Questions

Has the MCC project connected with the patient portal work ?

The MCC does plan to have a patient facing app right now the focus is the clinician facing app. Studies have shown that patients find a mobile app more helpful. But engaging the patient portal group may be helpful

Are there invites for these meetings?

The PCWG meeting does not have invites you have to manually add it to your calendar. It is weekly at 5 PM eastern. The MCC project meets on this call bi weekly. The next meeting will be July 8th.
