Da Vinci PDex Plan-net and Drug Formulary

HL7 Connectathon Track Highlights

Corey Spears & Sean Mahoney
January 12, 2021
Track Goals

• Test STU1 update version of the FHIR Implementation Guides (IG) for Plan-Net and STU2 Ballot version of Drug Formulary

• Inform track participants about the new features and data structure in the new FHIR IGs

• Inform track participants about Da Vinci meetings that are relevant to this work and recruit their feedback
Testing

• MITRE Reference Servers & Clients
  – Plan Net & Formulary
• Postman Collection
• Aetna Production Server (Plan-net)
• Active testing participants including:
  – IBM
  – SureScripts
  – Aetna
  – MITRE

Notes

• Lots of questions regarding roadmap and timelines
  – When will new versions be published
  – When will new versions be implemented

• Noted that variances have been found in implementations
  – Scopes, access methods (app registration/auth requirements)
  – Need to explore where further definition is warranted in order to reduce barriers

• Answered many questions about Plan-Net and Formulary and pointed participants to many resources and Da Vinci meetings
### My Health Plan

Now what?

- Continue to reach out to get more implementations using the new IG versions as we prepare for publishing.
- Test new areas identified by the community, such as implementation variation and bulk data.
