Attendees

Name	Organization
John Hatem (Chair)	
Melva Peters	
Freida Hall	Quest Diagnostics
Francois Macary	
Margaret Weiker	
Frank McKinney	POCP
Tim McNeil	Surescripts
Tyler Scheid	AMA
Maggie Buchinger	Surescripts
Danielle Bancroft	FRED IT
Bapi Behera	
Steve Saillard	Epic
Daniel Zhang	Epic
Heather McComas	AMA
Jean Duteau	Duteau Design
Peter Muir	
Scott Robertson	Kaiser Permanente

Agenda Items and Notes

- [Catalogue Project](#)
- [Updates from Workflow](#)
- [Healthcare Product](#)
- [NCPDP Updates](#)
- [V2-FHIR Mapping](#)
- [Projects](#)
- [FHIR](#)
- [AOB](#)
- [Next meeting](#)
- [Action Items](#)

Catalogue Project

- Implementation Guide being developed - structure in FHIR to build formularies
 - a lot of work has been done for laboratory use cases
 - want to add in pharmacy content
- Francois provided the following background
 - Order-Catalog FHIR IG
 - single FHIR IG for order catalogs of any kinds of health artifacts - services, products, knowledge
 - Project Insight 1010
 - FHIR IG Proposal: <https://confluence.hl7.org/display/FHIR/Order+Catalog+FHIR+IG+Proposal> - has been approved by FMG
 - Current build of IG: <http://build.fhir.org/ig/HL7/fhir-order-catalog/branches/master/index.html>
 - List Serve: ordercatalog@lists.hl7.org
 - 4 kinds of content envisioned so far
 - plan to ballot next August - may just be lab content
 - Using Composition - either full composition with entries that reference the items or just the header
 - Medication content is
 - profile on MedicationKnowledge
 - Asking Pharmacy WG:
 - when to start working on medication content?
 - who might be interested?
 - PHAST wants to distribute its drug metathesaurus for the French market (recipients are French hospitals, but also working with vendors of EHR and pharmacy systems) using the order-catalog FHIR IG
 - motivated to work directly on the current build rather than R4
 - will trigger some trackers on MedicationKnowledge (one already approved)
 - provides coded vocabularies to enable e-prescription and e-dispense in hospitals - focusing on clinical informations - includes branded medications as well as generic medications (virtual)
 - Other stakeholders?
 - da Vinci project - probably focused on consumers
 - RTPBC -
 - NCPDP Formulary and Benefits Standard
 - Pharmacy should own the use cases for the medication related content
 - could consider creating our own project for Pharmacy to work on this
 - need to check requirements from existing projects - to define requirements
 - define boundaries and scopes -
 - Should separate out medication related from current IG - included use cases only for the August ballot
 - remainder of content will go into next release
 - [20200323_Pharmacy_WG_catalogs.pptx](#)

Updates from Workflow

- dealing with product mappings to FHIR - documentation into FHIR space
- May produce some examples

Healthcare Product

- no updates

NCPDP Updates

- Specialty Medication Prescribing PSS update - [Specialty Medications](#)
 - approved by HL7
 - have started with outline in FHIR IG
 - concurrently working on introduction text
 - need to get FHIR IG Proposal approved
- Standardized Medication List - [Standardized Medication Profile](#)
 - just started to meet

V2-FHIR Mapping

- Scott and Jean are working on pharmacy aspects, as time permits.
- John is looking at mapping for blood information
- Anyone can view and comment on the 2-to-FHIR mapping work.
 - The work that is complete and "ready to publish" is available at <https://build.fhir.org/ig/HL7/v2-to-fhir/>
 - each page has a comment section at the bottom of the page.
 - The development work is Google sheets. These are ported to Github for the FHIR build process
 - [Mapping Worksheets](#) is the "master index" of the mapping spreadsheets.
 - tabs for [Data Types](#), [Segments/Fields](#), [Messages](#), [v2 Sample Messages](#), [Code System Mapping](#), [Profiles](#), and [Tasks](#).
 - Each tab is a list of the mapping sheets, with status and link to each mapping sheet.
 - when in a mapping sheet, right-click on a cell and select Make a Comment
 - your comment will be from "anonymous" unless you have a Google account.
- anyone interested in helping with the mapping - please checkout [2-To-FHIR Project](#) (the project confluence page), in particular:
 - **ListServ:** v2-to-fhir@lists.hl7.org
 - **Zulip:** <https://chat.fhir.org/#narrow/stream/179188-v2-to-20FHIR>
 - **Conference Call Schedule:** <http://www.hl7.org/concalls/Default.aspx?ref=nav>.

- Every week, Monday 1 - 2 PM ET AND Tuesday 11 AM - 12 PM ET

Projects

- Real Time Pharmacy Benefit Check -
 - for 3/23/2020 ballot comment resolution - these items have been reviewed on ballot reconciliation call
 - Motion to approve the disposition for items in Block Vote 1 - Scott - Frank - 15-0-0
 - Frank will send out next block vote for next week

18 issues

- Medication List Guidance
 - Confluence Pages: [Patient Medication List Guidance](#)
 - Melva reviewed the context page
 - will be starting to put some words around the content
 - Danielle will help with content
 - Melva to start FHIR IG Proposal
 - Universal need for doing e-prescribing over FHIR
 - focus on use cases for e-prescribing IG - have an plan to create an IG
 - there are some AU requirements from e-prescribing - that can feed in to next project

FHIR

Trackers - [link to pharmacy unresolved Jira trackers](#)

- [FHIR-26563](#)
 - in principle, agree that we could add a reference, but need to do more analysis on how we would handle the requirements
 - bigger picture of relationships
 - continue to discuss

AOB

- None

Next meeting

- March 30, 2020 at 4pm Eastern

Action Items

- Pharmacy WG will review and update use cases for Catalog project
- Notify Francois when we schedule Catalog discussion - he will join
- need FHIR IG Proposal approved - for Specialty Medication Prescribing PSS Melva Peters
- need FHIR IG Proposal approved - for Medication List Melva Peters
