Proposed Resource Name

bodysite BodySite

Owning committee name

Orders and Observations

Contributing or Reviewing Work Groups

• Anatomic Pathology

FHIR Resource Development Project Insight ID

pending

Scope of coverage

see Gforge Comment #3600. Summary harmonize representation of bodysite among existing resources using choice of codeableConcept|reference (BodySite). The BodySite resource will define anatomic location with more discrete elements. New resource: identifier (site), code, with several other concepts.

RIM scope

TBD

Resource appropriateness

meets the following characteristics:

• Represents a well understood, "important" concept in the business of healthcare - see open EHR anatomic location archetype
• Represents a concept expected to be tracked with distinct, reliable, unique ids - yes
• Reasonable for the resource to be independently created, queried and maintained - yes

Expected implementations

TBD

Content sources

open EHR anatomic location archetype and VA has a LEGO that is very close to our BodySite class in QUICK.

Example Scenarios

research studies, monitoring a lesion, oncology, imaging

Resource Relationships

Observation, DiagnosticOrder, Specimen, Condition, Procedure, MedicationAdministration, ( Immunization ), ImagingStudy

Timelines

March 22, 2015

gForge Users

existing editors for OO, PC, Pharm, Imaging
