

The Gravity Project

Consensus-driven standards on social determinants of health

Announcements

Consensus Voting is now open for the Housing Instability and Homelessness Master List. [Click here](#) to submit your vote.

- Consensus voting has been extended to **Saturday, October 3rd**. See consensus votes received to-date [here](#).
- 1. Join us for our next community meeting on Thursday, October 1st, from 4:00 - 5:30 pm ET (1:00 - 2:30 pm PT).
 - a. The web meeting URL and dial-in information are available [here](#).
- 2. **Food Insecurity Coding Submissions**
 - a. The Gravity Project completed submissions for new food insecurity codes to LOINC, ICD-10, and SNOMED-CT based on the coding gaps identified in the [final food insecurity master list](#). [View the latest coding submissions here](#).
- 3. **ONC USCDI Submissions**
 - a. The Gravity Project invites the Gravity Community to submit the Gravity identified LOINC codes and proposed SNOMED CT and ICD-10 codes to the [ONC New Data Element and Class \(ONDEC\)](#) submission system [here](#).
 - b. The Gravity Project team is drafting a formal letter on behalf of the Gravity Project. If you want to be added to this letter, please send your interest to: gravityproject@emiadvisors.net.
- 4. **ACL CHALLENGE GRANT IS NOW ACCEPTING APPLICATIONS**
 - a. Registration for Phase 1 (i.e. the letter of intent) is due December 14, 2020. View the ACL Challenge Grant posting [here](#).
 - b. To learn more about the grant requirements, refer to the July 28th webinar [here](#).
- 5. **NEW HHS SDOH COVID-19 COLLABORATION SITE**
 - a. The Department of Health and Human Services (HHS) has announced a new website that will be

COVID-19 and SDOH

We have stood up a public collaboration space where everyone can share ideas and resources around COVID-19 and SDOH efforts. Please visit and contribute to the new [Gravity Project SDOH COVID-19 Response page](#), where you'll find a blog and other resources. Anyone can view the blog, but a Confluence login is required for those who wish to post blog content. [Click here](#) for instructions on how to request a Confluence login. Email webmaster@hl7.org for login and technical support.

Gravity Events and Newsletter

- Visit the [Gravity Project Events Page](#) to keep track of the latest events and news items for the Gravity Project.

Gravity Social Media

The Gravity Project is now official on social media! We invite you to follow us on [LinkedIn](#) and [Twitter](#). We will be using the social media platforms for relevant project and SDOH data integration related communications. Help us spread the word!

Gravity Project Sponsors

We are grateful for the all the contributions of our Gravity Community. We can no do this without you. Click the button below to view our current sponsors and inquire about your organization becoming a Gravity Project sponsor.

Gravity Project Sponsors

Join the Gravity Project! The success of the Gravity Project depends on the contribution of volunteers who are eager to make rapid progress on the standardization of social determinants of health data. We need experts to contribute to and validate definitions for SDH related data elements and value sets. Participants are asked to [join the project](#) at any time either as a **Committed Member** or **Other Interested Party** as part of the [HL7 Consensus Process](#). To join the project, [sign up here](#).

- To check your project membership status, [click here](#). If you wish to change your membership from Other Interested Party to Committed Member, please send an email request to GravityProject@emiadvisors.net.
- NOTE: Both member types can submit comments on project documentation. However, **only Committed Members may vote on final documentation**. If you would like to have voting rights, please change your membership status or [join the project](#) as a Committed Member.

Overview

The [Social Interventions Research and Evaluation Network \(SIREN\)](#), with funding from the Robert Wood Johnson Foundation and in partnership with EMI Advisors, LLC, is pleased to invite you to join the Gravity Project. Driven by the growing interest in capturing social risk and protective factor data in health care settings, the Gravity Project brings industry leaders together to identify and harmonize social risk and protective factor data for interoperable electronic health information exchange. The Gravity Project will convene a public collaborative process in 2019 and 2020 to accomplish the following goals for the social domains of food security, housing stability and quality, and transportation access:

- Develop use cases to support documentation of specific social domains across screening, diagnosis, goal setting, and intervention activities within EHR and related systems;
- Identify common data elements and their associated value sets to support the use cases;
- Develop a consensus-based set of recommendations on how best to capture and group these data elements for interoperable electronic exchange and aggregation; and
- Initiate development of an HL7® Fast Health Interoperability Resource (FHIR®) Implementation Guide based on the defined use cases and associated data sets that will be finalized in the next phase of work.

Project objectives will be accomplished through bi-weekly one-hour virtual meetings and collaborative project product development through the HL7 project confluence page.

