Agenda Topics

Agenda Outline	Agenda Item	Meeting Minutes from Discussion	Decision Link(if not child)
Management	Review ANSI Anti-Trust Policy	 <p>Antitrust Policy</p> <p>ANSI's purpose is to develop, coordinate and disseminate standards that are open, interoperable, and non-discriminatory. ANSI's standards are developed through a consensus-based process that involves all interested parties. ANSI's standards are developed through a consensus-based process that involves all interested parties. ANSI's standards are developed through a consensus-based process that involves all interested parties.</p> <p>Approved by the ANSI Board of Directors May 22, 2014</p>	
	Project Naming	Feedback for HL7 Work Groups is that eHRx and ePDx should be renamed too HRex and PDex.	
	Resource naming	It is proposed that resources in the PDex implementation guide be identified with the HRex suffix	
	Coverage Resource	<p>Coverage does not exist in Argonaut or US Core. A coverage profile has been defined in the Da Vinci DeQM Project. HRex / PDex will create an additional Coverage profile. The HRex-Coverage profile will be based off HL7 FHIR R4. An evaluation of the DeQM coverage resource determined that it was unsuited to HRex / PDex use cases because contained resources such as Patient are based off the QICore profiles and not US Core profiles.</p> <p>The HRex-Coverage profile will reference US Core profiles, where they are available.</p>	
	Payer Initiated Exchange?	<p>Is there a need for a Payer Initiated Interaction.</p> <ol style="list-style-type: none"> 1. Verify situations where interactions occur 2. When Does a provider push to a payer 3. When does a payer need to push to a provider 4. What's the payload (bundle or specific) 	<p>Yes - there is a need</p> <p>Need to discuss content/payload. e.g. Alert, Gaps in Care, PCP change.</p> <p>What RESTful approaches can be used in addition to IHE /Direct.</p> <p>Can we leverage MU Payer-to-Payer transmission and change source to Payer to submit asynchronous payload for mediation by the receiving provider.</p> <p>Receive, Display and Incorporate Data (was Transitions of Care)</p>

	Homework	Review and provide feedback on UseCase Materials ePDX-Payer2ProviderUseCase.pptx and ePDXUseCaseFunctionalMap.xlsx Rough Draft of IG in Word Docx format. Incomplete - focus is on Narrative: Da Vinci PDex Implementation Guide-7.docx (Download, Put Track Changes on, send edits back to mark.scrimshire@newwave.io)
