CIMI Weekly Meeting January 9, 2020

Chair: Stan Huff

Scribe: Stan Huff

Attendees

Present	Name	Affiliation
Yes	Richard R. Esmond	PenRad
Yes	Andrea Pitkus	unaffiliated
Yes	Galen Mulrooney	VA
Yes	Stan Huff	Intermountain
Yes	Kurt Allen	Eir Solutions

Minutes Approved as Presented

The detail proposed agenda is:

- Record this call
- Agenda review
- Future meetings: Cancel meetings on January 30, February 6
- VANGUARD PSS approved by TSC - Stan
- Update from today's joint call with O&O - Susan, Nathan, All
  - Body landmarks
    - Recommendation was to make the extension in BodyStructure
    - May need to revisit this decision because there are things that can be modeled as a body structure or as a condition
    - Need to update Observation to be a choice between codeable concept and reference to the body structure resource
  - 40 minutes on next week's agenda to talk about top 2000 lab profiles
- Key aspects of an improved Breast Radiology IG build - Kurt, Richard
  - Suggestions about implementation of clockface positions related to breast
  - We should make a CIMI library of reusable "fragments" that can be used in composing new model content
    - Participation
    - Provenance
- The first draft of Vital Signs IG is available, reviewers welcome - Susan
- Information about the IG proposal process that we need to be aware of - Susan, Nathan
  - People are encouraged to treat this as if it was ballot material and provide detailed comments so that the actual balloted version is better
- HL7 WGM in Sydney
  - Who will be attending? Susan, Stan, Claude, Mark
  - Agenda items for general discussion and socialization
    - "Reusable" profiles
    - Is there an official role for CIMI within HL7 for providing consistency across IGs from different domains
    - Simplify the bureaucracy associated with projects (PSSs, many review groups, long time frames)
    - Define a roadmap for CIMI: What comes next? (Let's do that before Sydney).
      - Look for areas across existing content where we can create consistency
- Decide what examples we need before we discuss body structure - body location - condition discussion
  - Options
    - A BodyStructure as a condition - Claude and Nathan
    - Wound IG reused by Podiatry - Nathan
    - Make a new example using a new BodyStructure Resource
    - Extend BodyStructure or make a new BodyStructure data type
    - Body site code
  - Issues/requirements
    - How can we always know

- Any other business
