2019-03-15 Atlassian Developers Meeting Agenda (3 pm EDT)

Date

15 Mar 2019

Item	Who	Notes
Item	**Who**	**Notes**
Agenda Review	LC	
Roll Call	LC	☑ Wayne Kubick ☑ David Johnson ☑ Lorraine Constable ☐ Tony Julian ☑ Lloyd McKenzie ☑ Ted Klein ☐ Jean Duteau ☐ Ken McCaslin ☑ Josh Procious ☐ Marc Duteau ☐
Announcements / Administration	LC	no call next
Webmaster's Report	DJ	upgraded Confluence
Ballot Project	LM/JD	- Fixed a few items in the import process so that submitters are now automatically watchers - testing likely to begin early April - reach out to Jean to confirm when testing starts
JIRACon Project	LC/JP	- upgrade has improved Search - during upgrade - affected SQL macro for ballot desktop - JRE 7/8 are having trouble with SQL 2005 - DJ has been moving to an AWS instance using SQL Server Express. Two copies running - web server still using production version running on KANT, make data available as soon as possible for confluence - reached out to other pilot participants, no responses yet - a couple issues from ArB testing to resolve

UTG Project	TK	- focused on work with the new Apelon project manager - found items that need to be worked on for the harmonization proposal changes - outstanding from SAT - work on stakeholder pool definition and communication. Expect to get back to it once March harmonization release out the door - Riki is still documenting workflow and reporting issues she finds on Windows. Sheila working on Mac. Using IE, Firefox, and Safari. Suggest testing in Edge - Grahame's software has two different modules for Windows and Mac, so need to to test in parallel. So far Jira material behaviour has been consistent - Biggest issue is installed locally running software - ongoing configuration and install challenge - will need Josh's time next week to work on pool configuration, etc.
Other projects	WK/JP	invite Marc to next call to update on Co-chairs handbook
Adjournment		next call in two weeks
