

2020-04-15 Meeting Agenda

Chair: @Bryn Rhodes

Scribe: @Howard Strasberg

NOTE: This attendance applies if you are present at the related meeting/call, regardless if you have signed a different attendance for your WG.

Attendees

Present	Name	Affiliation
	Abdullah Rafiqi	
	Robert Dieterle	
	Brian S. Alper	
	Dennis Patterson	
	Gayathri Jayawardena	
	Isaac Vetter	
	Jennifer Seeman	
	Joe Bormel	
	Khalid Shahin	
	Matt Burton	
	Paul Seville	
	Peter Muir	
	Phillip	
	Ricardo Quintano	
	Rob McClure	
	Robert Samples	
	Robert Jenders	
	Thomson Kuhn	
	Tom Reese	
	Yanyan Hu	
	K M Toussaint	
	Bryn Rhodes	
	Howard Strasberg	
	Guilherme D. Fiol	
	Floyd Eisenberg	

Minutes Approved as Presented

Agenda Topics

Agenda Outline	Agenda Item	Meeting Minutes from Discussion	Decision Link(if not child)
Management	Minutes Approval		
Methodology	Continued Virtual WGM Discussion 2020-05 San Antonio WGM Rob McClure - WGM is cancelled.		
	EBM-on-FHIR Tracker:  FHIR-26652 - EvidenceVariable minor changes in definitionReference and definitionCanonical APPLIED <ul style="list-style-type: none"> reference either a Group or an EvidenceVariable resource, rather than reference Any Motion to approve proposed disposition: Brian Alper/Khalid Shahin. Approved 21/0/1. 		
	CPG-on-FHIR Tracker Items Review proposed block vote content, will vote on 4/22 <p>Key Summary T Created Updated Due Assignee Reporter P Status Resolution</p> <hr/> <p>No issues found</p> <p>project = FHIR AND Specification = "Clinical Guidelines (FHIR) [FHIR-cpg]" AND status = Triaged AND Grouping = Block-Vote-3 ORDER BY priority DESC, updated DESC</p> <ul style="list-style-type: none"> If anyone would like to remove any items from the block vote, please let Bryn know. 		
	FHIR Tracker Items Review proposed block vote content, will vote on 4/22 <p>Key Summary T Created Updated Due Assignee Reporter P Status Resolution</p> <hr/> <p>No issues found</p> <p>project = FHIR AND Specification = "FHIR Core (FHIR) [FHIR-core]" AND "Work Group" = "Clinical Decision Support [cds]" AND Status = "triaged" AND Grouping = "Block-Vote-1" ORDER BY priority DESC, updated DESC</p> <ul style="list-style-type: none"> If anyone would like to remove any items from the block vote, please let Bryn know. 		
Announcements	Connectathon Registration Open: https://www.hl7.org/events/fhir/connectathon/2020/05/ May 13-15, details still be finalized Connectathon has nominal registration fee. If participating, please indicate your time zone. Call for participants in: <ul style="list-style-type: none"> Clinical Reasoning Track - Orientation on 4/28 on CQI call CDS Hooks Track EBM-on-FHIR Track (for this time, called Covid-19 Knowledge Accelerator and EBM track) <ul style="list-style-type: none"> Brian - also creating a Citation resource and an EvidenceCoordinator resource Bryn - are you looking at relatedArtifact data structure? Brian - yes. Gaps-in-Care Track SANER Track 		

CDS Hooks Patient View Ballot Reconciliation			
<p>FHIR-25764 - What about PractitionerRole? RESOLVED - CHANGE REQUIRED</p> <ul style="list-style-type: none"> Isaac - handful of comments about how the current user is represented in the CDS hooks request. There's an element in context called userid - for example userid: Practitioner/123. Enables CDS service to construct prefetch queries. Prefetch queries are probably important for determining the user's role. Limits ability for a service to construct prefetch FHIR searches. Relates to _id search parameter. This problem has been exacerbated with the creation of the PractitionerRole resource. If it's a clinician, we probably need both the Practitioner and the PractitionerRole resource. See cdshooks github issue 520. However, there are production implementations with the current approach. <ul style="list-style-type: none"> Proposal is to define four prefetch variables that are replaced by information from the user's context in the EHR. Still backwards compatible. Bryn - how would clients know which ones to provide? Isaac - how does the CDS service know to specify in its prefetch template userPractitionerId versus userPractitionerRoleId? A CDS service would want to do both. Rob M. - how about an example? Bryn showed a query that would be wrong if the user were a patient. In the CDS hooks context, the client is the EHR. Rob M. - doesn't look like that many fields. Isaac - duplicates what's in userid. There was some discussion about alternative search formats: <pre> Untitled - Notepad File Edit Format View Help practitioner?_id={{context.userId:resourceId}} practitioner?_id={{userPractitionerId}} </pre> <ul style="list-style-type: none"> Isaac - minimum viable solution is to provide the raw Id. Solicit additional implementer feedback. <p>FHIR-25767 - Clarify userId input pattern RESOLVED - CHANGE REQUIRED</p> <ul style="list-style-type: none"> Not discussed on today's call.
