DSTU2 Ballot to Final breaking changes

A list of all the changes made to DSTU 2 after DSTU 2 ballot that were labelled 'non-compatible':

- 2865 Clarify the functionality of GET [base][compartment][id]?  
- 3011 CarePlan.activity.note needs further explanation  
- 3249 Provenance.actor should have a more meaningful name  
- 3361 Message endpoints should be associated with the event protocol  
- 3627 Value set - define/concept[0..] needs additional wording  
- 3633 Change .expansion.timestamp datatype to date Time  
- 3855 search param naming is inconsistent  
- 4003 Resource Encounter Content  
- 5165 Jan 2015 Ballot Comment #32  
- 5444 Jan 2015 Ballot Comment #337  
- 5457 Jan 2015 Ballot Comment #396  
- 5561 Composition.type and Composition.class definitions should be improved according to the improvements made to DocumentReference.  
- 5678 List.flag vocabulary  
- 5680 order of common resource elements not consistent  
- 5695 Medication should be required in MedicationStatement  
- 5698 Appointment.order can't work at present  
- 5701 MedicationStatement.wasNotGiven should notbeT in  
- 5760 translate does not support dependsOn  
- 5895 is Order.authority part of 80%?  
- 5940 allow MedicationStatement.quantity to be either a quantity or range  
- 5947 Relationship between child concepts and subsumption needs clarification  
- 5951 Timing doesn't allow an overall duration  
- 5961 Change DiagnosticReport.name to.code  
- 5997 Rename Provenance.agent.reference that  
- 5998 ImagingStudy should use CodeableConcept, not Coding  
- 6029 More precise definitions of some concept map equivalence codes  
- 6040 StructureDefinition/ElementDefinition overlaps  
- 6067 Split Supply into SupplyRequest and SupplyDispense  
- 6079 StructureDefinition needs a target type property  
- 6089 Telecom doesn't allow for alternate systems  
- 6094 change 'subject' search parameter  
- 6104 Tooling should enforce coding capitalization consistency  
- 6118 409 status code  
- 6122 Support non-atomic transactions/batches in RESTful API  
- 6129 Change the Procedure attribute type to code  
- 6130 Change attribute name for Quantity.code, Quantity.units, Quantity.system  
- 6171 Flag.patient should be [0..1]  
- 6215 roll up CarePlan.activity.detail.note into CarePlan.activity.notes  
- 6216 Goal.concern reference list  
- 6242 ImagingStudy.clinicalInformation should choice of string or Condition resource and possible code?  
- 6253 body site should be a datatype - but used consistently throughout the standard.  
- 6269 AuditEvent needs a Participant userId type code to explain how to understand the value in userId (e.g. Patient ID in CX form)  
- 6304 Abstract for Action Who/What/Where/Why across Resources  
- 6309 Allow reference to medication to be either a code or a Medication Resource Reference  
- 6310 Add MedicationStatementStatus for planned future medications  
- 6311 Need better explanation of DataElement Slicing  
- 6331 Clarify whether conditional operations in a transaction include [base]  
- 6336 "Executing an Operation Asynchronously" should be removed  
- 6343 The /Mailbox endpoint is no longer needed, given FHIR's "operations" framework  
- 6637 Add modifier to string parameters to indicate what kind of partial match is required  
- 6793 2015May sdc #10 - Use stringency, not specificity  
- 6868 2015May sdc #85 - Why unassessable?  
- 6913 2015May sdc #136 - How are "append" relationships handled?  
- 6922 2015May sdc #145 - Request that max count be unbounded  
- 6944 2015May core #9 - Make reason 0..*  
- 7018 2015May core #63 - Response: Specifying paging support would be a welcome addition and would further increase interoperability.  
- 7123 2015May core #182 - What's difference between Procedure.category and type?  
- 7127 2015May core #186 - Procedure.relatedItem is too complicated - make it extension  
- 7154 2015May core #213 - Explain reliability  
- 7347 2015May core #537 - Schedule.actor has resource type of "Any"  
- 7366 2015May core #556 - Why not avoid this problem by requiring contained resources to explicitly state their subject? Why allow this degree of optionality?  
- 7404 2015May core #594 - Is narrative the same for documents vs. other mechanisms?  
- 7428 2015May core #716 - Using of Snomed CT  
- 7431 2015May core #719 - AuditEvent source identifier  
- 7454 2015May core #742 - Can only one be declared as primary? Can none?  
- 7457 2015May core #745 - should allow for multiple Coding returned - should at most one marked as primary  
- 7460 2015May core #748 - Allow non-resources to be focus of Provenance  
- 7483 2015May core #778 - consistency of FamilyMemberHistory's condition with the Condition resource  
- 7511 2015May core #802 - Make names consistent between Procedure and Encounter  
- 7515 2015May core #806 - rename MedicationStatement.dosage.schedule to MedicationStatement.dosage.timing  
- 7517 2015May core #808 - Bring back Observation.component  
- 7518 2015May core #809 - Immunization.protocol cardinality  
- 7521 2015May core #812 - ICD-9 system URLs
• 7525 2015May core #816 - MedicationStatement.status definitions
• 7530 2015May core #821 - remove ElementDefinition.binding.name
• 7541 2015May core #832 - Simply conditional create header
• 7543 2015May core #834 - include transitivity
• 7545 2015May core #836 - transaction and base interaction
• 7550 2015May core #841 - AllergyIntolerance negation
• 7581 2015May core #872 - How do we specify an "active" or "resolved" problem?
• 7583 2015May core #874 - We need a status to specify whether the med is "active" vs. "discontinued" meds?
• 7587 2015May core #878 - body site is overly complicated (Observation)
• 7613 2015May core #904 - How is encounter diagnosis handled?
• 7617 2015May core #908 - Is Working vs. Confirmed in the 80%?
• 7621 2015May core #912 - Aren't these all similar items? Shouldn't they all be called target or detail?
• 7622 2015May core #913 - Allow structures in notes, make 0..*
• 7629 2015May core #920 - Suggest renaming to 'bodySite' or 'affectedSite'
• 7631 2015May core #922 - Procedure.device -> targetDevice
• 7633 2015May core #924 - Procedure has evolved since ProcedureRequest was drafted. Suggest re-aligning the two resources to account for changes in one, relevant to the other.
• 7636 2015May core #927 - Should 'applies' be renamed to 'physiologicallyRelevant[x]'? While short names are good, they must also be more descriptive.
• 7639 2015May core #930 - What's difference between has component and has member?
• 7651 2015May core #942 - Need to categorize re-admissions
• 7655 2015May core #946 - Recommend renaming this to referralRequestFulfilled
• 7693 2015May core #984 - Who or what should sign a bundle and how is this used? RBAC? What happens if a transaction is not signed?
• 7702 2015May core #993 - Can signature be captured by blob?
• 7711 2015May core #1072 - Replace Provenance extension
• 7753 2015May core #1074 - The use of the DocumentReference.confidentiality element is not conformant with the HCS requirements on Security Labels. This needs to be fixed.
• 7760 2015May core #1081 - Add dependsOn element as an input Parameter with parts, and product as an output Parameter with parts.
• 7761 2015May core #1082 - Allow ConceptMap/Stranslate to have multiple outcomes
• 7859 2015May core #1179 - Condition.dateAsserted definition clarification
• 7864 2015May core #1184 - Condition.clinicalStatus should not convey both record status (in error) and confirmation Status (working, confirmed, refuted)
• 7867 2015May core #1187 - Add a record status to communicate active, in error, cancelled
• 7894 2015May core #1214 - Rename AllergyIntolerance.event
• 7897 2015May core #1217 - Should immunization be searchable by subject since there is no subject parameter (if yes, should AllergyIntolerance be searchable by subject?)
• 7906 2015May core #1226 - Encounter condition relationship
• 7913 2015May core #1233 - MedicationStatement.status clarification
• 7924 2015May core #1244 - Clarify content-location for Reads without Versioning support
• 7954 2015May core #1274 - Remove _language query parameter support
• 7957 2015May core #1277 - Alternative suggestion for Date Ranges
• 7961 2015May core #1281 - Modify Name of Substance.Type Property
• 8002 2015May core #1326 - Add mode parameters as a value set.
