R2-R3 Transformations

This page tracks the status of R2 <-> R3 transformation efforts.

FHIR Mapping Language

The FHIR specification itself includes [FHIR mapping language transforms].

Todo: updates to these can be found ....

Java reference implementation

The Java Reference implementation has the Java Class org.hl7.fhir.convertors.VersionConvertor_10_20 which has conversions for many resource types.

Note: the only actively maintained resource types are the conformance resources - these are maintained and tested for the Implementation Guide publisher. Other resource types are less well supported.
