

Oct 27 SPLASCH Use Case Update

Date of last SPLASCH Discussion: 10/19

Topic: continue drafting patient story; HL7 progress

- **Officially an HL7 project as of 10/18.**
- **Met with PCWG on 10/20.** Discussion led by Matt Elrod, Jamila Harley, and Dave Hill.

Key Considerations Discussed during 10/20 PCWG Meeting:

- Licensing for ICF is one of the biggest barriers
- Clarified that project does not intend to use ICF coding system. Currently, plan to use LOINC. Awaiting approval for LOINC for 5 Functional Communication Measures (FCM's):
 - Cognition
 - Multi-modal communication
 - Spoken Language Expression
 - Spoken Language Comprehension
 - Swallowing

Oct 27 SPLASCH Use Case Update

Pending Use Case Discussions for Next Meeting:

- what specific clinical information needs to be included in the EHR for a safe transition
- What is not yet specified in US Core and USCDI?
- given our limited time, our goal for the Jan 2022 Connectathon should be to demo a small part of Betsy's use case (not all 5 scenes.)
- Brian created a "next steps" visualization [on confluence](#)

- Next SPLASCH Meeting 11/2, 3-4PM EST

- View [meeting index and mural board](#)

Seeking Assistance

- TSC and FMG would like Vocabulary facilitator added to PSS. If interested, please email Brian Meshell at bmeshell@mitre.org