• 8043 2015May core #1368 - Change Resource Contraindication to DetectedIssue
• 8045 2015May core #1370 - Medication Prescription Status Values
• 8105 DocumentReference.format needs to be type Coding
• 8107 Update the definition of "status" for the MedicationStatement
• 8112 Recommend adding 'On-Hold' to MedicationStatement.status
• 8120 Consider Location.status "present"
• 8123 AuditEvent constraints are too tight
• 8142 2015May daf #96 - Modify Content Search Parameters
• 8163 Transaction processing sequence should reflect bundle entry sequence
• 8172 transaction-operation coding system doesn't correspond to transaction-operation value set
• 8184 Add reference to Condition
• 8186 ConceptMap structure doesn't make sense
• 8188 2015May QICore#70 - Change CommunicationRequest.orderedOn to requestedOn
• 8204 URI for Medical Device Codes defined in ISO 11073-10101 is wrong
• 8210 2015MAY QICore#85 Goal.patient cardinality
• 8226 ValueSet.url should be ValueSet.uri
• 8230 Display for filter-operator "=" code is " "
• 8236 terminology system URL syntax
• 8246 Signature.who can have every dataType in fhir-single.xsd
• 8261 ValueSet.compose.include should have codes or filters, but not both
• 8266 ValueSet.defined should be renamed to ValueSet.codeSystem
• 8313 Change terminology for AllergyIntolerance.type
• 8343 j.equivalence definition and valueset definition contradict each other
• 8354 ValueSet.type should be renamed to ValueSet.codeSystem
• 8355 valueOrdinal should be decimal, not integer
• 8363 No place for a displayname in SearchParameter
• 8370 We're ambiguous about allowing relative urls for reference-type search parameters
• 8372 Support multiple discharge diagnoses
• 8379 Observation indirect target is confusing
• 8386 LOINC copyright query should not allow "All" as a value
• 8416 Remove batch operations now that we have a batch interaction
• 8418 Add Period to Group Characteristic
• 8437 Remove Social Security Number from the Identifier type value set and improve definition
• 8440 Change references from Supply to SupplyRequest
• Provide support for a CodeableConcept for answer to question
• OperationOutcome.issue.code is either extendable CodeableConcept or not Code - Prefer extendable
• OperationOutcome.issue.location is unfriendly to JSON based applications only using HTTP Get parameters
• DocumentReference.format belongs inside content
• change DR.requestdetail to DR.request to harmonize with PC resources
• Conformance should have a "kind"
• Rename NamingSystem.type to NamingSystem.kind
• NamingSystem.country and .category should become useContext
• NamingSystem.category should have same binding as Identifier.type
• change name of element serviveCategory to category
• Questionnaire Extension defaultasfixed - clarification
• create and extension for O.refrange to allow for ...or equal to
• Address can't differentiate physical and postal
• Clarify the functionality of GET [base][compartment][id]/?
• Resource Observation - Examples need to show related propert in use for panel and calculated measurement
• CarePlan.activity.note needs further explanation
• Simplification of Schemas #4 - use the
• Conformance SearchParams should be more powerful
• CarePlan.participant.role needs a value set
• Profile.structure.element.definition.type.profile should repeat
• Parent concept in medication-form-codes and medication-package-form-codes is wrong
• Need rules for tags invalidated by an update
• Profile.date should have a more meaningful name
• Add a warning about the safety implications of not conforming to the specification
• Patient/RelatedPerson/Organization search key 'phonetic' lacks path definition
• contained resources overrepresented in examples
• Need to clarify what's in-scope for resources vs. profiles
• Message endpoints should be associated with the event protocol
• Add DateTime to the Attachment data type
• Practitioner address data model not rich enough to capture needed information in all countries
• Add detail to Value Set Expansion Definition
• Need a formal support mechanism for i18n and i10n of schemas and schematrons
• Add support for multiple designations on concepts
• Add a property for comments to the JSON format
• Create "best practice" guide for creating a "system URI" for Coding
• Value set - define/concept[0..*] needs additional wording
• display text is wrong fro example
• Clarify when OperationOutcome rather than another resource is appropriate
• FHIR ebook not valid
• IsValidate and Translate should allow multiple repetitions
• Specify what it means for a search parameter to matches a complex datatype
• Should add rationale to Invariant
• Resource package/profile list should link directly to profile if only one is defined for unique id
• Need to allow Observation.related.target to be QuestionnaireAnswers in addition to Observation
• Need to add support for message polling and message querying
• Add constraining base node searches through ConformanceProfile
• Explicitly specify resource/element types throughout?
• Referenced system vakue "http://hl7.org/fhir/message-type" seems incorrect
• usability issues with "address" as a search parameter for patient
• Expand the definition of CarePlan.concern
• Communication support for phone calls

- Update example f201 to use dose, timing, and medication (remove the todos)
- Clarify the relationship of Medication.package and Medication.product
- Include common resource elements in resource profile definitions
- Add best practice narrative on suppressing data for client access of a resource
- Expansion and compose should allow for caseSensitive or define should lose the attribute
- Resource Ownership
- Composition.type and Composition.class definitions should be improved according to the improvements made to DocumentReference.
- Create UDI examples for device
- Consider choice of code|Reference(Medication) or code|Reference(Medication|Substance)
- Follow up on #3600 Change MedAdmin.dosage.site to .bodySite choice of codeableConcept|reference(BodySite)
- Be specific that JSON format must be UTF-8 just like XML
- Add 'active' On Practitioner Resource
- To add new datatype for multichannel recording data
- identifier - bring consistency to the cardinality and type across resources
- maintaining order within FHIR resources for list items
- List.flag vocabulary
- order of common resource elements not consistent
- Patient Entered/Reported Data
- Request for new security label for when content is removed from a resource for operational reasons
- Medication should be required in MedicationStatement
- MedicationStatement.wasNotGiven should notTaked
- Add "proposed" status to the Appointment resource
- MedicationAdministration.status should be marked as a modifier
- Add Organization reference to Order.source
- Need extensions for capturing formal mapping paths for data elements
- Jan 2015 Ballot Comment #455
- Translate does not suport dependsOn
- Consider Adding Precondition to MedicationStatement
- Dosage Instructions on Medication Dispense
- Are there other ways of doing UI hinting than a heirarchy in the expansion
- Do we need support for active/inactive in expansions?
- can we be more specific about date and filter parameters on expansion
- Improve documentation around value set expansion currency
- Define "all known value sets" magic URI as part of the spec
- Server Validation of CodeSystem.define.system
- Should code system name be a service provider specific identifer?
- How should display text case be handled on validate - case sensitive or not?
- Add concept map link extension
- Administration of medication to a patient
- AllergyIntolerance.event.description vs AllergyIntolerance.event.comment
- FamilyHistory negation
- Specimen needs status code
- Identification of Value Sets Used in a Profile
- typo in MedicationAdministration.dosage.rate
- MedicationAdministration.dosage.rate where no duration is needed
- MedicationPrescription.dosageInstruction.scheduled[x] naming inconsistency
- Alert should have encounter
- Add extension to link OperationOutcome and Contraindication
- Recognition in FHIR specification of profiles from other organizations
- Value set should explain how master files are handled
- Medication Package Form Codes wrong?
- Note Immunization Resource Can Record Historical Immunizations
- MedicationPrescription
- Consider 'dateEnded' for MedicationStatement
- Consider 'reasonEnded' codeable concept for MedicationPrescription
- Clarify MedicationStatement usage
- Invariants should be on MedicationStatement
- Name of MedicationPrescription
- Consider 'date' for MedicationPrescription
- Consider 'reason' codeable concept for MedicationPrescription
- Clarify MedicationStatement usage
- Invariants should be on MedicationStatement
- FHIR specification and build system must be refactored
- "Break the Glass" Method Description in Security Labels Section is Very Limiting
- allow MedicationStatement.quantity to be either a quantity or range
- Clarify boundary between MedicationAdministration and MedicationStatement
- Clarify what elements of valueSet constitute the Content Logical Definition
- hostname instead of URL for LOINC
- Relationship between child concepts and subsumption needs clarification
• 5949 relationship between dosage.text and dosage.Scheduled[x]
• 5951 Timing doesn't allow an overall duration
• 5956 Additional Questionnaire layout hints - horizontal, autocomplete and select
• 5961 Change DiagnosticReport.name to .code
• 5965 Status values for MedicationStatement can conflict with effective[x]
• 5966 Composition section content should come before a nested section
• 5972 Weird-looking flags
• 5973 Superseded is misspelled
• 6336 "Executing an Operation Asynchronously" should be removed
• 5981 Need to be able to specify a value set identity by reference to a binding (e.g. element definition) in value set operations
• 5998 Proposal to add _narrative parameter to REST api
• 6019 Need a common extension to allow goals to be referenced from other resources
• 6022 Change short description of .perfomer
• 6023 Minimum cardinality of ProcedureRequest.subject should be 0
• 6025 Need rules for stringency
• 6032 Too many things 1..x in DocumentReference
• 6034 NDF-RT link on Named Systems List page 404s
• 6040 StructureDefinition/ElementDefinition overlaps
• 6041 durationMax not present in Repeat element of Timing resource
• 6042 Terminology services page: validate-code replaces validate
• 6044 Questionnaire.$populate - subject parameter type should be Reference(Any) not Any
• 6045 Questionnaire - needs a subject type element
• 6046 Questionnaire.$populate - content parameter type should be Any, not string
• 6048 Signature should allow device resources
• 6060 Documentation of extensions for simple types
• 6061 Typos
• 6066 Expand [x] type element in profile unspecified types in the snapshot
• 6067 Split Supply into SupplyRequest and SupplyDispense
• 3791 create examples tab for extensions
• 6077 create examples tab for extensions
• 6078 Complex extensions aren't rendering properly
• 6079 LOINC mappings for data element should be to database columns
• 6080 StructureDefinition needs a target type property
• 6084 MedicationPrescription misspelled as MedicationPescription in several places
• 6085 Add discussion of profile consistency to profile page
• 6087 No way to specify multiple bindings (with different strengths)?
