## Create Decision from template

Minutes Approved as Presented

This is to approve minutes via general consent. "You have received the minutes. Are there any corrections to the minutes? (pause) Hearing none, if there are no objections, the minutes are approved as printed."

## Agenda Topics

| Agenda Outline | Agenda Item                   | Meeting Minutes from Discussion   | Decision Link(if not child)   |
|----------------|-------------------------------|---|---|
| Management     | Review ANSI Anti-Trust Policy |  <p><b>Antitrust Policy</b></p> <p>ANSI will develop and release a standard with a focus on interoperability, national accreditation standards, and interoperability with other health and care systems. All members participating in the process, on the basis of the proposed and non-proposed ANSIs, the standard, being developed, will be required to contribute to the standards and comply with assessment requirements.</p> <p>ANSI will also develop a standard that will not be a health care standard, but a national accreditation standard, and will be required to contribute to the standards and comply with assessment requirements. The standard will be developed and released by ANSI, and will be required to contribute to the standards and comply with assessment requirements.</p> <p>ANSI will also develop a standard that will not be a health care standard, but a national accreditation standard, and will be required to contribute to the standards and comply with assessment requirements.</p> <p>Approved by the ANSI Board of Directors<br/>May 22, 2014</p> |   |
|                | Project Naming                | Feedback for HL7 Work Groups is that eHRx and ePDx should be renamed too HRex and PDex.   |   |
|                | Resource naming               | It is proposed that resources in the PDex implementation guide be identified with the HRex suffix   |   |
|                | Coverage Resource             | <p>Coverage does not exist in Argonaut or US Core. A coverage profile has been defined in the Da Vinci DeQM Project.</p> <p>HRex / PDex will create an additional Coverage profile. The HRex-Coverage profile will be based off HL7 FHIR R4.</p> <p>An evaluation of the DeQM coverage resource determined that it was unsuited to HRex / PDex use cases because contained resources such as Patient are based off the QICore profiles and not US Core profiles.</p> <p>The HRex-Coverage profile will reference US Core profiles, where they are available.</p>  |   |
|                | Payer Initiated Exchange?     | <p>Is there a need for a Payer Initiated Interaction.</p> <ol style="list-style-type: none"> <li>1. Verify situations where interactions occur</li> <li>2. When Does a provider push to a payer</li> <li>3. When does a payer need to push to a provider</li> <li>4. What's the payload (bundle or specific)</li> </ol>   | <p>Yes - there is a need</p> <p>Need to discuss content/payload. e.g. Alert, Gaps in Care, PCP change.</p> <p>What RESTful approaches can be used in addition to IHE /Direct.</p> <p>Can we leverage MU Payer-to-Payer transmission and change source to Payer to submit asynchronous payload for mediation by the receiving provider.</p> <p>Receive, Display and Incorporate Data (was Transitions of Care)</p> |

|             |             |   |  |
|-------------|-------------|---|--|
|             | Homework    | Review and provide feedback on UseCase Materials <a href="#">ePDX-Payer2ProviderUseCase.pptx</a> and <a href="#">ePDXUseCaseFunctionalMap.xlsx</a><br><br>Rough Draft of IG in Word Docx format. Incomplete - focus is on Narrative: <a href="#">Da Vinci PDex Implementation Guide-7.docx</a> (Download, Put Track Changes on, send edits back to <a href="mailto:mark.scrimshire@newwave.io">mark.scrimshire@newwave.io</a> ) |  |
