Designing an interoperable definition for Clinical Research activities is going to be a key driver for accelerating the reuse of healthcare data in accelerated delivery of treatments to Patients. This project has focused on using FHIR for communicating study designs, so that they could be incorporated.

With the productisation of the draft IG for Schedule of Activities we will need to work on formal advancement of the stability of the content therein in order to have the IG ready for ballot in the New Year. Previous sessions have been primarily educational opportunities, this requirement will be removed by the pre-session education day, the focus will be on implementation testing.

### Short Description
Designing an interoperable definition for Clinical Research activities is going to be a key driver for accelerating the reuse of healthcare data in accelerated delivery of treatments to Patients. This project has focused on using FHIR for communicating study designs, so that they could be incorporated.

### Long Description
With the productisation of the draft IG for Schedule of Activities we will need to work on formal advancement of the stability of the content therein in order to have the IG ready for ballot in the New Year. Previous sessions have been primarily educational opportunities, this requirement will be removed by the pre-session education day, the focus will be on implementation testing.

### Type
Test a FHIR-associated specification

### Submitting Work Group/Project/Accelerator/Affiliate/Implementer Group
Vulcan SOA
BR&R
PHUSE

### Track Lead(s)
Mike Ward, Geoff Low

### Track Lead Email(s)
ward_michael_j@lilly.com; geoff.low@3ds.com

### Related Tracks
Vulcan RWE, Vulcan AE

### FHIR Version
FHIR R4

### Specification(s) this track uses
- Terminology Servers this track users? - not known at this point
- Specific Terminology Code Systems and Value Sets needed for this track? - not known at this point

### Artifacts of focus
- Triggering and Visit Windows
  - Planned lapse of time between scheduled clinical activities. e.g., 28 days after preceding linked activity
  - Allowed highs and lows of time for scheduling that clinical activity. e.g., +/- 5 days

### Expected participants
BioPharma
Hopefully EHR Vendor
