This meeting is being recorded. In all discussions, members should be aware that meetings are recorded and include representatives of companies that may compete with one another in the marketplace. This working group is a public forum and therefore all information shared will be publicly available.

Meeting Notes

1) Subgroup Integration (Hibah Qudsi, MITRE)

- To better integrate the two subgroups, WG leadership proposes the following
 - Rescheduling the Cognitive Status call to 1 PM on Wednesdays so the two meetings can occur back-to-back – please let me know if either of you have conflicts at this time
 - Consolidating the after-call follow up emails and notes emails to the subgroups (i.e. sending one email to all members across both subgroups, instead of emailing each subgroup individually)
 - Dedicating time on the monthly meeting agenda for integration discussions between both subgroups

2) Continued Use Case Discussion (Steve Buslovich, Patient Pattern)

- The group discussed what level of detail to include in the transfer summary
 - Options include:
 1. Cognitive Assessment score
 2. Specific responses
 3. Questions and responses
 4. Assessment Score, Questions, Responses, a time stamp, and the clinician who performed the assessment
 - BIMS & CAM questions have been made as brief as possible for the MDS assessment, so abbreviating the question further may cause confusion
 - PAC-PAC MDS assessments capture the time stamp and clinician

PACIO

who performed the assessment

1. If the transfer document is between PAC settings, then a time stamp isn't required because the assessments (i.e. MDS) are already timed.
 - Acute-PAC wouldn't necessarily include time stamp and performing clinician as these assessments are completed differently
- The WG should think more universally about transfer documents (i.e. "care setting A" to "care setting B", rather than acute to PAC).
