

FHIR Starter tutorial

Pagina compleet:

Introduction:

Beginning with FHIR is not an open and shut case, it's a rather complicated set of instructions and tooling. It's quite easy to get lost in the forest of FHIR and still not see the trees. In this tutorial we will explore the steps to be taken, the locations to be visited and tools to be used in order to start working with FHIR. The tutorial is intended to be visited by absolute beginners,

Track description

In this track we will take you step by step through the process, apps, environments and what have you, to start with FHIR. We go through a infographic where three different types of roles can be recognized: the designer, the implementer and the interested individual. We will take you to places and we will show you the tools and what they are for. We are not going to implement FHIR, or develop FHIR. We just give you the (mind)map.

Expected level of skill

Sommige tracks kunnen worden gesplitst in level "absolute beginners" en een level "heroes". Beschrijf per niveau welke skills verwacht worden en hoe via tutorials en/of instructies het gewenste level bereikt kan worden,

level	description
Absolute beginners	Just know what FHIR means and where it is intended for
Heroes	

Preparation

Geef aan welke voorbereidingen op gebied van lezen, downloaden en/of andere zaken gedaan moeten worden

Prep	level	Content
------	-------	---------

Documentation		<ul style="list-style-type: none"> • Mindmap FHIR Starter
Downloads		<ul style="list-style-type: none"> • None
Equipment		<ul style="list-style-type: none"> • None

Status Track

Geef aan waar de track zich bevindt, is het een nieuwe track, gaan we door op de vorige hackathon , zijn er onderdelen op verschillende levels, enz. Werk dit verder uit in de scenarios

Status	level	Description
New	Absolute beginners
	Heroes	N/A
Sequal	Absolute beginners	N/A
	Heroes	

Submitting WG / Project / Implementer Group
