DSTU2 Ballot to Final breaking changes

A list of all the changes made to DSTU 2 after DSTU 2 ballot that were labelled ‘non-compatible’:

- 2865 Clarify the functionality of GET [base][compartment][id]?
- 3011 CarePlan.activity.note needs further explanation
- 3249 Profile.date should have a more meaningful name
- 3361 Message endpoints should be associated with the event protocol
- 3627 Value set - define/concept[0..*] needs additional wording
- 3633 Change .expansion.timestamp datetype to dateTime
- 3855 search param naming is inconsistent
- 4003 Resource Encounter Content
- 5165 Jan 2015 Ballot Comment #32
- 5444 Jan 2015 Ballot Comment #337
- 5457 Jan 2015 Ballot Comment #396
- 5561 Composition.type and Composition.class definitions should be improved according to the improvements made to DocumentReference.
- 5678 List.flag vocabulary
- 5680 order of common resource elements not consistent
- 5695 Medication should be required in MedicationStatement
- 5698 Appointment.order can’t work at present
- 5701 MedicationStatement.wasNotGiven should notTaken
- 5760 Translate does not suport dependsOn
- 5895 Is Order.authority part of 80%?
- 5940 allow MedicationStatement.quantity to be either a quantity or range
- 5947 Relationship between child concepts and subsumption needs clarification
- 5951 Timing doesn’t allow an overall duration
- 5961 Change DiagnosticReport.name to .code
- 5997 Rename Provenance.agent.reference[]
- 5998 ImagingStudy should use CodeableConcept, not Coding
- 6029 More precise definitions of some concept map equivalence codes
- 6040 StructureDefinition/ElementDefinition overlaps
- 6067 Split Supply into SupplyRequest and SupplyDispense
- 6079 StructureDefinition needs a target type property
- 6089 Telecom doesn’t allow for alternate systems
- 6094 change ‘subject’ search parameter
- 6104 Tooling should enforce coding capitalization consistency
- 6118 409 status code
- 6122 Support non-atomic transactions/batches in RESTful API
- 6129 Change the Procedure attribute type to code
- 6130 Change attribute name for Quantity.code, Quantity.units, Quantity.system
- 6171 Flag.patient should be [0..1]
- 6215 roll up CarePlan.activity.detail.note into CarePlan.activity.notes
- 6216 Goal.concern reference list
- 6242 ImagingStudy.clinicalInformation should choice of string or Condition resource and possible code?
- 6253 body site should be a datatype - but used consistantly throughout the standard.
- 6269 AuditEvent needs a Participant uid type code to explain how to understand the value in uid (e.g. Patient ID in CX form)
- 6304 Abstract for Action Who/What/Where/Why across Resources
- 6309 Allow reference to medication to be either a code or a Medication Resource Reference
- 6310 Add MedicationStatementStatus for planned future medications
- 6311 Need better explanation of DataElement Slicing
- 6331 Clarify whether conditional operations in a transaction include [base]
- 6336 “Executing an Operation Asynchronously” should be removed
- 6343 The /Mailbox endpoint is no longer needed, given FHIR’s “operations” framework
- 6637 Add modifier to string parameters to indicate what kind of partial match is required
- 6793 2015May sdc #10 - Use stringency, not specificity
- 6868 2015May sdc #85 - Why unassessable?
- 6913 2015May sdc #136 - How are "append" relationships handled?
- 6922 2015May sdc #145 - Request that max count be unbounded
- 6944 2015May core #9 - Make reason 0...
- 7018 2015May core #63 - Response: Specifying paging support would be a welcome addition and would further increase interoperability.
- 7123 2015May core #182 - What’s difference between Procedure.category and type?
- 7127 2015May core #186 - Procedure.relatedItem is too complicated - make it extension
- 7154 2015May core #213 - Explain reliability
- 7347 2015May core #537 - Schedule.actor has resource type of "Any"
- 7366 2015May core #556 - Why not avoid this problem by requiring contained resources to explicitly state their subject? Why allow this degree of optionality?
- 7404 2015May core #594 - Is narrative the same for documents vs. other mechanisms?
- 7428 2015May core #716 - Using of Snomed CT
- 7431 2015May core #719 - AuditEvent source identifier
- 7454 2015May core #742 - Can only one be declared as primary? Can none?