• 6088 We still need Physical vs. Postal address
• 6089 Telecom doesn't allow for alternate systems
• 6091 Add Device.note
• 6092 Individual Resource pages do not align with Resource names
• 6093 Differential element[x] is expanded to element
• 6094 change 'subject' search parameter
• 6096 Bundle resource has no elements that are marked as "in summary"
• 6097 Conceptmaps are not part of validation.zip
• 6098 Extension Initial presumed answer for question - request for more detail surrounding Question.text and Group.text
• 6099 Should have style and markup on Question.text and Group.text
• 6100 change externalFormula.rate to type quantity
• 6101 Move .enteralformula.scheduled next to .quantity
• 6102 move .enteralformula.administrationinstruction to end
• 6103 provide guidance in notes section on how to use the resource for a continuous vs a bolus enteral feeding
• 6104 Tooling should enforce coding capitalization consistency
• 6105 Appointment notes section could use a diagram or two
• 6106 add a entry for a single file containing all the structure definition datatype and resource
• 6107 broken link in patient example
• 6108 Clarify FHIR server behavior (http codes, body, outcome etc) while CREATE with id, UPDATE without id
• 6109 HTTP codes ValueSet
• 6111 change type for rate change from quantity to rate
• 6113 Summary needs to be updated
• 6115 add elements to Address data type
• 6116 Parameters resource is missing in listings
• 6118 409 status code
• 6121 Content-Type: _format,accept,Accept-Charsact
• 6122 Support non-atomic transactions/batches in RESTful API
• 6125 Profiling should document rules for documentation & mappings
• 6126 Make clear that RelatedPerson and Practitioner can be animals
• 6127 ValueSet profile should support additional instruction on codes
• 6128 Change vaccineType to vaccineCode
• 6129 Change the Procedure attribute type to code
• 6130 Change attribute name for Quantity.code, Quantity.units, Quantity.system
• 6131 CarePlan could benefit from a reference to EpisodeOfCare
• 6132 Add Problem to ConditionCategory
• 6133 change "list" to "see List of Resources"
• 6134 Change 'This resource is extends resource' to 'This resource is extends the base Resource'
• 6135 move hyperlink to resources and capitalize
• 6136 change "concept" to "concept code" or "code"
• 6137 Validator not handling references to contained resources
• 6138 Resource.Id and Resource.meta not in summary
• 6140 Schema error for Age, Count, etc.
• 6144 remove table showing conformance/extentibility combinations
• 6145 typo in example
• 6147 typo in text for DomainResource Resource
• 6148 typo in text for search parameter
• 6149 missing text? in bundle transaction discussion
• 6151 structureDefinition notes section does not apply - typo?
• 6152 typo in 6.17.5.2
• 6153 Conformance.rest.security.service should be extensible
• 6154 Does Conformance need a RevInclude list?
• 6155 Refers to StructureDefinition whereas much of the discussion is about ElementDefinition
• 6156 should this section refer to the section on revinclude?
• 6157 replace this section or refer to Bundle text from 6.8.3.5
• 6158 fix link
• 6159 correct typo
• 6160 fix typo
• 6161 no example of JSON comments found - need explicit example references or shown
• 6164 fix uml for timing datatype
• 6165 when and how to use AppointmentResponse.participantType
• 6167 need more clear clarification
• 6169 vsd 1 expansion.value for is wrong
• 6170 Clarify use of flag.category
• 6171 Flag.patient should be [0..1]
• 6172 no example for named query
• 6173 Parameters resource not listed on resource page
• 6174 add link
• 6175 change text to avoid using term 'list'
• 6176 clarify what is meant by 'subject resource '
• 6177 fix typo
• 6178 provide clarification to profile tags
• 6179 Narrow down composition.section.code.value set
• 6180 Bining types need to be updated in this section
• 6181 Code restriction regex is wrong
• 6184 BCP-13 and BCP-47 should be in the coding system list
• 6187 need to also refer to both StructureDefinition and ElementDefinition
• 6188 difference between profile types is unclear
• 6189 differential view should only show what is different
• 6190 There are two Clinical Document profiles in Spec?
• 6191 broken links
• 6193 change name of section
• 6194 remove the parenthetical resources
• 6195 include reference to fulfillment of referral request
• 6196 propose boundaries for DO
• 6199 add boundaries section to DR
• 6200 remove background and context section from DR
• 6201 Add referral creation date
• 6202 redo Background and Context section
• 6205 refer to .neme which is missing
• 6207 Improve the description for .event.detail
• 6208 Allow Organization in flag.author
• 6209 Unclear how to represent non-medical devices
• 6212 create at least example binding
• 6214 detail.product what about diet/nutritional supplements
• 6215 roll up CarePlan.activity.detail.note into CarePlan.activity.notes
• 6216 Goal.concern reference list
• 6218 change name to sodium and 'fluid' restricted
• 6219 medication form bound to dosage route VS
• 6223 why not have a reference to the MedicationDispense Resource for reference to dosing details
• 6226 Search summary table misses entry for _query
• 6229 extension definition still very hard to read
• 6233 AuditEvent confusion on 'identifier' elements that are actually strings. Affects understanding as well as search (which should not be token)
• 6234 suggestion to add a feature like .fields
• 6235 invalid namespace prefix xs:xs:Year in primitive profile XML
• 6238 Is WADO-RS equivalent to "DICOM contexts " and "DICOM constructs"
• 6239 many description contain parenthetical ids - a legend would be nice to explain what they mean
• 6240 with identifier.type does is make sense to roll up multiple identifier or keep as separate identifiers
• 6241 Retrieve URI (0008,1190) is confusing name
• 6242 ImagingStudy.clinicalInformation should choice of string or Condition resource and possible code?
• 6243 procedure needs at least an example binding and should there be a choice with procedure resource
• 6244 ImagingStudy.series.instance.content comment is wrong
• 6245 Suggest hyperlinks to referenced standards WADO and DICOM
• 6827 2015May sdc #44 - Fix page numberings
• 6828 2015May sdc #45 - Define terminology for Questionnaire category extension
• 6829 2015May sdc #46 - Declare references as Reference(x)
• 6831 2015May sdc #48 - Missing/bad links
• 6832 2015May sdc #49 - JSON template not in All view
• 6833 2015May sdc #50 - Links to structure definitions don't resolve
• 6834 2015May sdc #51 - XML representation for last "value" element should have the entire element crossed out not just its description.
• 6836 2015May sdc #53 - Missing publisher
• 6837 2015May sdc #54 - Consistent in use of terms. For example, CCDA and C-CDA.
• 6838 2015May sdc #55 - TOC did not list all sections.

• 6946 2015May core #11 - Typo on goal
• 6947 2015May core #12 - Add CarePlan.description
• 6949 2015May core #14 - Expand on potential uses
• 6950 2015May core #15 - Message can be sent to many recipient (recipient 0..*). How will the sender know if the message was received by all of them?
• 6952 2015May core #17 - Explain contraindication.author
• 6954 2015May core #19 - Clarification needed - is this who authored the documents in the set? Or is this who authored the document manifest?
• 6955 2015May core #20 - Typo - throgh needs a g
• 6956 2015May core #21 - Typo - change my to by
• 6958 2015May core #23 - Need to identify generic maternal/paternal relationships without specific family member
• 6960 2015May core #25 - Typo - remove "for use"
• 6969 2015May core #34 - typo - fix location of opening parenthesis.
