Proposed Resource Name
bodysite BodySite

Owning committee name
Orders and Observations

Contributing or Reviewing Work Groups
- Anatomic Pathology

FHIR Resource Development Project Insight ID
pending

Scope of coverage
see Gforge Comment #3600. Summary harmonize representation of bodysite among existing resources using choice of codeableConcept|reference (BodySite). The BodySite resource will define anatomic location with more discrete elements. New resource: Identifier (site), code, with several other concepts.

RIM scope
TBD

Resource appropriateness
meets the following characteristics:

- Represents a well understood, "important" concept in the business of healthcare - see open EHR anatomic location archetype
- Represents a concept expected to be tracked with distinct, reliable, unique ids - yes
- Reasonable for the resource to be independently created, queried and maintained - yes

Expected implementations
TBD

Content sources
open EHR anatomic location archetype and VA has a LEGO that is very close to our BodySite class in QUICK.

Example Scenarios
research studies, monitoring a lesion, oncology, imaging

Resource Relationships
Observation, DiagnosticOrder, Specimen, Condition, Procedure, MedicationAdministration, ( Immunization ), ImagingStudy

Timelines
March 22, 2015

gForge Users
existing editors for OO, PC, Pharm, Imaging