- 7457 2015May core #745 - should allow for multiple Coding returned - should at most one marked as primary
- 7460 2015May core #748 - Allow non-resources to be focus of Provenance
- 7483 2015May core #778 - consistency of FamilyMemberHistory’s condition with the Condition resource
- 7511 2015May core #602 - Make names consistent between Procedure and Encounter
- 7515 2015May core #806 - rename MedicationStatement.dosage.schedule to MedicationStatement.dosage.timing
- 7517 2015May core #808 - Bring back Observation.component
- 7518 2015May core #809 - Immunization.protocol cardinality
- 7521 2015May core #812 - ICD-9 system URLs
• 7525 2015May core #816 - MedicationStatement.status definitions
• 7530 2015May core #821 - remove ElementDefinition.binding.name
 • 7541 2015May core #832 - Simply conditional create header
• 7543 2015May core #834 - include transitiiveness
• 7545 2015May core #836 - transaction and base interaction
• 7550 2015May core #841 - AllergyIntolerance negation
• 7581 2015May core #872 - How do we specify an "active" or "resolved" problem?
• 7583 2015May core #874 - We need a status to specify whether the med is "active" vs. "discontinued" meds?
 • 7587 2015May core #878 - body site is overly complicated (Observation)
 • 7613 2015May core #904 - How is encounter diagnosis handled?
• 7617 2015May core #908 - Is Working vs. Confirmed in the 80%?
• 7621 2015May core #912 - Aren't these all similar items? Shouldn't they all be called target or detail?
• 7622 2015May core #913 - Allow structures in notes, make 0..1
• 7629 2015May core #920 - Suggest renaming to 'bodySite' or 'affectedSite'
• 7631 2015May core #922 - Procedure.device -> targetDevice
• 7633 2015May core #924 - Procedure has evolved since ProcedureRequest was drafted. Suggest re-aligning the two resources to account for changes in one, relevant to the other.
• 7636 2015May core #927 - Should 'applies' be renamed to 'physiologicallyRelevant[x]' While short names are good, they must also be more descriptive.
• 7639 2015May core #930 - What's difference between has component and has member?
• 7651 2015May core #942 - Need to categorize re-admissions
• 7655 2015May core #946 - Recommend renaming this to referralRequestFulfilled
• 7693 2015May core #984 - Who or what should sign a bundle and how is this used? RBAC? What happens if a transaction is not signed?
• 7702 2015May core #993 - Can signature be captured by blob?
• 7711 2015May core #1072 - Replace Provenance extension
• 7733 2015May core #1074 - The use of the DocumentReference.confidentiality element is not conformant with the HCS requirements on Security Labels. This needs to be fixed.
• 7760 2015May core #1081 - Add dependsOn element as an input Parameter with parts, and product as an output Parameter with parts.
• 7761 2015May core #1082 - Allow ConceptMap/Stranslate to have multiple outcomes
• 7859 2015May core #1179 - Condition.dateAsserted definition clarification
• 7864 2015May core #1184 - Condition.clinicalStatus should not convey both record status (in error) and confirmation Status (working, confirmed, refuted)
• 7867 2015May core #1187 - Add a record status to communicate active, in error, cancelled
• 7894 2015May core #1124 - Rename AllergyIntolerance.event
• 7897 2015May core #1127 - Should immunization be searchable by subject since there is no subject parameter (if yes, should AllergyIntolerance be searchable by subject?)
• 7905 2015May core #1226 - Encounter condition relationship
• 7913 2015May core #1233 - MedicationStatement.status clarification
• 7924 2015May core #1244 - Clarify content-location for Reads without Versioning support
• 7954 2015May core #1274 - Remove _language query parameter support
• 7957 2015May core #1277 - Alternative suggestion for Date Ranges
• 7961 2015May core #1281 - Modify Name of Substance.Type Property
• 8002 2015May core #1326 - Add mode parameters as a value set.