• 6972 2015May core #37 - Make address 0..*
• 6975 2015May core #40 - GET should be POST, name changed
• 6977 2015May core #42 - GET should be POST, name is wrong
• 6983 2015May core #48 - Missing www
• 6984 2015May core #49 - Unabbreviate name
• 6985 2015May core #50 - No detail regarding the Risk Assessment issue
• 6986 2015May core #51 - Typo - missing closing bracket
• 6987 2015May core #52 - In the notes, the incorrect line is stated in reference to the resource's id
• 6988 2015May core #53 - Make last updated match last-modified
• 6989 2015May core #54 - Add HTTP headers to example
• 6990 2015May core #55 - Change "SearchResults" -> Bundle
• 6991 2015May core #56 - Incorrect line number for meta.lastUpdated
• 6992 2015May core #57 - Incorrect line number for base
• 6993 2015May core #58 - Incorrect line number for total
• 6994 2015May core #59 - Incorrect line number for link
• 6995 2015May core #60 - "item" should be "entry" with correct line number
• 6996 2015May core #61 - Typo in word "exist"
• 6997 2015May core #62 - Incorrect line number for id
• 6998 2015May core #63 - It would be useful to have the Update Response return an HTTP Location header with the Updated Resource's new location on the service.
• 6999 2015May core #64 - Spelling typo
• 7000 2015May core #65 - Unclosed bracket typo.
• 7001 2015May core #66 - "[Missing]" suggests the spec is incomplete.
• 7002 2015May core #67 - Use "individual resource level"
• 7003 2015May core #68 - Invariants Section content missing
• 7004 2015May core #69 - Table contains a number of values under Status with "Unknown - not stated by committee"
• 7005 2015May core #70 - Typo in word "that"
• 7006 2015May core #71 - Typo in word "is"
• 7007 2015May core #72 - TBD in table of registries
• 7008 2015May core #73 - Missing section on Canonical XML
• 7009 2015May core #74 - todo - develop this at top of section
• 7011 2015May core #76 - remove references to value set from Coding
• 7013 2015May core #78 - Missing introduction or no introduction?
• 7014 2015May core #79 - Content is "todo"
• 7015 2015May core #80 - Missing link
• 7016 2015May core #81 - Response: Happy with mandatory SSL/TLS+Server Certificate, and optional client certificate authentication.
• 7017 2015May core #82 - Spelling typo
• 7018 2015May core #83 - Response: Specifying paging support would be a welcome addition and would further increase interoperability.
• 7019 2015May core #84 - Spelling typo
• 7020 2015May core #85 - Grammar around "the criteria is expressed."
• 7021 2015May core #86 - Typo around "On"
• 7022 2015May core #87 - client makes the call, not the server
• 7023 2015May core #88 - It would be useful and informative to demonstrate how this process fulfills the original problem statement in the beginning of this section.
• 7024 2015May core #89 - Typo around "if they are do not"
• 7025 2015May core #90 - Missing content / TODO
• 7026 2015May core #91 - Disagree with timezone approach
• 7027 2015May core #92 - Missing content / TODO
• 7030 2015May core #95 - State whether translation codes are allowed and evaluated
• 7031 2015May core #96 - State whether translation codes are allowed and evaluated
• 7032 2015May core #97 - Reference to feed.category is incorrect.
• 7033 2015May core #98 - More documentation for "cert"
• 7034 2015May core #99 - Content comes from SDC
• 7036 2015May core #101 - Specification generation/tooling error
• 7038 2015May core #103 - Missing content
• 7039 2015May core #104 - List includes "Other" instead of "Basic"
• 7041 2015May core #106 - It would be helpful if this value set had a code to indicate a List is accurate within the context it is used in
• 7042 2015May core #107 - Missing content / TODO
• 7043 2015May core #108 - Add constraint around Locked Date wrt referenced versions
• 7044 2015May core #109 - Is the code list complete and sufficient?
• 7047 2015May core #112 - Explain relationship between AllergyIntolerance and RiskAssessment
• 7052 2015May core #117 - Agree, this isn't necessary.
• 7053 2015May core #118 - What is the recommended approach for recording alerts?
• 7054 2015May core #119 - Typo
• 7055 2015May core #120 - Explain how No Known Allergies is handled
• 7056 2015May core #122 - Did you consider making the status mandatory (1..1)? What does it mean when an AllergyIntolerance is returned with this field empty?
• 7058 2015May core #124 - The movement of sunlight out of this resource directly is different than the design in C-CDA design.
• 7059 2015May core #125 - Remove sentence on 5%
• 7060 2015May core #126 - Typos
• 7061 2015May core #127 - Add mime type list
• 7062 2015May core #128 - Is the person that Authored the plan always the one responsible for the plan? Would it better to say who 'wrote' the plan?
• 7070 2015May core #129 - Please add a suggested value set
• 7071 2015May core #130 - Did you consider making the title 1..1 if the section is present?
• 7073 2015May core #132 - What is the use case for not having a title?
• 7075 2015May core #134 - there's is misspelled
• 7076 2015May core #135 - Remove "are"
• 7077 2015May core #136 - resource misspelled
• 7078 2015May core #137 - whether should not be capitalized
• 7079 2015May core #138 - Copy and paste from 1.12.2
• 7080 2015May core #139 - Copy and paste from 1.12.2
• 7081 2015May core #140 - "that" should be "than"
• 7082 2015May core #141 - "an" should be "a"
• 7083 2015May core #142 - Missing "IDs"?
• 7084 2015May core #143 - Is there a need for a non-bulleted list? list-style-type:none
• 7086 2015May core #145 - Should communication also include a preferred method such as sign language, Braille, email, telephone, etc.
- 7087 2015May core #146 - Is the priority property the patient's priority or the practitioner's priority? Shouldn't both be represented as they may not be the same?
- 7088 2015May core #147 - Both example links return 404.
- 7089 2015May core #148 - "activity" should be "activities"
- 7090 2015May core #149 - "A" should be "An"
- 7091 2015May core #150 - Remove "a"
- 7092 2015May core #151 - Remove the phrase "consumer level" from the introduction.
- 7093 2015May core #152 - Remove the first occurrence of the word "a" in this sentence.
- 7094 2015May core #153 - Change semicolon to a colon, correct spelling of "differently," and add a period at the end of the sentence.
- 7095 2015May core #154 - Move the sentence to section 1.23.6.3.1, and consider expanding it.
- 7096 2015May core #155 - Change "a code" in the first sentence" to "codes."
- 7097 2015May core #156 - Capitalize the abbreviation "URL."
- 7103 2015May core #162 - Wording is over complex
- 7107 2015May core #166 - Request that max count be unbounded
- 7118 2015May core #177 - Explain whether Contraindication is definition or instance
- 7121 2015May core #180 - Statuses aren't sufficient
- 7123 2015May core #182 - What's difference between Procedure.category and type?
- 7124 2015May core #183 - Use approach site, not target
- 7125 2015May core #184 - Don't make Procedure.outcome codes
- 7126 2015May core #185 - Procedure.complication should be narrative
- 7127 2015May core #186 - Procedure.relatedItem is too complicated - make it extension
- 7129 2015May core #188 - Procedure.device is too vague
- 7133 2015May core #192 - Differentiate placer & filler ids
- 7134 2015May core #193 - Rename clinicalNotes to reason or indication
- 7135 2015May core #194 - supporting information isn't clear, includes errors
- 7137 2015May core #196 - Declare relationship with IEEE 11073
- 7141 2015May core #200 - What unit codes are to be used?
- 7143 2015May core #202 - needs more description. Doubt they are talking about color as in the light spectrum, so need something that ordinary folks can understand
- 7144 2015May core #203 - Believe this is really the sampling rate of a signal. If so that should be stated more clearly
- 7148 2015May core #207 - Explain Aggar example
- 7149 2015May core #208 - very unclear. Is this in case it is Coded with exceptions variable gets a free text answer. Need an example
- 7150 2015May core #209 - test not done was reported as part of the status in V2. Would make sense to stay with that both for continuity and because it is NOT really an answer
- 7152 2015May core #211 - to whom. Think it is usually when made available to the clinical providers. It may be available earlier within lab but not yet "verified"
- 7154 2015May core #213 - Explain reliability
- 7155 2015May core #214 - add "instance" to end after "observation". Might comment on the scope of uniqueness. globally unique or unique in the context of the sources
- 7156 2015May core #215 - insert "donor" after fetus
- 7157 2015May core #216 - Subject can be communicated within Observation.code
- 7158 2015May core #217 - change "are often" to "may be"
- 7160 2015May core #219 - Explain grouping more
- 7161 2015May core #220 - Related type is unneeded complexity
- 7167 2015May core #226 - Clarify purpose of MedicationStatement
- 7168 2015May core #227 - Loosen who can capture MedicationStatement
- 7170 2015May core #229 - help in the US to say this would usually be the RxNorm clinical drug code as mandated by MU regulation
- 7172 2015May core #231 - Does NutritionOrder include hyperalimentation?
