- co-sponsored and approved by the Community-Based Care and Privacy Work Group during their [August 3, 2021 meeting](#) and [August 31, 2021 meeting](#) after minor PSS updates
- PSS entered into Project Insight, Project ID 1371 on Sept 16
- approved by FHIR Management Group during their [September 29 meeting](#)
- approved by USRC by e-vote during their [October 5 meeting](#) and sent to TSC
- TSC requested that project name a vocabulary facilitator

Oct 13 SPLASCH Use Case Update

Date of SPLASCH Discussion: 10/5

Topic: continue drafting patient story; HL7 progress

- Continued discussions of scene 3
- Matt Becker (Kno2); Matt Elrod (MaxMD) added as implementers, following recommendations from USRC

Key Considerations Discussed:

- Coding system to be used is LOINC
- ASHA requested LOINC for 5 FCM's 7/26; Matt Becker to follow up to see if process for approval can be moved along; need for engagement
- NOMS is proprietary data, but FCM and LOINC are open access

Pending Use Case Discussions for Next Meeting:

- what specific clinical information needs to be included in the EHR for a safe transition
 - How do we communicate the level of deficit via EHR
 - Do we need other code systems in addition to LOINC
- View [meeting index and mural board](#)
 - **Next Meeting 10/19, 3-4PM EST**
