

2019-06-24 DoF PoCD Subgroup

Agenda

1. Possible post-HL7 September Atlanta Working Group Meeting Thursday-Friday Devices on FHIR informal hackathon
2. Device activity at regular Saturday-Sunday FHIR Connectathon at September WGM
3. PoCD Implementation Guide to-dos (from Stefan Karl e-mail)
4. Alert Resource Design
5. Other business if any

Attendance

Bjorn Andersen, Todd Cooper, Stefan Karl, Joe Quinn, Michael Faughn, John Rhoads (notes)

Discussion Notes

- Possible post-HL7 September Atlanta Working Group Meeting Thursday-Friday Devices on FHIR informal hackathon

- Bjorn - Saturday-Sunday attendance a problem for European participants, so Thursday-Friday more practical
- Main activity would be SDC-related tests and demonstration plans, including plans for IHE / HIMSS show participation

Device activity at regular Saturday-Sunday FHIR Connectathon at September WGM

- Likely attendees: John Rhoads, Todd Cooper. Stefan Karl unlikely to be able to participate other than on web meeting
- Desired activities would be to work with receiving system participants on explaining and demonstrating PoCD Implementation

PoCD Implementation Guide to-dos (from Stefan Karl e-mail)

- See [FHIR Point-of-Care Device working page](#) for to-do items starting from Stefan Karl's e-mail

Alert Resource Design

- Rhoads showed rough artifacts created in Firely Forge R4 tool based on earlier meeting discussions of this group for fields and definitions. He recommended that others with Windows machines available (no Mac version) download the Forge tool, which is free, for visualizing and commenting on the in-progress definitions.

Other business if any
