From Specs to Test Reports – "Basic" Strategy

**SDPi 1.0 Specification**
- Word Styles / Bookmarks / Links
- "Simple" Word Docx
- Used to create DB schema

**SDPi RI+MC+RR Database**
- "Single Source of Truth"
- Driven by Use Cases, Standards Conformance, SES & Tech Requirements
- Links from test plans / scripts to RI elements (enabling traceability / coverage)

**Michael's Amazing Word-to-Database Transformation Tool**
- Content integrated manually ... "The Old Fashioned Way"!

**Gazelle Test Management Tool**
- Basic test instance metadata provided to Test Tool ... somehow
- Test Script Info
- Report document "attached" to test instance and reviewed by Monitor

**SDPi 1.0 Test Plans & Scripts**
- Crafted & Maintained Independent of Test Tooling

**Test Case (Instance) Report**
- "RR" Report – Supporting Evidence
- Generated by tool w/ test instance metadata integrated

Legend
- Automated
- Manual / Semi-auto
