

Community-Based Care and Privacy (CBCP) Home

Mission

Community-Based Care and Privacy (CBCP) engages experts and other stakeholders to identify, clarify, and validate (by consensus) information system requirements with an emphasis on privacy protection.

Our objective is to improve the delivery of community based care through better collaboration and coordination with stakeholders. These objectives are informed by privacy and consent where appropriate.

Charter

CBCP Work Products and Contributions currently focus on the areas of

- Behavioral Health in multiple settings
- Privacy and Consent
- Long Term Care (LTC)

Affiliations

The Community Based Care and Privacy Working Group participates in the Clinical Domain Steering Division. We have a joint privacy vocabulary project with the Security Working Group.

CBCP also has strong links with the Electronic Health Records (EHR), Clinical Interoperability Council (CIC) and Services Oriented Architecture (SOA) Work Groups, based on the common goal of interoperability across sectors and disciplines within Health and Human Services.

Leadership

Co-Chairs

 **Johnathan Coleman**
Security Risk Solutions, Inc.
Phone: USA +1 843-442-9104
jc@securityrs.com

 **Suzanne Gonzales-Webb**
Department of Veteran Affairs
Phone: USA +1 727-605-5081