Upcoming Gravity Project Meeting

Date	Time	Topic	Webinar Information	Homework Documents & Links
01 Oct. 2020	4:00-5:30pm ET / 1:00-2:30pm PT	<p><i>Housing Phase II Review: End-to-End Review of Inadequate Housing</i></p> <p><i>Transportation Phase I: Transportation Concepts</i></p>	<p>Please log on before dialing in and enter the provided participant ID.</p> <p>URL: https://emiadvisors.webex.com/emiadvisors/j.php?MTID=m9ec3c58b6940b23e068ac88e8a46c4ca</p> <p>Dial-In: (415)655-0003</p> <p>Meeting ID: 738 112 808</p> <p>Password (for app users): gravity</p>	<p>Submit: Housing Instability and Homelessness Consensus Votes</p> <p>Review and submit comments: Inadequate Housing Master List</p> <p>Submit: Transportation concepts</p>

Gravity Project Governance

The Gravity Project has transitioned to a more robust governance structure to facilitate and accommodate the project's growth and success.

- [Executive Committee \(EC\)](#): Provides executive leadership for the project.
- [Strategic Advisory Committee \(SAC\)](#): Provides key strategic advice and ensures the project is informed by key stakeholders and constituencies.
- [Technical Advisory Committee \(TAC\)](#): Provides technical advice on details of project deliverables.

Comment(s)

Thank you for leading this important work. I wonder about the "out of scope" disclaimer about not getting into the actual social needs screening instruments and items. The question is can you standardize the answers without standardizing the questions? Anyway, that is the topic I'm most interested in and am actively engaged in with Epic, and would be happy to participate/contribute as appropriate.

Greetings! Great start on the work related SDOH that is on the Confluence page. The following should be considered to be added:

Medicaid Information Technology Architecture (MITA)
<https://www.medicaid.gov/medicaid/data-and-systems/mita/mita-30/index.html>

Homeless Management Information System (HMIS)
<https://www.hudexchange.info/resource/3824/hmis-data-dictionary/>

Open Referral - I can introduce you to their Executive Director Greg Bloom
<https://openreferral.org/>

Among the uses for standardized SDOH data, regulatory reporting was not mentioned. Obviously there are limited regulatory reporting requirements (in part due to the limited standardization of data). It could be beneficial to develop the standard in a way that makes the data easy to be consumed by future regulators with minimal/zero click reporting involvement by provider staff. We can take inspiration from the approach to the XBRL data standard used by Australia and the Netherlands to automate corporate reporting.

<https://www.xbrl.org/the-standard/how/getting-started-for-regulators/>

Hope this helps!
 Matt

Excited to be a part of the collaborative! From a community mobilization and engagement perspective, the materials offered on The Gravity Project Website (charter, glossary and standards/initiatives) provide a clear grounding of the project for members, define the parameters of the project and set the stage for next steps. In addition to the use cases described in step 1 of the Scope Statement, it would be helpful to keep the six uses described the NAM 2014 Phase 2 report in mind to ensure that the data will meet multiple cases. Institute of Medicine (2014) Capturing Social and Behavioral Domains and Measures in Electronic Health Records: Phase 2. National Academies Press, Washington DC.

About 1,095 SDH codes have been highlighted via the SIREN Social Risk Codes review (relating to 20 social risk domains). This is a very comprehensive amount, but may be somewhat confusing. It will be interesting to see how we will narrow down such a vast amount of codes. Will we focus on ICD-10, LOINC, SNOMED, and CPT all together, or start with just one of these code types initially?

I recommend adding the Homeless Management Information System (HMIS) to the "Relevant Work in Social Determinants of Health" resource page.
<https://www.hudexchange.info/programs/hmis/>

Think that it is helpful to keep in mind HUD's definitions of homelessness and housing instability when developing SDoH housing instability data element definitions
<https://www.hudexchange.info/trainings/courses/recording-and-documenting-homeless-status/>

Minor comment on charter - in the first paragraph of 5.2.19 V 1.4 of charter - I think you mean National Quality FORUM (not National Quality Framework) ADMIN NOTE: Updated in Charter v1.5

suggested additions to list of materials -

(1) Another standard SDH code set is contained in the International Classification of Primary Care, 2nd edition, in its Chapter Z. ICPC-2 is the primary medical care coding and classification standard for several countries, is mapped to ICD-10 (11), and to a defined subset of SNOMED CT, the SNOMED GP-FP Reference Set.

(2) Can add to list of vendors with SDH capabilities RiverStar Software, which offers a Community Care Hub product that combines SDH screening with community service agency referral support and tracking. Can see at: <https://www.riverstar.com/community-care/>

Relative Standards and Initiatives -

HL7 CDA® R2 Implementation Guide: C-CDA R2.1 Supplemental Templates for Nutrition, Release 1

This Implementation Guide is clinical inpatient oriented however the care plan component is worth evaluating as a pattern and part of a use case where at risk patient needs.