• 8043 2015May core #1368 - Change Resource Contraindication to DetectedIssue
• 8045 2015May core #1370 - Medication Prescription Status Values
• 8105 DocumentReference.format needs to be type Coding
• 8107 Update the definition of "status" for the MedicationStatement
• 8112 Recommend adding 'On-Hold' to MedicationStatement.status
• 8120 Consider Location.status "present"
• 8123 AuditEvent constraints are too tight
• 8142 2015May daf #96 - Modify Content Search Parameters
• 8163 Transaction processing sequence should reflect bundle entry sequence
• 8172 transaction-operation coding system doesn't correspond to transaction-operation value set
• 8184 Add reference to Condition
• 8188 ConceptMap structure doesn't make sense
• 8198 MAY2015 QiCore#70 - Change CommunicationRequest.orderedOn to requestedOn
• 8204 URI for Medical Device Codes defined in ISO 11073-10101 is wrong
• 8210 2015MAY QiCore#85 Goal.patient cardinality
• 8226 ValueSet.uri should be ValueSet.uri
• 8230 Display for filter-operator "=" code is " "
• 8236 terminology system URL syntax
• 8246 Signature.who can have every dataType in fhir-single.xsd
• 8252 ValueSet.compose.include should have codes or filters, but not both
• 8281 Rename ProcedureRequest.timing[x] to scheduled[x]
• 8313 Change terminology for AllergyIntolerance.type
• 8343 j.equivalence definition and valueset definition contradict each other
• 8354 ValueSet.define should be renamed to ValueSet.codeSystem
• 8355 valueOrdinal should be decimal, not integer
• 8363 No place for a displayName in SearchParameter
• 8370 We're ambiguous about allowing relative uris for reference-type search parameters
• 8372 Support multiple discharge diagnoses
• 8379 Observation indirect target is confusing
• 8386 LOINC copyright query should not allow "All" as a value
• 8416 Remove batch operations now that we have a batch interaction
• 8418 Add Period to Group Characteristic
• 8437 Remove Social Security Number from the Identifier type value set and improve definition
• 8440 Change references from Supply to SupplyRequest
• 8441 Provide support for a CodeableConcept for answer to question
• 8449 OperationOutcome.issue.code is either extendable CodeableConcept or not Code - Prefer extendable
• 8450 OperationOutcome.issue.location is unfriendly to JSON based applications only using HTTP Get parameters
• 8498 DocumentReference.format belongs inside content
• 8504 change DR.requestdetail to DR.request to harmonize with PC resources
• 8509 Conformance should have a "kind"
• 8510 Rename NamingSystem.type to NamingSystem.kind
• 8511 NamingSystem.country and .category should become useContext
• 8512 NamingSystem.category should have same binding as Identifier.type
• 8514 change name of element serviveCategory to category
• 8515 create and extension for O.refrange to allow for ...or equal to
• 8521 Questionnaire Extension defaultasfixed - clarification
• 8551 create and extension for O.refrange to allow for ...or equal to

All tasks (including the list above)

• 2840 Address can't differentiate physical and postal
• 2865 Clarify the functionality of GET [base][compartment][id]/?
• 3006 4.15.6 Resource Observation - Examples need to show related propert in use for panel and calculated measurement
• 3011 CarePlan.activity.note needs further explanation
• 3063 Simplification of Schemas #4 - use the
• 3090 Conformance SearchParams should be more powerful
• 3123 CarePlanparticipant.role needs a value set
• 3129 Profile.structure.element.definition.type.profile should repeat
• 3151 Parent concept in medication-form-codes and medication-package-form-codes is wrong
• 3228 Need rules for tags invalidated by an update
• 3249 Profile.date should have a more meaningful name
• 3297 Add a warning about the safety implications of not conforming to the specification
• 3317 Patient/RelatedPerson/Organization search key 'phonetic' lacks path definition
• 3342 contained resources overrepresented in examples
• 3358 Need to clarify what's in-scope for resources vs. profiles
• 3361 Message endpoints should be associated with the event protocol
• 3478 Add DateTime to the Attachment data type
• 3501 Practitioner address data model not rich enough to capture needed information in all countries
• 3511 Add detail to Value Set Expansion Definition
• 3534 Need a formal support mechanism for i18n and i10n of schemas and schematrons
• 3598 Add support for multiple designations on concepts
• 3624 Add a property for comments to the JSON format
• 3625 Create "best practice" guide for creating a "system URI" for Coding
• 3627 Value set - define/concept[0..*] needs additional wording
• 3633 Change .expansion.timestamp datatype to dateTime
• 3655 Need to allow for Patient's where there's no indication of human vs. animal
• 6206 display text is wrong fro example
• 3760 Clarify when OperationOutcome rather than another resource is appropriate
• 3792 FHIR ebook not valid
• 3800 Validate and Translate should allow multiple repetitions
• 3802 Specify what it means for a search parameter to matches a complex datatype
• 3807 Should add rationale to Invariant
• 3810 Resource package/profile list should link directly to profile if only one is defined for unique id
• 3819 Need to allow Observation.related.target to be QuestionnaireAnswers in addition to Observation
• 3820 Need to add support for message polling and message querying
• 3836 Add constraining base node searches through ConformanceProfile
• 3855 search param naming is inconsistent
• 3873 Explicitly specify resource/element types throughout?
