6. [STU Comment](#) Resolutions until 11:00am EST

- a. 1946? - don't want to take that one up. That needs more discussion
 - i. This is language codes and it uses ISO-3166-1 which gets into country-region coding and gets complicated.
- b. 1945 - Encounter Diagnosis from [Brett Marquard](#)
 - i. [Brett Marquard](#) - a few weeks back [Didi Davis](#) Rimm rules and CDA schematron and historical guidance. Time box to 15 minutes.
 - ii. <https://gazelle.ihe.net/cda/cda-basic-req.pdf>

Language approved on SDWG (Brett/Calvin – 13-0-1):

1. The CDA R2 Schema establishes a base set of requirements for CDA implementation.

C-CDA R2.1 implementations must conform to the CDA Schema, and the requirements included in the C-CDA R2.1 publication.

--> The CDA Schema is a serialization of the CDA hierarchical definition (HD). The HD is flat list of CDA elements/data types/cardinality/value sets/etc. embedded in the CDA R2 standard. When systems object to the serialization of the schema, the HD is the authoritative source.

--> The interpretations supplied in the PDF (HL7 CDA R2 Basic Requirements) were not submitted to a formal community vetting process. If validators wish to implement these rules we recommend they be balloted through a formal HL7/IHE/standards review process. Some of the rules have been superseded by HL7 M&M guidance and RIM errata.

11:00AM EST

1. Discuss Deprecation - deprecating C-CDA R2.1 UDI Supplemental Template – or somehow “pulling it” from the set of published IGs that are reported as the “active” supplements to C-CDA R2.1.
 - a. This is a flawed IG. It is published and is an STU.
 - b. There are three options:
 - i. The workgroup can request to withdraw it.
 1. We can request a draft for comment ballot for should this be withdrawn.
 - ii. The second option is to update it and correct the deficiency.
 - iii. The third option is to just let it expire in November and remove it from the page.
 - c. Suggestion is to reach out to the proponents of the IG and let them decide. [Lisa R. Nelson](#) has already reached out, but has gotten no response. We will let it expire. At that point, it is a much simpler process. We then fill out a form to withdraw it.
2. VSAC Value Set 2020 Updates: ([Rob McClure](#) (second hour))
 - a. One ValueSets that was referenced that is source of truth someplace else. The ODH supplement, there are 6 ValueSets referencing FinVads that are made up. Going to do the same thing. They will not be referenced to VSAC. Instead you will go here. They are in the supplement. Rob went through and found all of them.
 - i. NCHS was already there.
 - ii. There are a total of 6. Some of them are ODH. Some of them are FHIR ValueSets
 - iii. Employment Status, Industry CDC Census 2010, Job Supervisory Level or Pay Grade (ODH), PHVS_Occupation_CDC_Census2010, Work Classification, Work Schedule
 - b. Substance Reactant for Intolerance
 - i. a grouping of other value sets
 - ii. 2.16.840.1.113762.1.4.1010.1 - RXNORM - Grouping ValueSet
 1. Recommendation is to move to SNOMED CT for Drug class
 2. There was some concern express brought up about this and the relation to the Data Blocking Final Rule. We believe that SNOMED CT may still be the best course.

a. 1768 follow-up

i. From

[Lisa R. Nelson](#)

- "For the Disposition Comment #1768 Add another STU Comment to consider changing C-CDA R2.1 templates to explicitly disallow use of @nullFlavor where this value set is used if UNK were to be added to the value set. Add FHIR Issue to change value set binding of RelatedPerson.relationship (<http://hl7.org/fhir/R4/relatedperson-definitions.html#RelatedPerson.relationship>) to our new value set and remove binding to FHIR value set <http://hl7.org/fhir/R4/valueset-relatedperson-relationship.html>. There is a problem with adding ECON and NOK from RoleCode to the value set. These concepts are class codes, not role codes, so it would not be appropriate to add them into a value set used for role codes. The other V2 codes are not proper for this use. 2020-04-16 - Austin is going to talk with Ted about this issue to see what options we have to resolve/address this issue."

ii. [Lisa R. Nelson](#) was asking Austin about updating 1768 with the language above. Additional work needs to be done to 1768, but it was moved to Category 2 because of the complexity.

b. PSS for [1954,1955,1956](#)

Discussion	<p>Calvin E. Beebe We make a motion as a committee, but then it only moves forward as a project.</p> <p>Brett Marquard We have a precedent of releasing a spreadsheet that doesn't seem great.</p> <p>Austin Kreisler Let's table the motion</p> <p>Calvin E. Beebe wanted the co-chairs to get together to figure out how we do it.</p> <p>Rob McClure what group pushed to get this work done. ONC pushed for this to be done for the fall.</p>
Action	Tabled

Companion Guide - [Emma Jones](#) entered a comment for appendix B UDI template, and she entered a second one and wanted to know if those would be reviewed by this group.

- ii. We can put that on the agenda for next week.
3. Adjournment
- a. Meeting adjourned 11:48 am EST
