- 9/29 meeting with FHIR Management Group (FMG) to request approval for PSS
- 10/5 meeting with US Realm to request approval for PSS

Sept 29 SPLASCH Use Case Update

Date of Discussion: 9/21

Topic: continue drafting patient story

- completed Scene 2.....as we move through the continuum of care, we may identify something we missed.
- We moved into Scene 3

Key Considerations Discussed: Determining the assessments, evaluations, and order of care

Soliciting feedback on these outstanding issues: are there specific types of assessments to incorporate in scene 3

- As we approach the end of Betsy's SNF stay, the group was asked to consider what would be essential in the EHR for a safe transition of care.