- 7175 2015May core #234 - How to handle confusion between intolerance vs. preference
- 7176 2015May core #235 - How to handle confusion between intolerance vs. preference vs. excludeFood
- 7178 2015May core #237 - Distinguish what's in internal order vs. provider order (amount)
- 7184 2015May core #243 - Use route rather than enteral formula
- 7187 2015May core #246 - Add reference to panels & batteries
- 7191 2015May core #250 - add " (revised) " for clarity after updated.
- 7193 2015May core #253 - Overlap of Procedure and Observation is going to be a problem
- 7202 2015May core #262 - Explain how terminology works with local vs. standard code sets.
- 7204 2015May core #264 - Typo - "-and" misspelled in second sentence
- 7205 2015May core #265 - Don't understand code system and value set distinction
- 7207 2015May core #267 - Don't use ValueSet for answer lists
- 7210 2015May core #270 - Errors in examples.
- 7211 2015May core #271 - Don't use both SNOMED and LOINC
- 7212 2015May core #272 - no one would do this. Further the oral temperature does not literally measure any thing about the body as a whole
- 7213 2015May core #273 - no one would do this either if the measure is called oral temperature
- 7214 2015May core #274 - Narrative doesn't reflect how data would be reported
- 7219 2015May core #279 - Need phase abnormal flag
- 7220 2015May core #280 - what are these symbols?
- 7222 2015May core #282 - Which are master files vs. patient-specific elements. ClinicalImpression is problematic
- 7223 2015May core #283 - should be distinguished as a master file or knowledge base not patient specific
- 7224 2015May core #284 - Use MedicationOrder rather than MedicationRequest
- 7226 2015May core #286 - more often this will be data about a dispensing. The distinction based on how it arrived is not good
- 7227 2015May core #287 - This is described as an issues at to whether it should be separate
- 7229 2015May core #289 - Use MedicationOrder rather than MedicationRequest
- 7230 2015May core #290 - the LOINC code for blood culture is 600-7 Bacteria identified in Blood by Culture
- 7231 2015May core #291 - Don't use both SNOMED and LOINC
- 7232 2015May core #292 - " entire body " is a bad example
- 7233 2015May core #293 - Fix examples to show pre-coordinated formula
- 7234 2015May core #294 - Use LOINC instead of SNOMED
- 7237 2015May core #297 - Errors in examples
- 7243 2015May core #303 - Don't know what is included
• 7244 2015May core #304 - presume this relates to the so called segmented privacy, that will be a nightmare and could be glue to the wheels of care. Would try to avoid it.
• 7249 2015May core #309 - Need more background on parallels of messaging w/ v2
• 7257 2015May core #447 - No content is provided in this section
• 7259 2015May core #449 - The error code and any recommendations on OperationOutcome should be specified
• 7261 2015May core #451 - No content is provided in this section
• 7262 2015May core #452 - No content is provided in this section
• 7265 2015May core #455 - contains route codes instead of the intended medication form codes
• 7266 2015May core #456 - contains route codes instead of the intended package codes
• 7269 2015May core #459 - Need a definition from Lloyd
• 7270 2015May core #460 - The link is critical in order to know what the requirement is.
• 7276 2015May core #464 - Typo
• 7271 2015May core #461 - I am unsure as to the intention of this note, but it does not seem to match the example
• 7272 2015May core #462 - The line number references in the notes do not seem to match the example
• 7273 2015May core #463 - Typo
• 7274 2015May core #464 - Missing closing parenthesis at end
• 7275 2015May core #465 - Line number reference is incorrect
• 7276 2015May core #466 - lastUpdated (line 12) - if present, this must match the value in the HTTP header
• 7277 2015May core #467 - server is spelled wrong
• 7278 2015May core #468 - Typo
• 7279 2015May core #469 - How is resource contention handled on delete?
• 7280 2015May core #470 - More explanation on client-assigned ids8082
• 7282 2015May core #472 - Typo
• 7284 2015May core #474 - No content is provided in this section
• 7285 2015May core #475 - No content is provided in this section
• 7288 2015May core #478 - No content is provided in this section
• 7289 2015May core #479 - Verify security risks are handled in stylesheet
• 7290 2015May core #480 - Content is needed
• 7301 2015May core #491 - Make birthDate a dateTime
• 7302 2015May core #493 - There may be more than one dietary preference/restriction
• 7304 2015May core #494 - There may be more than one diagnosis on discharge
• 7305 2015May core #495 - admit diagnoses are important, particularly in the cases where the patient may have not be discharged yet.
• 7307 2015May core #497 - Consider adding birthDate dateTime to resource, just as it is in the Person resource. Ager of the individual involved in the care could be important
• 7311 2015May core #501 - Keep birthDate data type consistent with the Person resource
• 7313 2015May core #503 - No guidance provided on Messaging subscription
• 7340 2015May core #530 - Example links are broken.
• 7345 2015May core #535 - Require server behavior for merged patients.
• 7346 2015May core #536 - Make the address search parameter its own type with subdivisions rather than simply a string.
• 7347 2015May core #537 - Schedule.actor has resource type of "Any"
• 7348 2015May core #538 - participant.actor should be required
• 7349 2015May core #539 - Not ALL of CCDA has been incorporated yet.
• 7351 2015May core #541 - Add ambulatory care to list of contexts
• 7352 2015May core #542 - Merge first paragraph of 1.7.2.2 into 1.7.2.1. and eliminate second paragraph
• 7353 2015May core #543 - Use a better comparison than folders
• 7354 2015May core #544 - Typo extraneous "is." Also suggest capitalizing and making the link more explicit (to Base Resource).
• 7355 2015May core #545 - Wording is confusing on common properties
• 7356 2015May core #546 - Don't use "may not"
• 7357 2015May core #547 - Typo
• 7358 2015May core #548 - Don't list CCD, say "implementation guide" instead of profile
• 7359 2015May core #549 - What is the answer then? Shouldn't there be testing tools that can check complete conformance to the FHIR spec, as well as to specific FHIR Profiles?
• 7360 2015May core #550 - Need to see isModifier=true in the instance
• 7362 2015May core #552 - Expand on life-cycle
• 7363 2015May core #553 - Use "life cycle" instead of "pattern"
• 7364 2015May core #554 - Drop life-cycle table until there are more definitions
• 7365 2015May core #555 - Change "from" to "to"
• 7366 2015May core #556 - Why not avoid this problem by requiring contained resources to explicitly state their subject? Why allow this degree of optionality?
• 7367 2015May core #557 - Clarify use of "Medication" as non-patient-specific
• 7368 2015May core #558 - Narrative should contain all human-relevant discrete data
• 7370 2015May core #560 - How is list narrative made non-redundant if generated?
• 7371 2015May core #561 - Narrative only shouldn't be a List
• 7372 2015May core #562 - See my comment on 6.1.5 -- it does not make sense to call these types of narrative a "List."
• 7373 2015May core #563 - Is "instant" needed?
• 7374 2015May core #564 - Clarify reference to contained extension
• 7375 2015May core #565 - Typo
• 7376 2015May core #566 - MedicationPrescription "anti-prescription" example has a typo in its first tag, and has as the ending tag.
• 7377 2015May core #567 - Typo
• 7378 2015May core #568 - Rename "Specification Map" to "Table of Contents"
• 7379 2015May core #569 - Be explicit that Composition doesn't contain content. Also note that it establishes context.
• 7380 2015May core #570 - Typo
• 7381 2015May core #571 - How are lawn mowing services healthcare related?
• 7382 2015May core #572 - "a single" is too limiting and does not fit the examples.
• 7384 2015May core #574 - I think it's important to be explicit about how to know the difference between proposals and actual orders, so I suggested the additional wording.
• 7385 2015May core #575 - From previous ballot, enter something about 162, 176, 177, 183, 187
• 7386 2015May core #576 - Differentiate "doesn't have" from "refuted"
- 7387 2015May core #577 - Add link to documents from Resources page under "Documents & Structure" heading
- 7388 2015May core #578 - Soften language on presentation of the document changing.
- 7392 2015May core #582 - Reword definition
- 7393 2015May core #583 - Remove "final mode" and clarify description of changes list.
- 7394 2015May core #584 - Where is narrative found in a resource?
- 7395 2015May core #585 - Saying "base" resource could be confusing since there is a specificul "Base Resource" section (1.10) in the FHIR spec.
