

SNOMED CT

This is a code system with regularly released editions, an international edition, and national editions. HL7 international realm specifications shall only use the SNOMED CT international release. Realm specific specifications shall use either the international or the edition of that Realm. Use of a Realm specification outside that Realm will require specific additional licensing from SNOMED International or the National Release Centre/s of that Realm.

Full title: SNOMED Clinical Terms

Owner: SNOMED International

Scope of content (semantic space) all content relevant to healthcare

Technical Identifiers: note: this terminology requires identification of the code system and the version of the code system being used. The identifiers shown here are for the code system (and do not indicate the version)
