Discussion items

Time	Item	Who	Notes
8:00	FHIR Value Set Versioning Usecases	Rob McClure	<div data-bbox="912 596 1414 1096" style="text-align: center;"> Book1.xlsx</div> <ul style="list-style-type: none">• working spreadsheet showing versions and identifiers:
			<ul style="list-style-type: none">• there is a problem that FHIR system might publish a valueset resource with the expansion in the resource or just the expansion. If they are the same canonical identification but the content is not the same this will generate significant problems. Goal to define what to put into the value set resource if both options are available• ValueSet is on the track to normative.• It is important to know that this is the expansion from X definition. If this is not populated then implementers are not able to determine if their expansions are the same. <p>Discussion on how the process operates occurred during this session. Further discussion is needed on this topic.</p>