• 3874 Referenced system value "http://hl7.org/fhir/message-type" seems incorrect
• 3918 usability issues with "address" as a search parameter for patient
• 4003 Resource Encounter Content
• 4033 Expand the definition of CarePlan.concern
• 4037 Communication support for phone calls

- Jan 2015 Ballot Comment #432
- Jan 2015 Ballot Comment #446
- Update example f201 to use dose, timing, and medication (remove the todos)
- Clarify the relationship of Medication.package and Medication.product
- Include common resource elements in resource profile definitions
- Add best practice narrative on suppressing data for client access of a resource
- Expansion and compose should allow for caseSensitive or define should loose the attribute
- Resource Ownership
- Composition.type and Composition.class definitions should be improved according to the improvements made to DocumentReference.
- Create UDI examples for device
- Follow up on #3800 Change MedAdmin.dosage.site to .bodySite choice of codeableConcept/reference(BodySite)
- Be specific that JSON format must be UTF-8 just like XML
- Add 'active' On Practitioner Resource
- To add new datatype for multichannel recording data
- identifier - bring consistency to the cardinality and type across resources
- maintaining order within FHIR resources for list items
- List.flag vocabulary
- order of common resource elements not consistent
- Patient Entered/Reported Data
- Request for new security label for when content is removed from a resource for operational reasons
- Medication should be required in MedicationStatement
- MedicationStatement.wasNotGiven should notTaken
- Add "proposed" status to the Appointment resource
- MedicationAdministration.status should be marked as a modifier
- Add Organization reference to Order.source
- Need extensions for capturing formal mapping paths for data elements
- Patient Entered/Reported Data
- Consider Adding Precondition to MedicationStatement
- Dosage Instructions on Medication Dispense
- Are there other ways of doing UI hinting than a heairchy in the expansion
- Do we need support for active/inactive in expansions?
- can we be more specific about date and filter parameters on expansion
- Improve documentation around value set expansion currency
- Define "all known value sets" magic URI as part of the spec
- Server Validation of CodeSystem.define.system
- Should code system name be a service provider specific identifer?
- How should display text case be handled on validate - case sensitive or not?
- Add concept map link extension
- Administration of medication to a patient
- AllergyIntolerance.event.description vs AllergyIntolerance.event.comment
- FamilyHistory negation
- Specimen needs status code
- Identification of Value Sets Used in a Profile
- typo in MedicationAdministration.dosage.rate where no duration is needed
- MedicationPrescription.dosageInstruction.scheduled[x] naming inconsistency
- Alert should have encounter
- Add extension to link OperationOutcome and Contraindication
- Recognition in FHIR specification of profiles from other organizations
- Value set should explain how master files are handled
- Note Immunization Resource Can Record Historical Immunizations
- is Order.authority part of 80%?
- Name of MedicationPrescription
- Consider 'dateEnded' for MedicationPrescription
- Consider 'reasonEnded' codeable concept for MedicationPrescription
- Clarify MedicationStatement usage
- Invariants should be on MedicationStatement
- Clarify boundary between MedicationAdministration and MedicationStatement
- Note what elements of valueSet constitute the Content Logical Definition
- is Order.authority part of 80%?
