

COVID-19 FHIR IG - Who can help create an HL7 example library, profiles and templates?

Are any of you aware of any FHIR IG development related to COVID-19? Logica is willing to create an IG and want to make sure that we are not replicating efforts. Profiles we are thinking to include are:

1. Labs
2. Signs and Symptoms
3. Pertinent Demographics

We could have the FHIR profiles created quickly if that's something we can do. If you want to be involved in the development, reply here and indicate how you would like to be involved. Thanks...Susan
