	Patient List Measure Report	<ul style="list-style-type: none"> • Providers would want list of patients who don't have any concerns according to the payer, and then details of the ones who do <ul style="list-style-type: none"> • As a provider, I'd want to know who did you evaluate? • If you tell provider who insurer evaluated, provider can say these people are missing from the list - maybe they still have gaps • Interested in receiving attributed list, not just the patients of concern who have gaps • Need all patients, specific measures you're looking at, and last date of compliance <ul style="list-style-type: none"> • Depends what you're trying to accomplish • Sometimes problem is in attribution list • Sometimes problem is who has the latest information <ul style="list-style-type: none"> • Often provider has the information and the payer may not • Patient may get a service without the PCP knowing, and the payer will have that information and provider may not • If doing electronic reconciliation between the 2, the report could be different - but underlying data set on both sides need: attribution list, patient identification, measure, date of last compliance (and what was the compliance) • Provider may wish to know gaps that are going to expire in next 30-60 days, or might be chasing previous numbers - it may depend on where you are in the calendar year • If we are talking about information transfer between provider/payers - database level of information, not a report that gets printed and handed to provider <ul style="list-style-type: none"> • Use of data is one purpose • Use of report is a different purpose • A separate Da Vinci Implementation Guide addresses member attribution list - Risk Based Contract Member Identification <ul style="list-style-type: none"> • GIC IG could reference the RBC Member Identification IG: http://hl7.org/fhir/us/davinci-atr/2020FEB/index.html • Dana Marcelonis will reach out to Member ID team to see if someone is available to present an overview of IG, or if we have a recording of an overview that this group can access • List Resource for Measure List Report • GIC IG - need to finalize whether it's going to be part of the existing DEQM IG
