

Gravity Data Principles

We are seeking input from the Gravity Community

Question: Is there anything missing? Is there anything that needs to be removed? Is there anything that needs to be edited?

Please review the below example of an organization's data principles and share your thoughts with us. Email gravityproject@emiadvisors.net with your input. We appreciate your insight!

Gravity Project Draft Data Principles Overview

Based on recommendations we have received from the Gravity Project community to-date, we have drafted a set of data use principles for Data Exchange for Equitable Health and Social Care. [Click here to download the draft Principles of Data Exchange for Equitable Health and Social Care Document.](#) The following are the overarching concepts included in this document:

- Improving Personal Health Outcomes
- Improving Population Health Equity
- Ensuring Personal Control
- Designing Appropriate Solutions
- Ensuring Accountability
- Preventing, Reducing, and Remediating Harm
