

Sept 2018 - HL7 WGM - Wednesday Q2 Minutes

Attendance can be found [Here](#)

Co-Chair and Key Participant information can be found on the Agenda found [Here](#)

Discussion items

Time	Item	Who	Notes
11:00	V3 vocabulary topics. Policy statement on legacy V2/V3 code systems (tentative) (moved from next Q because transition from HL7 code systems to other codes systems, internal HL7 or external needs clarification. See: Re: Proposed Vocabulary WG Policy on content changes to old HL7 systems)	Ted Klein	<p>It was agreed that though this has been discussed in the past it is time to formalize a policy for content changes to old HL7 systems.</p> <p>Discussion is documented on the Proposed vocab WG policy on content changes (link in item description) along with a proposed outline of requirements. We have been reticent to update older terminologies as the content of these does not conform to the standards we require in terminology today.</p> <p>Proposed mechanism: yearly review by the workgroup of deprecated content be required and if there is no change after two years it should be retired.</p> <p>The definition of deprecated was agreed: Specification or artifact that should be avoided as it no longer has a meaningful purpose or has been replaced by a better specification or artifact.</p> <p>The policy has to deal with how we manage this process.</p>

Action items

- [Ted Klein](#) to put Proposed vocabulary WG Policy on content changes to old HL7 systems on the Vocab call agenda
