DoF 2018-01-24 Weekly Meeting

Participants

John Rhoads, Todd Cooper, Dixon Yu, Stefan Karl, Joe Quinn, Ali, Martin Rosner, Joe Quinn, Sungkee Lee, Ana Kostadinovska, Koi Matsumoto, Michael Faughn, Brian Reinhold, Joerg-Uwe Meyer

NOTE: 28 callers registered in FCC, numerous were anonymous or only had phone number

Proposed Agenda

1. **General Updates: IHE NA PAT 18 recap, FHIR CAT in NOLA, etc**.
   - Todd & John R. provided an overview of the event
   - John R. will be at the NOLA FHIR CAT and will be available to help and collaborate; there will also be close working with Furore for tooling advise
2. **PHD / PoCD ballot comment triage and prioritization**
   - Group reviewed the general ballot results for the PHD and PoCD Implementation Guides
   - Intent is to prioritize and review and (hopefully) resolve in NOLA on Wednesday
3. **NOLA agenda review & time allocation**
   - Group reviewed version 0.5 of the agenda (posted to the DEV WG web site)
   - ACTION(TC) review the OO agenda especially for Q1 Tuesday to see if DEV WG representation should be present
   - NOLA attendees from this call include Ken Fuchs, Paul Schluter, John Rhoads, John Garguilo, Martin Rosner, Asim Muhammad
4. *Deferred to NOLA*: **Harmonization of PoCD & PHD FHIR Resource model** usage (mapping from DIM)
5. **Observation Vital Signs Profile Updates to support early non-aligned reporting** (e.g., from a simple gateway - PHG)
   - Ballot comments were submitted suggesting simple wording changes for the simple use cases where conformance is hard, such as a Personal Health Gateway (PHG)
6. **"MDC11073" Page**

   - *Objective: Provide the best FHIR-conformant approach for integrating 11073 terminology usage*; the topics below are specific topics that need to be addressed
     - These can be discussed and resolved in NOLA ...
   - *How should "provisional" terms be supported in FHIR terminology ecosystem?*
     - For example, terms that do not have a Term Code assigned
     - Where is the representation formalized?
       - Proposal: Include an informational page on this topic in the RTMMS tool
       - Include discussion of synonyms / alias, zombie terms, color coding, etc. etc. etc.
       - TERM PROCESS STATUS indicator should be added
       - NOTE: A ballot comment was submitted for the PoCD IG to this point
     - How can FHIR implementers recognize the difference between final and in-process terms?
       - Can the "term process status" be represented in FHIR terminology coding?
       - How will value sets with mixed status terms be supported?
     - ACTION(Paul S.) Draft discussion slides for NOLA discussion
   - *Discriminators?*
   - *How will Co-Constraints be represented in FHIR constructs?*
   - *RTMMS interface?*
     - Will support a service call to download the set of MDC_ terms that could be updated daily or weekly
     - Question is how to access specific specific sets of terms per process status etc.
   - *Coding System URL (vs. URN)* Ballot Comment
   - *Additional near term page edit updates?*
