Mission and Charter

Mission

The Pharmacy Work Group (WG) will assure that the HL7 content concerning medication-related information – e.g. in processes such as prescribing/ordering, dispensing/supplying, and administering/using medication - addresses all of the requirements of stakeholders. The Pharmacy WG will also create and maintain a set of artifacts to support the processes above.

Charter

This WG provides a forum for all stakeholders concerned with clinical content related to medication information. The WG will also work with and provide medication content guidance/recommendations to other WGs. The Pharmacy WG will take into account the experience of groups outside of HL7 e.g. Integrating the Healthcare Enterprise (IHE) Pharmacy and ISO TC215 Work Group 6. Stakeholders include pharmacists, physicians and other clinicians, healthcare technology experts, vendors, regulators, healthcare strategic organizations e.g. Dutch National ICT Institute for Healthcare (Nictiz), Office of the National Coordinator (ONC), Canada Health Infoway, and Australia’s National eHealth Transition Authority (NeHTA).

The Work Group will develop specifications using the principles and language of the Services Aware Interoperability Framework (SAIF) Canonical Definition (CD).

Formal Relationships With Other HL7 Groups

- Clinical Steering Division
- Clinical Statement
- Orders & Observations
- Patient Care
- Public Health and Emergency Response (PHER)
- Regulated Clinical Research Information Management (RCRIM)
- Structured Documents
- FHIR
- Electronic Health Records (EHR)

Formal Relationship With Groups Outside of HL7

The WG will develop relations with appropriate national and standards bodies subject to the approval of the HL7 Board.

The WG has informal relationships with the following groups outside of HL7:

- ISO TC215 Workgroup 6
- IHE Pharmacy
- NCPDP

</table>
- Scott M. Robertson to look at when we added "do not perform" attribute to MedicationRequest

- Melva Peters will talk to Grahame about MAR project he mentioned and also other types of projects that should be considered

- Melva Peters will add MAR to the contexts for the Medication List project

- Jean Duteau question: VA has a concept of an "IV limitation". This can limit either the maximum time or volume for the order
  - max dose, e.g., no more than 1L: dosageInstructionMaxDosePerPeriod with numerator=1 L, denominator=1 ea
  - max time, e.g., no longer than 24 hours: timing.boundsPeriod or timing.boundsDuration

- no publication request (per Jean D skype) ... yet

- Jean will reach out to Lloyd to see about the rules for this type of change - Formulary Project Jean Duteau

- Jean Duteau and Scott M. Robertson will work on reviewing FHIR-V2 mappings

- Melva Peters to forward this to the CDA management group

- Melva Peters to add common UML model to Medication module

- Melva Peters to add high level diagram to Medication module

- Jean will schedule a call to do our analysis

- Jean Duteau will reach out to contacts to see what this attribute should be called

- Tom de Jong to send link to NL profiles to Melva
