<b>Document Description/Changes</b>	
<b>Description of Ballot Document:</b>	From a standards perspective, the project will outline the mechanisms that can be used to capture and exchange common or core data elements related to women's health collected as part of the clinical care delivery eco-system. Specifically, the project will examine how to use FHIR Resources and IG's to facilitate collection and exchange of data elements related to women's health.
<b>Major Changes Since Last Ballot:</b>	No substantive changes.
<b>ANSI-Required Information</b>	
The following information is required by ANSI for all ballots.	
<b>Project Need</b> Briefly explain the reason behind the need for this project. This may be related to legislative requirements, industry need, or similar justifications.	A landscape analysis of women's health related registries have identified the lack of standardization in the capturing and exchange of data elements that can be used for multiple outcome research related use cases. The ability to link and query multiple registries will increase the effectiveness of the registries when used by researchers.
