FHIR Resource Development Project Insight ID

994

Scope of coverage

The StatusResponse resource indicates the resource for which the processing status is requested and provides simple acknowledgement and status information of application level errors.

RIM scope

New

Resource appropriateness

This is the formal response to a StatusRequest.

Expected implementations

This is a key resource expected by most Healthcare billing implementations where Health care products and services are provided.

Content sources

Existing normative V3 and V2 specifications, Canadian Specifications, X12

Example Scenarios

Resource Relationships

Refers to a StatusRequest, PaymentNotice, FinancialAttachment or Enrollment.

Timelines

Ready for DSTU 2

Issues

It has been suggested that this may be replaced with OperationOutcome, but that will require turning OperationOutcome into a resource and adding a series of elements including: business identifiers, processing status and notes, processing level errors â€“ and these changes may not be acceptable.
