- [FHIR-28532](#) - Define a Code System to discriminate the slicing in the item.adjudication adjudication fields
 - Proposed Disposition
 - Define Code System:

Defining URL:	http://hl7.org/fhir/us/caribb/C4BBAdjudicationDiscriminator
Name:	C4BBAdjudicationDiscriminator
Title:	C4BB Adjudication Discriminator
Definition:	Used as the discriminator for the data elements in adjudication and item.adjudication
Copyright:	This Code System is not copyrighted.
Content:	

Code	Display	Definition
allowed units	allowed units	defines the adjudication slice to defined allowed units
in or out network	in or out network	defines the adjudication and item slice to indicate whether a claim was adjudicated in or out of network
denial reason	denial reason	defines the adjudication slice to identify denial reason

A value set is not required to constrain the value of adjudication.category and item.adjudication in the abstract profile as it unnecessarily would over constrain its use

- Remaining tickets

- 8 tickets remain to be reviewed and we will look to have these ready for review next
