Modeling and Methodology

Mission

The Modeling and Methodology Work Group (MnM) is responsible for:

- creating and maintaining the HL7 Development Methodology and facilitating its use;
- maintaining a Reference Model and Data Types Model that govern the shared models that are developed and used by the HL7 Work Groups creating designs in model-based standards development;
- managing and approving modeling patterns and reusable modeling constructs for HL7 designs; and
- developing and enforcing good modeling practices.

Jean Duteau will consult with Pharmacy WG.

Work on the Mitigating Breaking Changes confluence page – see FHIR-34084 - Getting issue details... STATUS

MnM will review FHIR 80% Rule Presentation and provide feedback

Lloyd McKenzie will create an initial FHIR 80% Rule Presentation and distribute it to the MnM list

Lloyd McKenzie will create a Jira issue to update the tooling to enforce the combination of resource type + search parameter name be unique

Lloyd McKenzie will create a Jira issue to update the tooling to enforce all search parameter names be UpperCamelCase

Lloyd McKenzie will create a Jira issue to add a 'title' element for all core specification resources

Jean Duteau and AbdulMalik Shakin will review vocabularies in RIM Version 7 to see if any changes need to be made and if we need to start a new version

Jean Duteau will come up with a list of example sets of Reference targets to propose to the committers and solicit feedback from them

Grahame Grieve will create recommended set of choice datatypes and present to MnM

Grahame Grieve identify what ballot status to list the new elements on the Attachment data type (see Jira #23568 )
