“Reducing Clinician Burden”
Project Overview

Health Level Seven (HL7)
Electronic Health Record Work Group (EHR WG)
4 October 2018
Reducing Provider Burden - Centers for Medicare & Medicaid Services

We’re committed to limiting the burden caused by Medicare documentation requirements and our medical reviews that help us protect Medicare Trust Funds for future generations.

ONC/CMS Reducing Clinician Burden Meeting | HealthIT.gov

Under the implementation of the 21st Century Cures Act, the Office of the National Coordinator (ONC) in partnership with the Centers for Medicare and Medicaid Services (CMS) are charged with documenting the effects of clinician burden and providing suggestions on how to reduce clinician burden associated with clinical practice and the use of Electronic Health Records (EHRs).

More Proposed Changes from CMS: Reducing Clinician Burden...

Several of the topics included in our clinician burden letter, released June 25, were included in the proposed rule, like what a physician has to do in order to document a visit with a patient; also, how CMS is lowering the number of requirements to relieve clinician burden.

CMS Proposes Historic Changes to Modernize Medicare and...

Today, the Centers for Medicare & Medicaid Services (CMS) proposed historic changes that would increase the amount of time that doctors and other clinicians can spend with their patients by reducing the burden of paperwork that clinicians face when billing Medicare.

CMS Uses Data to Reduce Clinician Burden | HomeCare...

WASHINGTON, D.C. (January 17, 2017)—Data is the lifeblood of the value-based payment environment. Every time a doctor takes care of a patient, we have an opportunity to use information in ways that help patients get better care.

CMS Physician Engagement and Burden Reduction Initiative...

Clinicians now spend more time on administrative tasks than on patient care. The Centers for Medicare and Medicaid Services (CMS) recently launched the Clinician Experience and Burden Reduction Initiative to better engage with clinicians in the Medicare program.

CMS Proposes Simplifying E/M Documentation Requirements to...

While CMS has touted its proposal as a “historic change[] that would increase the amount of time that doctors and other clinicians can spend with their patients by reducing the burden of paperwork,” it has also slipped in a cut in reimbursement for many E/M visits, especially those coded at...

Medicare Program; Revisions to Payment Policies Under the...

Reducing Clinician Burden; Improving Patient Outcomes and Reducing Burden Through Meaningful Measures; ... Several stakeholders contacted CMS with regard to the use of the kit, sinus surgery, balloon (maxillary, frontal, or sphenoid) (SA106) supply in CPT codes 31295...
## Reducing Clinician Burden

### Definition of Terms

<table>
<thead>
<tr>
<th></th>
<th>Definition</th>
</tr>
</thead>
</table>
| **Reducing (reduce)** | “To bring down, as in extent, amount, or degree; diminish”, and “To gain control of... [to] conquer”, and “To simplify the form of... without changing the value”, also “To restore... to a normal condition or position” – The Free Dictionary  
“To lower in... intensity” – Dictionary.com  
“To narrow down”, also “To bring to a specified state or condition” – Merriam-Webster |
| **Clinician** | “A health professional whose practice is based on direct observation and treatment of a patient” – Mosby’s Medical Dictionary  
“An expert clinical practitioner and teacher” – Miller-Keane Encyclopedia and Dictionary of Medicine, Nursing, and Allied Health  
“A health professional, such as a physician, psychologist, or nurse, who is directly involved in patient care” – American Heritage Medical Dictionary |
| **Burden** | “A source of great worry or stress”, and “[Something that] cause[s] difficulty [or] distress”, also “To load or overload” – The Free Dictionary  
“Something that is carried, [as in a] duty [or] responsibility”, also “Something oppressive or worrisome” – Merriam-Webster Dictionary |
Reducing Clinician Burden

Overview

• Project focuses on clinician burdens including time and data quality burdens associated with:
  • Use/engagement of EHR/HIT systems
  • Capture, exchange and use of health information
• Looking at:
  • Regulatory, operational, administrative, payor mandates
  • EHR/HIT system design, functionality, usability and implementation
  • Data quality and usability
• Citing many reference sources:
  • Trade publications, professional society journals, articles, studies, personal experience
Reference Sources...

