## Summary

### 1) Advance Directive Use Case (Maria Moen, AD Vault, Inc.)

- Maria provided an Advance Directive (AD) Use Case update:
  - Maria presented two use cases to the PACIO Weekly workgroup on November 11<sup>th</sup>, and she is revising the use cases based on workgroup feedback.
  - Maria is preparing a third AD use case which she will present during an upcoming PACIO Weekly workgroup meeting.
  - If you are interested in providing thought leadership or guidance for the AD use cases, please contact Maria Moen ([mmoen@advaultinc.com](mailto:mmoen@advaultinc.com)) or Siama Rizvi ([rizvi@mitre.org](mailto:rizvi@mitre.org)).
- Lisa Nelson will lead a discussion on HL7's Clinical Document Architecture (CDA) and Consolidated Clinical Document Architecture (C-CDA) standards, and how they intersect with FHIR during the November 18<sup>th</sup> PACIO Weekly workgroup meeting.

### 2) Leadership Update (Dave H., Siama R., MITRE)

- PACIO Leadership provided a Functional Status and Cognitive Status IG balloting update. The comment period ends on November 20<sup>th</sup> and ballot reconciliation will begin next week. PACIO Leadership expects an increase in the number of votes at the end of the balloting period and will provide further updates on the types of comments received and revisions to the IGs during the December PACIO Monthly workgroup meeting. The vote tally for each IG as of the morning of November 18<sup>th</sup> is as follows:
  - Functional Status IG
    1. 6 Affirmative Votes
    2. 9 Negative Votes

# PACIO

3. 13 Abstentions
  - Cognitive Status IG
    1. 12 Affirmative Votes
    2. 2 Negative Votes
    3. 13 Abstentions
- A workgroup member requested an update on whether PACIO will pursue development of a Frailty Use Case. PACIO Leadership confirmed the weekly workgroup voted to begin work on the ADI and Speech-Language-Pathology use cases based on the availability of members who have resources and interest in leading these use cases. However, if members of this meeting are interested in leading work for alternative use cases, including frailty, contact Dave Hill ([dwhill@mitre.org](mailto:dwhill@mitre.org)) or Siama Rizvi ([rizvi@mitre.org](mailto:rizvi@mitre.org)).
- The next HL7 Connectathon is scheduled for January 13-15, 2021.
  - The PACIO workgroup collaborated with the HL7 Clinical Reasoning Track workgroup to integrate CMS quality measures into the use case for the May 2020 and September 2020 Connectathons. For the January Connectathon, the PACIO group will continue to streamline the measure data exchange process as well as further develop this use case by replacing the pseudo-EHR for HHA with a real EHR and potentially an HIE organization. The use case also potentially will include some exchange of AD information.
  - In addition, workgroup members suggested two scenarios they would like to incorporate into future use cases, including:
    1. Starting the acute care episode with functional assessment standardized items (FASI).
    2. Tracking post-COVID syndrome as patients are discharged from care.
- Juby George-Vaze agreed to educate the PACIO Weekly workgroup members on the importance of tracking patients with post-COVID syndrome during the December 2<sup>nd</sup> weekly meeting.
- PACIO Leadership also provided an update on the work to resolve the terminology differences in defining “Encounters” and “Episodes of Care” across acute and post-acute care. There is a dedicated group of PACIO members who meet and discuss this issue on Wednesday mornings from 9:00 am – 10:00 am ET. If interested in participating, contact Dave Hill ([dwhill@mitre.org](mailto:dwhill@mitre.org)).

### 3) Next Meeting

- Wednesday, December 16, 2020, 10:00 am – 10:30 am EST

### 4) Adjourn
