September 19, 2022, 3:30-5pm ET
FAST Testing & Versioning Discussions Room: Parlor Suite #9006
1) FHIR Version, Profile Versions, and IG published version - review best-practices, and recommendations from the FAST Accelerator on how IG Authors could provide guidance to implementers to ensure we address “Continuous Interspeanability” across an integrated ecosystem, where multiple organizations may have implemented and be supporting various versions of FHIR exchanges.

2) FHIR Testing - wrapping up our Connectathon 31 and planning for Connectathon 32 (Jan 2023 in Las Vegas) - we will review and recap on what we have learned through testing, and how we can integrate Testing into the future FAST Accelerator and workgroup projects from IG Authoring, IG Publishing, (pre) Connectathon, IG Maturity, and report-out on implementation coverage. Those items will initially be supported through guidance documents, and recommendations to the FAST Accelerators own work-product, and eventually to the many other FHIR Accelerator efforts (occurring at Scale).

3) FHIR Certification, how can we integrate the FHIR Version and FHIR Testing efforts into the current CMS, ONC and other Certification processes to ensure FHIR Client, and FHIR Server and FHIR IG’s are both Testable, and Version aware.

4) FHIR Connectathon, how can we leverage FHIR Testing in order to report out FHIR IG Conformance across the implementation community. What techniques have we developed to align various FHIR Test Testing to ensure we can report FHIR IG Testing Coverage (and any gaps), how can we track gaps in FHIR Testing a related FHIR IG, and report future progress (at future Connectathon). How can we report out the coverage and conformance of any FHIR IG Reference Implementation (RI) - and its published FHIR Capability Statement.

5) FHIR IG Balloting, how can we work as a community to create a set of recommended best-practices as part of the IG Balloting process.

6) Aligning FHIR Testing, and FHIR Version discussion with ONC SVAP, and HL7 Standards and Implementation division objectives.