- Name of MedicationPrescription
- Consider 'dateEnded' for MedicationPrescription
- Consider 'reasonEnded' codeable concept for MedicationPrescription
- Clarify MedicationStatement usage
- Invariants should be on MedicationStatement
- FHIR specification and build system must be refactored
- "Break the Glass" Method Description in Security Labels Section is Very Limiting
- allow MedicationStatement.quantity to be either a quantity or range
- Clarify boundary between MedicationAdministration and MedicationStatement
- Clarify what elements of valueSet constitute the Content Logical Definition
- hostname instead of URL for LOINC
- Relationship between child concepts and subsumption needs clarification
• 5949 relationship between dosage.text and dosage.Scheduled
• 5951 Timing doesn’t allow an overall duration
• 5956 Additional Questionnaire layout hints - horizontal, autocomplete and select
• 5961 Change DiagnosticReport.name to .code
• 5965 Status values for MedicationStatement can conflict with effective[x]
• 5966 Composition section content should come before a nested section
• 5972 Weird-looking flags
• 5973 Superseded is misspelled
• 6336 "Executing an Operation Asynchronously" should be removed
• 5981 Need to be able to specify a value set identity by reference to a binding (e.g. element definition) in value set operations
• 5982 mixing of dates and versioning
• 5983 Unexpected behaviour specifying binding strength
• 5987 remove isSummary from Resource Definition
• 5992 Wrong VS expansion: http://hl7.org/fhir/vs/medication-form-codes
• 5993 Wrong VS expansion: http://hl7.org/fhir/vs/medication-package-form-codes
• 5994 MedicationAdministration.medication description misleading
• 5996 Proposal to add _narrative parameter to REST api
• 5997 Rename Provenance.agent.reference
• 5998 ImagingStudy should use CodeableConcept, not Coding
• 6019 Need a common extension to allow goals to be referenced from other resources
• 6022 Change short description of .performer
• 6023 Minimum cardinality of ProcedureRequest.subject should be 0
• 6025 Need rules for stringency
• 6032 Too many things 1..x in DocumentReference
• 6034 NDF-RT link on Named Systems List page 404s
• 6040 StructureDefinition/ElementDefinition overlaps
• 6041 durationMax not present in Repeat element of Timing resource
• 6042 Terminology services page: validate-code replaces validate
• 6043 Questionnaire.$populate - subject parameter type should be Reference(Any) not Any
• 6044 Questionnaire - needs a subject type element
• 6045 Sort - specification is unclear about whether sort is case sensitive or not
• 6046 Questionnaire.$populate - content parameter type should be Any, not string
• 6048 Signature should allow device resources
• 6060 Documentation of extensions for simple types
• 6061 Typos
• 6066 Expand [x] type element in profile unspecified types in the snapshot
• 6067 Split Supply into SupplyRequest and SupplyDispense
• 3791 create examples tab for extensions
• 6077 Complex extensions aren't rendering properly
• 6078 LOINC mappings for data element should be to database columns
• 6079 StructureDefinition needs a target type property
• 6080 CAP example isn't showing up in ballot
• 6084 MedicationPrescription misspelled as MedicationPrecription in several places
• 6085 Add discussion of profile consistency to profile page
• 6087 No way to specify multiple bindings (with different strengths)?
