

2020-08-14

Date

August 14th, 2020

Time

12:30pm - 1:15pm

Attendees

ACS CAN Kelly Durden, Devon Adams

MITRE Caroline Potteiger, Salim Semy, Zach Lister, Michelle Casagni

Cancer Insights Tarun Kumar, Shilpa Mahatma, Sharon Alford

[BreastCancerTrials.org](https://www.breastcancertrials.org) Elly Cohen

TrialScope

Action items

- All take a look at the Trial Matching contact list and let Caroline know of any missing organizations.
- All please create a Confluence account and let Caroline know when you do. Here is the link - <https://jira.hl7.org/secure/CreateInfoIssue.jspx?pid=11200&issuetype=11300>
- All brainstorm ways to recruit patients for the Phase 1A study.
- Salim send Elly IRB study proposal.

Discussion notes in blue. Decisions in green. Action items in red.

Planned Agenda Topics

- **<Hold for hot topics from project team>**
- **Update on ACS CAN membership?**
 - No updates.
- **Engagement Update**
 - UCSF Elly meeting with Adam and Leslie August 17th.
 - UTSW met with UTSW on Wednesday and will be following up next week.
 - Massive Bio Seline will be looking into what's needed to send over patient data for the minimal eligibility criteria.
 - Trialjectory will be discussing their timeline for working on a project like this and will get back to us.
 - Flatiron will be discussing internally what's needed to send over patient data.
 - NCI meeting on August 17th.
 - Other updates?
- **Public Call**
 - Caroline created a list of all the orgs we've talked to about this project so we can send out a personalized email to them.
 - Any additions to the list?
- **Confluence**
 - If you haven't already, please use this link to create a Confluence account - <https://jira.hl7.org/secure/CreateInfoIssue.jspx?pid=11200&issuetype=11300>
 - Caroline will then grant permission to your accounts to access the private page.
- **Phase 1A Planning (continued)**
 - Please use this link to see project planning - [Trial Matching - 1A Tasks](#)
 - Notes were taken on the [Trial Matching - 1A Tasks](#) page.
 - One of the goals for Phase 1A is to create a working version of this project so when health systems and other organizations would like to join, there is a low barrier of entry.
 - Could potentially list this study on [BreastCancerTrials.org](https://www.breastcancertrials.org).
 - We should include all types of trials in Phase 1A. This could be interventional for treatment and/or symptoms, interventional for quality of life, or observational.
 - With the current demo, trial type is designated by clinicaltrials.gov.
 - The type of patient who would join this phase of the study is probably a patient who is highly motivated to find a clinical trial.
 - There are many myths that cause patients to not join clinical trials.