- 7396 2015May core #586 - Typo
- 7397 2015May core #587 - Remove (or deprecate) this from the Basic Resource Types value set because Slot is already a FHIR resource in the Scheduling/Ordering category.
- 7398 2015May core #588 - Link is broken, sentence is confusing
- 7399 2015May core #589 - Typo
- 7401 2015May core #591 - Distinguish "element" vs. "backbone element"
- 7402 2015May core #592 - The URL does not work, produces an HTTP 404 error.
- 7403 2015May core #593 - Description of the rules on human-readable text aren't completely accurate
- 7404 2015May core #594 - Is narrative the same for documents vs. other mechanisms?
- 7405 2015May core #595 - Example implies MedicationStatement is a summary, when summary is List
- 7407 2015May core #597 - CarePlanActivityCategory shouldn't be required
- 7408 2015May core #598 - Typo
- 7410 2015May core #600 - Suggest providing a clarification to explicitly allow deprecation (sometimes it just makes sense).
- 7411 2015May core #601 - Typo
- 7412 2015May core #602 - ToC links to wrong page
- 7413 2015May core #603 - Typo, phrase is vague
- 7414 2015May core #604 - How does OperationOutcome represent business issues?
- 7415 2015May core #605 - ToC links to wrong page
- 7417 2015May core #607 - ToC links to wrong page
- 7418 2015May core #608 - Contradiction in definition of Device.location
- 7420 2015May core #610 - ToC links to wrong page
- 7421 2015May core #611 - Typo
- 7422 2015May core #612 - Typo
- 7423 2015May core #613 - Typo
- 7426 2015May core #714 - Reference any resource in Document manifest
- 7427 2015May core #715 - Reference any resources in Document manifest
- 7428 2015May core #716 - Using of Snomed CT
- 7430 2015May core #718 - Harmonization with ISO EN 13606
- 7431 2015May core #719 - AuditEvent source identifier
- 7438 2015May core #726 - Provide help text for flags column
- 7439 2015May core #727 - Typo
- 7440 2015May core #728 - hyperlink is to modifier, but that does not exist on this page....probably should be to #1.16.0.2
- 7441 2015May core #729 - hyperlink is to search.html#mustSupport, but that does not exist on this page....probably should be to #2.1.1.4.7
- 7444 2015May core #732 - ...except... except what? Seems like there is something missing from the sentence
- 7445 2015May core #733 - nice file cabinet, folder, versioning analogy, but think that read needs to specify it gets the paper from the top of the folder
- 7446 2015May core #734 - missing a space between appropriate and cabinet
- 7447 2015May core #735 - resource instead of resource
- 7448 2015May core #736 - Need life-cycle declared everywhere
- 7450 2015May core #738 - How is unknown extensions support declared?
- 7452 2015May core #740 - How do we avoid duplicate extensions?
- 7454 2015May core #742 - Can only one be declared as primary? Can none?
- 7456 2015May core #744 - The existing text seems to have a sentence fragment and the meaning is unclear.
- 7457 2015May core #745 - should allow for multiple Coding returned, with at most one marked as primary
- 7459 2015May core #747 - Why are_text and _filter missing?
- 7460 2015May core #748 - Allow non-resources to be focus of Provenance
- 7463 2015May core #751 - patient compartment should be lowercase patient, not uppercase Patient, which would be the resource.
- 7464 2015May core #752 - "patient" has wrong case
- 7466 2015May core #754 - Don't snip narrative
- 7468 2015May core #756 - Explain issues around cross-origin resource sharing
- 7469 2015May core #764 - Typo-Binding Definitions
- 7470 2015May core #765 - Finding the Table of Contents and Section numbers
- 7471 2015May core #766 - Clinical Resources vs. Administrative Resource
- 7472 2015May core #767 - Problems with the section "Mixing Custom and Standard Terminologies"
- 7473 2015May core #768 - Permit a code for a MedicationStatement is a summary, when summary is List
- 7476 2015May core #771 - Rendering of choice cardinals
- 7477 2015May core #772 - Guide to Resources needed
- 7479 2015May core #774 - 5.1 isn't referenced in TOC correctly
- 7480 2015May core #775 - These appear to be the same value set but are referenced with different names.
- 7481 2015May core #776 - Value set link broken
- 7482 2015May core #777 - This comment appears to be left over from when dosage was 0.1 and is no longer appropriate now that dosage is 0.1.
- 7483 2015May core #778 - consistency of FamilyMemberHistory's condition with the Condition resource

• 7802 2015May core #1124 - Tools aren't checking binding strength alignment
• 7804 2015May core #1126 - Better documentation and examples for extensions both simple primitive and more complex structures.
• 7851 2015May core #1170 - Condition.clinicalStatus HL7v2 mapping
• 7854 2015May core #1174 - Encounter.type HL7v2 mapping
• 7855 2015May core #1175 - Condition.asserter definition clarification
• 7856 2015May core #1176 - Introducing HL7 FHIR page needs to update its Patient example
• 7857 2015May core #1177 - Base Resource Definition page has a misspelled word (resource)
• 7858 2015May core #1178 - Patient Cause of Death
• 7859 2015May core #1179 - Condition.dateAsserted definition clarification
• 7864 2015May core #1184 - Condition.clinicalStatus should not convey both record status (in error) and confirmation Status (working, confirmed, refuted)
• 7866 2015May core #1186 - Add comments or notes to the Immunization resource
• 7867 2015May core #1187 - Add a record status to communicate active, in error, cancelled
• 7868 2015May core #1188 - Add Encounter to Risk Assessment
• 7870 2015May core #1190 - Add Goal.Informant
• 7873 2015May core #1193 - Period dates in the future
• 7874 2015May core #1194 - Patient.careProvider HL7v2 mapping
• 7875 2015May core #1195 - Appointment.reason HL7v2 mapping
• 7876 2015May core #1196 - Questionnaire.name
• 7878 2015May core #1198 - Attachment.contentType has conflicting documentation
• 7883 2015May core #1203 - Add encounter to list
• 7884 2015May core #1204 - Add Goal.category
• 7885 2015May core #1205 - Add Goal.startDate
• 7886 2015May core #1206 - Communication support for phone calls
• 7887 2015May core #1207 - Immunization.date optional
• 7889 2015May core #1208 - Encounter participant definition
• 7889 2015May core #1209 - Using Codes in Resources typ correction
• 7891 2015May core #1211 - Search-specific page needs to clarify what URL POST should be supported against.
• 7892 2015May core #1212 - Under "identity", it states that if ports differ, the identity of the resource differs, but specifically mentions that http is equivalent to https. This conflicts.
• 7894 2015May core #1214 - Rename AllergyIntolerance.event
• 7895 2015May core #1215 - "related things" to "Related identifiers or resources associated with the DocumentReference"
• 7896 2015May core #1216 - Encounter Status Management types
• 7897 2015May core #1217 - Should immunization be searchable by subject since there is no subject parameter (if yes, should AllergyIntolerance be searchable by subject?)
• 7902 2015May core #1222 - More clarification is needed around how to query for a subset of observations (vitals, labs, social history, etc.).
• 7902 2015May core #1222 - Clarify the purpose of FHIR Core Profiles
• 7903 2015May core #1223 - Clarify boundary and relationships between Communication and Encounter
• 7906 2015May core #1226 - Encounter condition relationship
• 7907 2015May core #1227 - RESTful special characters
• 7908 2015May core #1228 - Add AllergyIntolerance.severity
• 7909 2015May core #1229 - Flag Summary Search broken hyperlink
• 7911 2015May core #1231 - MedicationStatement updates
• 7912 2015May core #1232 - More timing examples
• 7913 2015May core #1233 - MedicationStatement.status clarification
• 7914 2015May core #1234 - IV infusion timing
• 7915 2015May core #1235 - These concepts need to be split. CRFs is a reserved word in context to clinical trial, data collection.
• 7921 2015May core #1241 - Require 403 Response for Unauthorized Access.
• 7924 2015May core #1244 - Clarify content-location for Reads without Versioning support
• 7925 2015May core #1245 - Clarification on Resource + OperationOutcome responses
• 7926 2015May core #1246 - Remove support for conditional updates.
• 7927 2015May core #1247 - Remove support for conditional deletes.
• 7928 2015May core #1248 - Remove support for conditional creates.