• 6088 We still need Physical vs. Postal address
• 6089 Telecom doesn't allow for alternate systems
• 6091 Add Device.note
• 6092 Individual Resource pages do not align with Resource names
• 6093 Differential element[x] is expanded to element
• 6094 change 'subject' search parameter
• 6096 Bundle resource has no elements that are marked as "in summary"
• 6097 Conceptmaps are not part of validation.zip
• 6098 Extension Initial presumed answer for question - request for more detail surrounding
• 6099 Should have style and markup on Question.text and Group.text
• 6100 change enteralFormula.rate to type quantity
• 6101 Miove .enteralformula.scheduled next to .quantity
• 6102 move enteralformula.administrationInstruction to end
• 6103 provide guidance in notes section on how to use the resource for a continuous vs a bolus enteral feeding
• 6104 Tooling should enforce coding capitalization consistency
• 6105 Appointment notes section could use a diagram or two
• 6106 add a entry for a single file containing all the structure definition datatype and resource
• 6107 broken link in patient example
• 6108 Clarify FHIR server behavior (http codes, body, outcome etc) while CREATE with id, UPDATE without id
• 6109 HTTP codes ValueSet
• 6111 change type for rate change from quantity to rate
• 6113 Summary needs to be updated
• 6115 add elements to Address data type
• 6116 Parameters resource is missing in listings
• 6118 409 status code
• 6121 Content-Type, _format, accept, Accept-Charset
• 6122 Support non-atomic transactions/batches in RESTful API
• 6125 Profiling should document rules for documentation & mappings
• 6126 Make clear that RelatedPerson and Practitioner can be animals
• 6127 ValueSet profile should support additional instruction on codes
• 6128 Change vaccineType to vaccineCode
• 6129 Change the Procedure attribute type to code
• 6130 Change attribute name for Quantity.code, Quantity.units, Quantity.system
• 6131 CarePlan could benefit from a reference to EpisodeOfCare
• 6132 Add Problem to ConditionCategory
• 6133 change "list" to "see List of Resources"
• 6134 Change 'This resource is extends resource" to 'This resource is extends the base Resource'
• 6135 move hyperlink to resources and Capitalize
• 6136 change "concept" to "concept code" or "code"
• 6137 Validator not handling references to contained resources
• 6138 Resource.Id and Resource.meta not in summary
• 6140 Schema error for Age, Count, etc.
• 6144 remove table showing conformance/extensibility combinations
• 6145 typo in example
• 6147 Typo in text for DomainResource Resource
• 6148 Typo in text for search parameter
• 6149 missing text? in bundle transaction discussion
• 6151 structureDefinition notes section does not apply - typo?
• 6152 typo in 6.17.5.2
• 6153 Conformance.rest.security.service should be extensible
• 6154 Does Conformance need a RevInclude list?
• 6155 Refers to StructureDefinition whereas much of the discussion is about ElementDefinition
• 6156 should this section refer to the section on revinclude?
• 6157 replace this section or refer to Bundle text from 6.8.3.5
• 6158 fix link
• 6159 correct typo
• 6160 fix typo
• 6162 fix typo
• 6163 no example of JSON comments found - need explicit example references or shown
• 6164 fix xml for timing datatype
• 6166 when and how to use AppointmentResponse.participantType
• 6167 need more clear clarification
• 6169 vsd 1 expansion.value for is wrong
• 6170 Clarify use of flag.category
• 6171 Flag.patient should be [0..1]
• 6172 no example for named query
• 6173 Parameters resource not listed on resource page
• 6174 add link
• 6175 change text to avoid using term 'list'
• 6176 clarify what is meant by 'subject resource'
• 6177 fix typo
• 6178 provide clarification to profile tags
• 6179 Narrow down composition.section.code value set
• 6180 Bining types need to be updated in this section
• 6181 Code restriction regex is wrong
• 6184 BCP-13 and BCP-47 should be in the coding system list
• 6187 need to also refer to both StructureDefinition and ElementDefinition
• 6188 difference between profile types is unclear
• 6189 differential view should only show what is different
• 6190 There are two Clinical Document profiles in Spec?
• 6191 broken links
• 6193 change name of section
• 6194 remove the parenthetical resources
• 6195 include reference to fulfillment of referral request
• 6196 propose boundaries for DO
• 6199 add boundaries section to DR
• 6200 remove background and context section from DR
• 6201 Add referral creation date
• 6202 redo Background and Context section
• 6205 refer to .neme which is missing
• 6207 improve the description for .event.detail
• 6208 Allow Organization in flag.author
• 6209 Unclear how to represent non-medical devices
• 6212 create at least example binding
• 6214 detail.product what about diet/ nutritional supplements
• 6215 roll up CarePlan.activity.detail.note into CarePlan.activity.notes
• 6216 Goal.concern reference list
• 6218 change name to sodium and 'fluid' restricted
• 6219 medication form bound to dosage route VS
• 6223 why not have a reference to the MedicationDispense Resource for reference to dosing details
• 6226 Search summary table misses entry for _query
• 6229 extension definition still very hard to read
• 6233 AuditEvent confusion on 'identifier' elements that are actually strings. Affects understanding as well as search (which should not be token)
• 6234 suggestion to add a feature like _fields
• 6235 invalid namespace prefix xs:xs:gYear in primitive profile XML
• 6238 is WADO-RS equivalent to "DICOM contexts " and "DICOM constructs"
• 6239 many description contain parenthetical ids - a legend would be nice to explain what they mean
• 6240 with identifier.type does is make sense to roll up multiple identifier or keep as separate identifiers
• 6241 retrieve Uri (0008,1190) is confusing name
• 6242 ImagingStudy.clinicalInformation should choice of string or Condition resource and possible code?
