

How to Create a Publication Request from Template

 Navigate to a page in the Confluence space (check the breadcrumb path above) where you'd like to create your new Publication Request before you follow the steps below.

Step-by-step guide

1. Select the ellipsis at the top next to "Create". (If you only see two options for templates show up, select "Show More" to reveal all templates.)

2. Select "HL7 Publication Request"

3. Enter the Project name or the Balloted Name as the "Page title".

Page title

1. Enter a title in the Page Title field above

2. Click the 'Publish' button in the lower right corner of the page; the Publication Request form will appear

4. Select "Publish" at the bottom right.

Test Project

To Create a New Project Scope Statement, do the following:

1. Enter your Project Name in the Page Title field above

2. Click the 'Publish' button in the lower right corner of the page; the PSS form will appear

Changes saved  

5. A page with your publication request name as title will appear. The form present on this page is what you will fill out.