• 7929 2015May core #1249 - Make version metadata support on Creates conditional on version support by servers
• 7931 2015May core #1251 - Further clarification for variant searches within compartments
• 7932 2015May core #1252 - Make Etag support for Conformance optional
• 7933 2015May core #1253 - Remove Transaction requirement for History interaction
• 7934 2015May core #1254 - Remove SHOULD stipulation for Server Content Manipulation
• 7935 2015May core #1255 - Transaction Integrity Guidelines in Read and Search
• 7941 2015May core #1261 - Unclear wording in field requirements in ReferralRequest
• 7944 2015May core #1264 - Change Asynchronous Operation execution to use Callback URLs
• 7946 2015May core #1266 - Clarify Document Immutability for Indirect Resource References
• 7953 2015May core #1273 - Only support POST for FHIR RESTful Search
• 7954 2015May core #1274 - Remove .language query parameter support
• 7955 2015May core #1275 - Modifiers should modify content, not names.
• 7957 2015May core #1277 - Alternative suggestion for Date Ranges
• 7961 2015May core #1281 - Modify Name of Substance.Type Property
• 7962 2015May core #1282 - Add class property to Substance
• 7968 2015May core #1286 - Limit Scope of Composition Resource to Documents
• 7971 2015May core #1291 - Overlap of elements in DocumentReference and Provenance
• 7972 2015May core #1292 - Add code for 'legalAuthenticator
• 7973 2015May core #1293 - The value set for .entity.type is listed as Required and is composed of FHIR resources, I think this is an error and should be "extensible"
• 7974 2015May core #1294 - Add organization to reference types
• 7975 2015May core #1295 - Add 'entity' and 'entitytype' as query parameters for provenance.
• 7976 2015May core #1296 - Add option for a receiver to send responses to mailbox endpoint of the source
• 7980 2015May core #1300 - The phrase literal isn't used until the "Business Identifier" section and it's unclear whether the spec is referring to id or identifier.
• 7981 2015May core #1301 - Typo
• 7982 2015May core #1302 - A simple example, or reference to search, on how to access by business identifier rather than literal resource id might help the new reader.
• 7983 2015May core #1303 - Please spell PI out. Protected information?
• 7984 2015May core #1304 - Does this mean OperationOutcome .issue.severity cannot = error? Why?
• 7985 2015May core #1305 - Typo
• 7986 2015May core #1306 - If possible, add link also.
• 7987 2015May core #1312 - Did you consider creating a diagram for this section?
• 7988 2015May core #1313 - Which status corresponds to admitted?
• 7989 2015May core #1314 - Clarify search returns
• 7990 2015May core #1315 - Does including this in a ballot upgrade the status to proposed? Where can folks track the discussion on this resource?
• 7991 2015May core #1316 - The examples in other spots are very helpful
• 7992 2015May core #1317 - The examples in other spots are very helpful
• 7993 2015May core #1318 - How did the authors decide to include 'to 2 significant figures'? In the next row it states 'to 4 significant figures'.
• 7994 2015May core #1319 - Allow a codeableConcept in addition to the ability to reference Medication Resource. It's very common to just record the medication code.
• 7995 2015May core #1321 - Please add an example.
• 7996 2015May core #1322 - The other sections use the first sentence to define the parameter -- would be great to follow pattern here.
• 7997 2015May core #1323 - Just trying to highlight difference with parallel sentences.
• 8001 2015May core #1325 - Typo
• 8002 2015May core #1326 - Add mode parameters as a value set.
• 8003 2015May core #1327 - Add examples for FHIR operations
• 8004 2015May core #1328 - Add example for code:in
• 8013 2015May core #1338 - Did you consider allowing a link between MedicationPrescriptions when the status is superceded?
• 8014 2015May core #1344 - Typo
• 8015 2015May core #1345 - Please add detail on when you expect to just use the MedicationPrescription.dispense vs the full MedicationDispense resource.
• 8016 2015May core #1347 - The value set appears to be route codes. Please update to be medication codes. Linked to the page from Medication.
• 8017 code: /medication.html
• 8018 2015May core #1348 - How did you decided to include this field? Isn't this available through the Medication.code and/or Medication.
• 8019 package?
• 8020 2015May core #1349 - Not clear what framework is referenced here?
• 8021 2015May core #1351 - Clarify resource inclusion in document bundle
• 8022 2015May core #1352 - How would a stylesheet render a document unsafe if it doesn't alter the presentation? Is a common stylesheet supplied?
• 8023 2015May core #1353 - Link to "Profile Tags" is incorrect - takes you to compartment based access Why wouldn't you use the meta tag in the composition resource?
• 8024 2015May core #1357 - Code inconsistent
• 8025 2015May core #1359 - Occurrence misspelling
• 8026 2015May core #1366 - Add "and extended with metadata in the HL7 Value Set Definition specification"
• 8027 2015May core #1367 - Do not understand the use case driving this, nor the need for the recursive containment. Remove.
• 8028 2015May core #1368 - Change Resource Contraindication to DetectedIssue
• 8029 2015May core #1369 - Effective date range for the communication
• 8030 2015May core #1370 - Medication Prescription Status Values
• 8031 2015May core #1371 - Add URI for NDC (National Drug Code)
• 8032 2015May core #1372 - Add URI for NPI (National Provider ID)
• 8033 2015May core #1374 - Support XHTML narrative in extensions
• 8034 2015May core #1375 - Link broken
• 8035 2015May core #1376 - Link broken
• 8036 2015May core #1434 - Why is the patient reference called patient in some resources and subject in others? Should be consistent where possible.
• 8037 2015May core #1435 - Typo
• 8038 2015May core #1436 - Typo
• 8039 2015May core #1437 - Make Composition.class and DocumentReference.class extensions
• 8040 2015May core #1438 - Make clear that Procedure.device includes implanted devices
• 8041 2015May core #1440 - Re-word for clarity
• 8042 2015May core #1441 - MedicationFormalRepresentation - Link to valueset for medication codes points to value set contents for route of administration.
• 8043 2015May core #1442 - MedicationForm - Link to valueset for medication codes points to value set contents for route of administration.
• 8044 2015May core #1443 - MedicationContainer - Link to valueset for medication codes points to value set contents for route of administration.
• 8045 2015May core #1444 - Medication.code - Reference points to value set contents for route of administration.
• 8046 2015May core #1445 - Medication.product.form - Reference points to value set contents for route of administration.
• 8047 2015May core #1446 - Medication.package.container - Reference points to value set contents for route of administration.
• 8048 2015May core #1447 - medicine -> medication
• 8049 2015May core #1454 - Concerns for FamilyMemberHistory
• 8050 2015May core #1461 - More structured approach to conformance resource
• 8051 2015May core #1462 - FHIR section 6.13 does not describe all UML classes
• 8052 2015May core #1463 - The concept of profile needs further consolidation
• 8053 2015May core #1464 - What is difference between a profile and implementation guide
• 8054 2015May core #1465 - Does not describe best practice wording on how to deal with large scale OID URI strategy
• 8055 2015May core #1466 - Fix description of Timing datatype components: frequency and frequencyMax
• 8056 2015May core #1467 - DocumentReference.format needs to be type Coding
• 8057 2015May core #1468 - Update the definition of "status" for the MedicationStatement7913
• 8110 When "To many codes to display (>10000)" , show "some" of them
• 8111 Clarify description of OperationDefinition.idempotent
• 8112 Recommend adding 'On-Hold' to MedicationStatement.status
• 8113 Need additional documentation on List resource about List semantics
• 8114 FamilyMemberHistory.deceased[x] documentation typo
• 8115 "Example" appears on the description of the Condition-Category valueset even though the values are required if used
• 8118 Correct typos in Service Root URL
• 8120 Consider Location.status "present"
• 8121 Allow additional search results when an advanced search algorithm is available
• 8122 Definition of neutered only covers male animals
• 8123 AuditEvent constraints are too tight
• 8124 Clinical Resource categories
• 8125 2015May daf #5 - Missing Concept Display Name
• 8126 2015May daf #26 - Expand value set
• 8127 2015May daf #27 - Profile title suggestion
• 8128 2015May daf #28 - Profile title suggestion

• 8301 Typo on updates page
• 8303 Value set expansion in parameters clarification
• 8306 Change binding of EnteralRouteOfAdministration from required to extensible
• 8307 Canonical url name clash "http://hl7.org/fhir/StructureDefinition/cda-inFullFillmentOf"
• 8308 Add FMM gradings, and give all resources a FMM level
• 8309 Constraints can be used to constrain extensions too
• 8310 Constraining to max=1 in profile loses information
• 8311 Small errors in StructureDefinitions for primitives
• 8313 Change terminology for AllergyIntolerance.type
• 8314 Logical table icon for Bundle incorrect
• 8315 Guidance on "Care Team"
• 8319 adjust wording for bundle.entry.transaction.url
• 8321 Extensibility documentation should explain representation for primitive data types in JSON
• 8322 Bad Link
• 8323 DiagnosticReport vs Composition - How are they related/different?