**Quantifying the Burden**

- 3 out of 4 physicians believe that EHRs increase practice costs, outweighing any efficiency savings
- 7 out of 10 physicians think that EHRs reduce their productivity
- 4 in 10 primary care physicians (40%) believe there are more challenges with EHRs than benefits
- 7 out of 10 physicians (71%) agree that EHRs greatly contribute to physician burnout
- 6 out of 10 physicians (59%) think EHRs need a complete overhaul
- Only 8% say the primary value of their EHR is clinically related
How physicians use their computers
Percent of time spent per day by EHR task category

- Clerical (documentation, order entry, etc.), 44%
- Medical care (chart review, etc.), 32%
- Inbox management, 24%

Reducing Clinician Burden

Reference Sources + Feedback

• "No other industry... has been under a universal mandate to adopt a new technology before its effects are fully understood, and before the technology has reached a level of usability that is acceptable to its core users."

• "Many clinicians know what they want – but haven't been asked... Our biggest mistake lies not in adopting clunky systems but in dismissing the concerns of the people who must use them."

• "The EHR is a major source of physician burnout. Those of us... old enough are losing patience with the medical system and can't wait to get out... Physician burnout leads to medical errors and decreased patient satisfaction."
Reducing Clinician Burden

Reference Sources + Feedback

- "Many physicians report that using poorly designed EHRs... requires more time documenting patient encounters... [and] compels the collection of time-consuming information of questionable value."

- "Clinician is... required to document granularly enough to support an ICD-10 code, enter hundreds of items of structured data to comply with multiple quality and value programs, and avoid committing malpractice. The connection with the patient is easily lost."

- "One primary burden of [EHR/HIT systems and 'interoperability solutions'] at present is simply that, in many scenarios, their representations aren't trusted. Any 'resource' that can't be trusted is necessarily a burden."
Reducing Clinician Burden

Categories

- Administrative tasks
- Data entry requirements
- Scribes, data entry proxies
- Clinical documentation quality and usability
- Prior authorization, verification, eligibility tasks
- Provider/patient
  - Face to Face Interaction
  - Communication
- Care coordination, team-based care
- Clinical work flow
- Disease management, care and treatment plans
- Clinical decision support, medical logic, artificial intelligence
- Alerts, reminders, notifications, inbox management
- Information overload
- Transitions of care
- Health information exchange, claimed “interoperability”
- Medical/personal device integration
- Orders for equipment and supplies
- Support for payment, claims and reimbursement
- Support for cost review
- Support for measures: administrative, operations, quality, performance
- Support for public and population health
- Legal aspects
- User training, proficiency
- Common function/information models
- Software development priorities
  - End-User Feedback
- Product transparency
- Product modularity
- Lock-in, data liquidity, switching costs
- Financial burden
- Security
- State of data content quality
Analysis Worksheet

Tabs

• Burdens
• Time Burdens
• Data Quality Burdens
• Terms: Reducing, Clinician, Burden
• Reference Sources
• Contacts: Co-Leads
• Acknowledgements: Reviewers + Contributors
Analysis Worksheet

Columns

B) Clinical Burdens – Raw Input
C) Recommendations – Raw Input
D) Reference Sources
E) Targeted Recommendation(s) - based on identified burden topic
F) Who Might Best Address Burden(s)
G) Current Proposals and Successful Solutions
## Reducing Clinician Burden

### Targeted Recommendations

With Engaged Clinicians
Reducing Clinician Burden

Project Plan

• Now
  • Continue environmental scan
  • Continue to compile burden topics

• Next
  • Establish small teams to address burden topics/categories
  • Refine, develop targeted recommendations to reduce burdens
  • Identify:
    • What is the Burden Targeted?
    • Who might Best Address Burden?
    • Burdens already tackled: with proposals or with successful solutions

• Then
  • Publish and work to implement recommendations
Reducing Clinician Burden

Project Team Schedule

• Face-to-face meeting at HL7 Baltimore (EHR WG)
  • Thursday Q2, 4 October, 11AM to 12:30PM ET (US)
• Bimonthly teleconferences, Monday at 3PM ET (US)
  • 15 October, 5 and 19 November, 3 and 17 December, 7 January
  • GoToMeeting Link:
    • https://global.gotomeeting.com/meeting/join/798931918
    • Password: "HL7" or “hl7”
• Small teams may meet independently: TBA
