2020-09 Connectathon 25

HL7 FHIR CONNECTATHON 25

WILL BE VIRTUAL!

Kick Off Wednesday, September 9th at 4:00 PM 
Eastern Time

Testing Thursday, September 10 and Friday, September 11, 2020
9:00 AM ET - 7:00 PM ET

Click Here to register with HL7 International.

AFTER you register, Click Here to go to Whova and view full schedule and zoom session links.

Stay in the know on FHIR Chat!

The contact for this event is Sandy Vance who can be reached at sandy.vance@aegis.net or +1.614.273.5916

Participant Check List:

1. Click Here to register with HL7 International.
2. Review the Connectathon Track List below and visit Track Pages to learn more and decide where to focus your time during the event.
3. Complete the HL7 Pre Connectathon Survey to let us know which track you want to participate in.
4. Review the Connectathon Information Session Recording or review the Slides.
5. Read the Connectathon version of the FHIR Specification and the FHIR FHIM home page if you haven't already done so, to become familiar with the concepts.
6. Participate in your track orientation session or review the recording posted on the track conference page.
7. You will receive an email from Whova, the app used to host the meeting. You will need to set this up and enter meetings through Zoom links inside the application. You can access it on the web. A download is not necessary. Many people find it helpful to have Whova on both laptop and phone.

Track Lead Administrative Check List:

2. Review Track Lead Resources and technical check list here.
3. Prepare Track Orientation Slides using this template. Record and post to your track page.
4. Review participant lists as they come in email from Sandy and make contact with your participants. Match up testing partners who are looking for someone to exchange with.
5. You will receive an email from Whova, the app used to host the meeting. You will need to set this up and enter meetings through Zoom links inside the application. You can access it on the web. A download is not necessary. Many people find it helpful to have Whova on both laptop and phone.
6. Experiment with Whova ahead of the event.
7. Designate a helper who can manage Q&A during the event, answer questions and help with Zoom hosting.
8. Ensure scheduled touchpoints include a brief overview of the track and tools. Connect with track participants to review progress. All schedules will be hosted in Whova and new participants may join your track during these touchpoints.

Work Group Meetings

HL7 WGMs are where a lot of the development work on FHIR happens. Numerous work groups will be considering FHIR change proposals, working on FHIR profiles and resources, and debating other aspects of FHIR implementation. There will also be meetings of the FHIR Management Group discussing policies relating to FHIR. There are often ad-hoc meetings at breakfast, lunch and after-hours to discuss items of interest such as tooling, new domains, particular technical issues, etc.

You can take a look at the HL7 Confluence Pages related to specific work groups to get a sense of the breadth of discussions that will be taking place.

Participating in the WGM is a good way to get involved in the FHIR Community, form relationships and influence how the standard evolves.

Proposals due by: July 21, 2020

To enter a track proposal, go to the ellipsis next to the Create button at the top of this page, click show more, and select the Track Proposal Template. Once you name your page, click publish in the bottom right corner. For more information on how to use a template to set up a new page click here.

The FHIR standards development process uses a philosophy of constant implementation to make sure that the standard is implementable in the real world. A key element of realizing this mindset is a FHIR Connectathon at each HL7 Working Group Meeting. The event is typically held on the Saturday and Sunday prior to the meeting and allows participants to test or develop software in an informal way. Test FHIR servers are available and some participants bring other servers along depending on the actors they are fulfilling.

The principles associated with connectathons can be found here.

Test servers are available (FHIR Test Servers), but some participants may bring other servers along depending on the actors they are fulfilling.

Each track has a coordinating Track Lead. Please review Track Lead responsibilities.

Tracks:

- 2020-09 Argonaut Granular Controls
- 2020-09 Argonaut Patient Lists
- 2020-09 Argonaut US Core Track
- 2020-09 Bulk Data