• 8324 Add "component" to ValueSet http://hl7.org/fhir/goal-relationship-type
• 8325 Add reference from Communication --> CommunicationRequest
• 8326 Example uses an invalid element name 'dob'
• 8327 2015May QICore #56 - Make Procedure.status field isModifier
• 8328 value-set code generator creates duplicate line for the profile within the meta tag
• 8329 Refine explanation of $Translate for non-map assertions
• 8333 Missing Examples for other usage identified
• 8337 Value set manifestation-c-cda-codes has no codes as defined
• 8338 Description of Condition/Problem/Diagnosis Codes off Condition.category has redundant "condition"
• 8339 Allow a server to specify that eTags are required for updates
• 8341 conformance versioning detail not consistent
• 8342 include the option for a client to specify whether the updated resource is to be included in a transaction response
• 8343 j.equivalence definition and valueSet definition contradict each other
• 8345 Support MedicationPrescription.dosageInstruction.rate as a Quantity
• 8352 2015May QICore #65 - Copyright Statement not appearing in generated valueset HTML page
• 8353 Non-resource-specific pages should include responsible WG
• 8354 ValueSet.define should be renamed to ValueSet.codeSystem
• 8355 valueOrdinal should be decimal, not integer
• 8356 Add a note about ordinals and reference to extension on Questionnaire
• 8357 Extension display doesn't show cardinality for extension
• 8359 ATNA REST action codes do not cover DSTU2 operations
• 8360 Clarify Condition.code and evidence
• 8363 No place for a displayname in SearchParameter
• 8365 Relative URLs in reference search parameter
• 8368 "it's" vs "its"
• 8370 We're ambiguous about allowing relative urls for reference-type search parameters
• 8371 content-type(application/x-www-form-urlencoded)
• 8372 Support multiple discharge diagnoses
• 8376 Encounter participant type value set - add addt1 V3 ParticipationType codes
• 8379 Observation indirect target is confusing
• 8381 Extend OrganizationType to include other commercial types
• 8382 Incorrect code in patient-example.xml
• 8386 LOINC copyright query should not allow "All" as a value
• 8388 doc-typenames filter value for LOINC should match case with LOINC db
• 8389 Create codes in special value code system for "L" (below detection limit) and "U" (above detection limit)
• 8393 Operations defined on profiles do not work
• 8394 Conformance.security search param path is wrong
• 8395 Error First child element must be of type... when defining a nested complex type extension
• 8396 json-edge-cases.js is invalid
• 8397 MedAdmin clarifications needed
• 8399 observation-methods includes an invalid filter for LOINC
• 8401 Add ConceptMap search parameter for sourceUrl
• 8403 Need 21090 ordinal extension on Coding
• 8407 Add AllergyIntolerance.onset
• 8408 Add identifier field to search parameters for Procedure resource
• 8416 Remove batch operations now that we have a batch interaction
• 8417 Concept Designation Use binding - clarify SCT licensing issues
• 8418 Add Period to Group Characteristic
• 8419 adjust binding strength of DocumentReference value sets
• 8421 Conflicting advise in ValueSet expansion and define/compose
• 8423 Care Plan Status missing draft and cancelled(or similar)
• 8426 What is the effect of operations on _history?
• 8427 Custodian of a Resource should be accessible through Provenance
• 8429 "everything operation support _include directive?"
• 8430 Clarify how non-transaction/batch Bundle posts work when sent to the base URL
• 8431 add Signature to the datatype graphic on the top of the datatype page
• 8432 Add Encounter to MedicationStatement
• 8433 Add "logical" to StructureDefinition.kind
• 8434 Document content expectations too tight
• 8437 Remove Social Security Number from the Identifier type value set and improve definition
• 8438 Add identifier systems to the system list
• 8439 Add a value set for yes/no/don't know (common questionnaire combination)
• 8440 Change references from Supply to SupplyRequest
• 8441 Provide support for a CodeableConcept for answer to question
• 8444 Test Script should note relationship to other resources
• 8446 typo in narrative for mode = create
• 8449 OperationOutcome.issue.code is either extendable CodeableConcept or not Code - Prefer extendable
• 8450 OperationOutcome.issue.location is unfriendly to JSON based applications only using HTTP Get parameters
• 8452 Add StructureDefinition.invariants
• 8454 Support for multiple authors and sections they've completed
• 8455 Provide support for other roles involved in questionnaire/assessment completion
• 8456 Inconsistent extension element links
• 8457 Add section on IP considerations
• 8466 Allow Communication resource to have Group as a recipient
• 8469 StructureDefinition notes refer to "type" instead of "contextType"
• 8470 Rendering of extensions includes a "Summary" with no content
• 8471 StructureDefinition context needs a clearer definition
• 8473 When StructureDefinition.contextType is 'extension', rules are unclear
• 8474 Condition laterality
• 8479 Remove Observation.value[x] binding
• 8480 Rename QuestionnaireAnswers to QuestionnaireResponse
• 8481 Don't force use of ValueSet for questionnaire question choices
• 8482 Criticality terminology for AllergyIntolerance resource
• 8483 Update element description for ElementDefinition.type.profile
• 8485 published xml extensions missing "-->"
• 8486 DataElement should have stringency as a search criteria
• 8487 Need a system url for mime type
• 8488 The presentation of Goal is not clear
• 8490 Timing documentation is out of date
• 8492 Searching for codes by valueset should use ValueSet.url
• 8494 Qi-Core and CQF are two non-names for QICore
• 8495 HealthcareService missing Identifier search property
• 8497 valueset-c80-doc-classescodes should include four missing C-CDA document-level codes
• 8498 DocumentReference.format belongs inside content
• 8499 DocumentReference: "Document Formats” section is out of date
• 8500 Profile schematron rules do not trigger
• 8501 Document the "system" for Patient.communication.language
• 8502 MedicationAdministration rate changes
• 8504 change DR.requestdetail to DR.request to harmonize with PC resources
• 8505 add choice of ProcedureRequest and ReferralRequest to DR.requestDetail
• 8508 Invariant rules in profiles not populated in schematron files
• 8509 Conformance should have a "kind"
• 8510 Rename NamingSystem.type to NamingSystem.kind
• 8511 NamingSystem.country and .category should become useContext
• 8512 NamingSystem.category should have same binding as Identifier.type
• 8514 change name of element serviceCategory to category
• 8520 Duplicate profile ids overwrite
• 8521 Questionnaire Extension defaultasfixed - clarification
• 8522 The Questionnaire parameter on the $populate operation should permit by reference
• 8535 Search documentation missing anchor for "_security"
• 8539 StructureDefinition invariants needed
• 8540 Primitive types have f:element/f:type/f:code which violates binding
- How interpret StructureDefinition differential?
- Extension example - value[x]
- Request multi-level extension example
- Duplicate search parameter "familymemberhistory-daf-FamilyMemberHistory-condition"
- Complex extensions not showing proper icon
- Create and extension for O.refrange to allow for ...or equal to
- Remove Medication.name from Medication Resource
- Need enableWhen to work for non-answered questions too
- Clean up profile list
- Profile examples not published in IG section.
- Bad link generated in published pages to raw XML of IG-defined valuesets
- Need example valueset on ProcedureRequest.asNeeded[x] and indication elements
- Define MPI search for patient resource
- Erroneous warnings on path being generated by build
- Elements repeating in differential view
- QA: All properties are included in the Summary
- Questionnaire Summary items missing "name" of the Questionnaire
- ElementDefinition.type.code values not in data-type valueset
- Add two codes to provenance-participant-role for assembler and composer
- Profile element comments not displaying in element details
- Typo for comparators in inclusive extension -fix = instead of <= and =>
- AllergyIntolerance.status value set
- Datatype Boolean - explanation required
- Don't require use of data elements for $populate w/ SDC
- Change EPUB link to readable version of FHIR Book
- Clarify description of slicing, not limited to element lists
- validation.zip's dataelements.xml contains duplicate fullUrl and canonical urls
- validation.zip conceptmap.xml contains incorrect canonical url
- Clarify that Subscription.criteria should not have a leading "/"
- Fix missing Provenance HL7 Extension
- Build not expanding Provenance valueset v3 Value Set ProvenanceEventCurrentState
- Some slice members lack f:name
- The schema for Parameter resource is missing.
- Extensions missing in differential view
- Description of string search w/:exact is slightly ambiguous
- Search Parameter Crossmap w/ Data Types Missing All Number Types
- Quantity Search Needs Clarification Regarding Quantities With Comparators
- Quantity Search Needs Clarification Regarding Value Semantics
