push information to Subscriber
10. Directory responds with requested information
11. Distributed access/workflow Directory subscribes to specific scope of Organizations and Providers

**Query Implementation Guide**

12. Application requests directory information
13. Synchronize

**End User Application**

14. Directory responds with requested information
15. Application requests directory information

**Connectathon Track Page:**

**2022-05 FAST Security & Identity**

- National Directory Endpoint Query
- National Directory Attestation and Validation

**HL7 Ballot**

Sept 2022
FAST Hybrid/Intermediary Exchange
Overview and Status – Hybrid/Intermediary Exchange

**BARRIER**
FHIR information exchange is typically performed “point-to-point” between trusted system endpoints. Lack of a solution for conveying routing metadata when using an intermediary.

**SOLUTION**
Employ standard methods to convey routing information between exchange intermediaries.

**IN SCOPE**
Exchange using intermediaries in addition to point-to-point connections
Methods for exchanging routing information among participating intermediaries

**OUT OF SCOPE**
Value set defining exchange identifiers
Capturing provenance information from exchange through multiple intermediary “hops”

**STATUS**
HL7 Jan 2022 STU Ballot
In Ballot Reconciliation

**OPEN ITEMS**
Ballot Reconciliation
STU2 update

**CURRENT SOLUTION**
Hybrid/Intermediary Exchange Implementation Guide (CI Build)
Supporting a Hybrid Exchange Model

- **POPULATION HEALTH**
- **PROVIDER EMR/EHR**
- **CLEARINGHOUSE/INTERMEDIARY**
- **PAYER**
