- Patient Cost Transparency

Planned Use Cases

- Performing Laboratory Reporting
- Health Record Exchange: Patient Data Exchange

Da Vinci use cases are interrelated, currently with five categories that have emerged: Quality Improvement, Coverage/Burden Reduction, Member Access, Process Improvement, and Clinical Data Exchange. Early use cases create building blocks and a framework upon which incremental improvements and additional content can be added over time.

Da Vinci adopts existing and emerging standards with broad support to create viable solutions, such as FHIR as the core, NCQA HEDIS, CDS Hooks, and SMART on FHIR (layering in OAuth security). Existing profiles are adopted where possible (e.g., Argonaut, US-Core, Qi-Core)
