Key Upcoming Dates:

- 2020-11 FHIR DevDays Conference Amsterdam
- 2021-01 HL7 WGM Henderson Nevada (virtual)

Agenda:

1. Social interaction: Each participant to share a positive moment/thought in these concerning times
2. Review Action Items
3. Tracker Items

Tracker Items:

[FHIR-28588](#) - Treat careteam as a first class citizen **RESOLVED - CHANGE REQUIRED** The ability to plan for someone from the care team to be included, and the type of role that will be required is defined in the type property of participant. The specialty of the appointment is relative to the patient for the entire service, and not specifically for the participant.

The CareTeam can be a multi-disciplinary team, and we are expecting a member from it to perform the role defined in the type property.

This selector is not for the entire careteam, its for an individual member.

The specialty of the appointment is not necessarily the specialty of the participant (Irma may choose to raise a tracker to clarify this)

Persuasive Brian Postlethwaite/Cooper Thompson: 4-0-0

[FHIR-25728](#) - Identifiers Across Hospital Systems **WAITING FOR INPUT** How to handle identifiers to cross reference information in common ways, should this be in the specification as a general case, should it also document common ways they are used, and potentially how they might be used in systems like EMPs.

If documentation was added, it could go into patient, or more generally on the administration page.

Currently there is a section on person that hints towards this space
[Person - FHIR v4.0.1 \(hl7.org\)](#) and [Person - FHIR v4.0.1 \(hl7.org\)](#)

Will be picked up on our call next week!

In the mean time we will look into what's documented in v2 and v3.
