Minutes Approved as Presented

The detail proposed agenda is:

- Record this call
- Agenda review
- Future meetings: No meeting on Dec 26. We WILL plan to meet on Jan 2.
- Follow up on O&O session today - All
  - Richard scheduled additional time for next week
- Advancement of PSSs
  - Pain - Susan met with the US Realm. Susan addressed their questions and the PSS was approved.
    - Took out the testing section.
    - Richard R. Esmond will reach out to Aegis to come to a CIMI call to update us on testing.
  - Skin and Wound Assessment
    - Still finishing details of value set contents.
    - Susan Matney will investigate where the PSS is in the formal process.
  - Laboratory
    - Nathan Davis and Susan Matney will make examples that show the 4 high level patterns.
- Vital signs questions
  - LOINC code for vital signs panel - Susan, Nathan
    - We need consistency between US Core and LOINC panel definition
    - We need to have a plan for profiling for vital signs for pediatric (arterial cord blood)
    - Convene a group to discuss the O2Sat question. We need to involve Eric Haas, Riki, Brett Marquart, and CIMI, and LOINC in a conversation. Susan Matney will set up a meeting of the interested stake holders.
    - Also head circumference by tape measure
    - A possibility is to use the more generic codes in the LOINC panel and take advantage
  - Vital signs preconditions - Susan, Nathan
    - SNOMED CT associated content: temporal periods, times of day, pre and post, during, phase of life, specific events or states (apnea, pregnancy, pre-puberty, post menopausal, etc.)
    - We will include: pre, post, during, specific states and events as a start
    - For situations where there is a need to reference the details of a specific event we need to add an attribute to allow a reference to the event instance
- Types of collections and how they are represented in FHIR resources - Stan
  - See draft document
  - We will plan to create a "for comment" ballot to get preferences on the representation of different types of "collections."
  - Similar issues exist with use of diagnostic report and composition
- Any other business
