Laurie commented that Structured Docs did not bring up the issue regarding Attachment Control Number during the Thursday meeting. Discussion followed about the use of OID as it applies to ACN. Currently, a general OID is used with Null flavor. Russ commented that it should be a globally unique identifier, but there is no structure in base CDA framework to put it in. Laurie stated that the use of Null flavor is discussed in the ACP guide in section 3.4.1. Mary Lynn stated that they are live with attachments and there is no need to get an ACN from CDA because it is in the 275 envelope.
