	Count																						
CARIN BB JIRA ticket count	252																						
Duplicate tickets	23																						
Count of tickets to resolve	229																						
Tickets approved as Block Vote 1, 2a, 4, 5, 2b, 6, 7, 8, 3b, 3d, 3e, name change, <a href="#">PDex</a>	184																						
Tickets in review by FM: ((FDA <a href="#">Rob Hausen</a> ), (Block Vote 3a (NUBC) <a href="#">Rob McClure</a> , Rob Block Vote 3c (AMA / CMS) <a href="#">Graham Grieve</a>	12																						
Count of remaining tickets	33																						
Tickets in review by CARIN WG as Block-Vote-3f	3																						
Tickets ready to be submitted as Block-Vote-3f	12																						
Tickets that are Terminology related (Block Vote 3 – defining groupings)	10																						
Count of tickets under review by the CARIN team's small group	8																						

Defining URL:	<a href="http://hl7.org/fhir/us/car-in-bb/ValueSet/C4BBSupportingInfoType">http://hl7.org/fhir/us/car-in-bb/ValueSet/C4BBSupportingInfoType</a>
Name:	C4BBSupportingInfoType
Title:	C4BB Supporting Info Type
Definition:	Used as the discriminator for the types of supporting informatic
Copyright:	This Value Set is not copyrighted.
Logical Definition:	This value set includes all codes from the following code system <ul style="list-style-type: none"> <li>· Include all codes defined in <a href="http://hl7.org/fhir/us/car-in-bb/CodeSystem/C4BBSupportingInfoType">http://hl7.org/fhir/us/car-in-bb/CodeSystem/C4BBSupportingInfoType</a></li> </ul>

This Value Set is a discriminator for supportingInfo slices. Binding to a data element required.

Define Code System:

Defining URL:	<a href="http://hl7.org/fhir/us/car-in-bb/CodeSystem/C4BBSupportingInfoType">http://hl7.org/fhir/us/car-in-bb/CodeSystem/C4BBSupportingInfoType</a>
Name:	C4BBSupportingInfoType
Title:	C4BB Supporting Info Type
Definition:	Used as the discriminator for the types of supporting information
Copyright:	This Code System is not copyrighted.
Content:	

Code	Display	Definition
admissionperiod	Admission Period	Dates corresponding with the admission of the beneficiary to a facility
pointoforigin	Point Of Origin	UB-04 Source of Admission (FL-15) identifies where the patient was identified as needing to a facility.
admtype	Admission Type	UB-04 Priority of the admission (FL-14) and example, an admission type of elective indicates the patient's condition permitted time for medical services to be scheduled.
billingnetworkcontractingstatus	Billing Network Contracting Status	Indicates that the Billing Provider has a contract with the Payer as of the effective date of service admission.
brandgenericcode	Brand Generic Code	NCPDP code indicating whether the plan is a brand or generic drug.
claimreceiveddate	Claim Received Date	Date the claim was received by the payer.
compoundcode	Compound Code	NCPDP code indicating whether or not the drug is a compound.

dawcode	DAW (Dispense As Written) Code	NCPDP code indicating the prescriber's instructions regarding substitution of generic equivalent dispense the specific prescribed medication
dayssupply	Days Supply	NCPDP value indicating the Number of day medication dispensed by the pharmacy.
discharge-status	Discharge Status	UB-04 Discharge Status (FL-17) indicates the status as of the discharge date for a facility
drg	DRG	DRG (Diagnosis Related Group), including system, the DRG version and the code value
performing-network-contracting-status	Performing Network Contracting Status	Indicates that the Performing Provider has a contract with the Payer as of the effective date of service admission.
refillnum	Refill Number	NCPDP value indicating the number of times dispensed supply (0, 1, 2, etc.)
rxorigincode	Rx Origin Code	NCPDP code indicating whether the prescription was transmitted as an electronic prescription, by fax, or as a written paper copy.
servicefacility	Service Facility	The facility where the service occurred. Examples include hospitals, nursing homes, laborator homeless shelters.
typeofbill	Type Of Bill	UB-04 Type of Bill (FL-04) provides specific information for payer purposes.

- [FHIR-28532](#) - Define a Code System to discriminate the slicing in the item.adjudication adjudication fields
  - Proposed Disposition
  - Define Code System:

Defining URL:	<a href="http://hl7.org/fhir/us/caribb/C4BBAdjudicationDiscriminator">http://hl7.org/fhir/us/caribb/C4BBAdjudicationDiscriminator</a>
Name:	C4BBAdjudicationDiscriminator
Title:	C4BB Adjudication Discriminator
Definition:	Used as the discriminator for the data elements in adjudication and item.adjudication
Copyright:	This Code System is not copyrighted.
Content:	

Code	Display	Definition
allowedunits	allowed units	defines the adjudication slice to defined allowed units
inoutnetwork	in or out network	defines the adjudication and item slice to indicate whether a claim was adjudicated in or out of network
denialreason	denial reason	defines the adjudication slice to identify denial reason

A value set is not required to constrain the value of adjudication.category and item.adjudication in the abstract profile as it unnecessarily would over constrain its use

- Remaining tickets

- 8 tickets remain to be reviewed and we will look to have these ready for review next
