Wed 4:00-5:00 PM	Multi-stakeholder FHIR Initiatives Accelerate Adoption: Advancing Data Interoperability	Join us to learn how HL7 Fast Healthcare Interoperability Resources (FHIR®) standards development is expanding to improve access to clinical and claim related data for all trading partners and in healthcare. The payer community is leading efforts to use FHIR to solve access, security and identity issues to maximize interoperability across the industry. Several multi-stakeholder initiatives formed to accelerate how FHIR can best be used to unlock data and make it readily available at the point of care to improve outcomes and remove time burdens for stakeholders. Two initiatives leveraging HL7 FHIR transports are, ONC FAST (FHIR AT SALE TASKFORCE) and the HL7 Da Vinci Project. Through this, consensus-based effort, these initiatives are creating essential use cases, guidelines, and implementation guides with the goal of removing barriers to FHIR scalability. This panel will discuss key components considered and being addressed, learnings, solutions/tools developed, how these initiatives coordinate, next steps and ways organizations and individuals can engage to help transform health data exchange.	Moderator: Didi Davis VP, Informatics, Conformance & Interoperability The Sequoia Project Panelists: Paul Oates, FHIMSS (Da Vinci & FAST) Senior Enterprise Architect, Cigna Rich Cullen (Da Vinci) Vice President, Inter-Plan Solutions, Blue Cross Blue Shield Association Nancy Beavin (Da Vinci) Director, Product Delivery Humana	Please register for Multi-stakeholder FHIR Initiatives Accelerate Adoption: Advancing Data Interoperability on Mar 18, 2020 4:00 PM EDT at: https://attendee.gotowebinar.com/register/1262984123506635789 After registering, you will receive a confirmation email containing information about joining the webinar.