• 6243 procedure needs at least an example binding and should there be a choice with procedure resource
• 6244 ImagingStudy.series.instance.content comment is wrong
• 6245 Suggest hyperlinks to referenced standards WADO and DICOM
• 6246 add choice ImagingObjectSelection to DiagnosticReport.imagingStudy
• 6248 add unknown to Value Set http://hl7.org/fhir/vs/animal-genderstatus and make required
• 6251 Communication.payload.content[x] definition is too narrow
• 6252 Timing.repeat.count must support ranges and decimal type.
• 6253 body site should be a datatype - but used consistantly throughout the standard.
• 6256 define entity and how is different from agent  
• 6257 Need additional prefixes for date search parameters
• 6258 Extension Reference to the DeviceMetric resource - Definition not needed
• 6259 constrain out Device from .device in DeviceMetricObservation profile
• 6266 Please Clarify “Data Element vs. Codes” section
• 6269 AuditEvent needs a Participant user.id type code to explain how to understand the value in user.id (e.g. Patient ID in CX form)
• 6271 Subject of flag
• 6272 IHE multiple extension point review request
• 6273 fix typo
• 6277 Minor editorial fix
• 6279 Modifier listing should be consistent all be listed in one place (split up)
• 6298 unable to review adverse event due to pub issues
• 6302 ValueSetCategory has no values listed yet is a required binding
• 6304 Abstract for Action Who/What/When/Where/Why across Resources
• 6307 Specify dot-notation for element name
• 6309 More precise definitions of some concept map equivalence codes
• 6308 Wording improvement for Extensible binding
• 6309 Allow reference to medication to be either a code or a Medication Resource Reference8112
• 6310 Add MedicationStatementStatus for planned future medications
• 6311 Need better explanation of DataElement Slicing
• 6312 Body Site used to collect specimen is part of Specimen resource not Observation
• 6313 Distinction between Observation and QuestionnaireAnswers unclear
• 6314 Bundle.entry.search.mode only captures one status
• 6320 Clarify distinction between ElementDefinition.defaultValue vs. ElementDefinition.meaningWhenMissing
• 6321 Improve the mechanism for auto-generating StructureDefinition ids in build tool
• 6324 JSON views: “canonical form” links broken
• 6325 ElementDefinition.short should not refer to “generated XML format”
• 6326 How does OperationOutcome communicate limitations imposed by security?
• 6327 Descriptions of multiple-cardinality fields should be uniformly expressed in the singular (or plural)
• 6328 Bundle.entry.resource should be defined as “Resource” (not “Resources”)  
• 6329 Clarify description of Bundle.entry.transaction.url
• 6330 Need a consistent way to refer to quoted values in FHIR spec
• 6331 Clarify whether conditional operations in a transaction include [base]  
• 6332 Clarify the justification for requiring a “transaction” in history bundle entries
• 6333 Example reference to Binary content should use a capital “B”
• 6334 Why do Condition.onset and Condition.abatement have different datatypes?
• 6335 OperationDefinition should distinguish parameters that are Resources vs. References
• 6337 elementdefinition-examples.html should link to structuredefinition-examples.html
• 6338 Missing “raw” link for some JSON pages
• 6339 Are slicing discriminators compatible with `pattern[x]` constraints in ElementDefinition?
• 6340 How do StructureDefinitions treat [x] values?
• 6341 Slicing examples need to be updated (Observation.name no longer exists)
• 6342 Clarify the “literal” vs “logical” behavior of .in modifier for search
• 6343 The /Mailbox endpoint is no longer needed, given FHIR’s “operations” framework
• 6344 Explain how to achieve the behavior or “valueBoolean” for Observations
• 6345 Clarify how DocumentReference.type and DocumentReference.class differ
• 6346 DocumentReference should have a reference to Encounter
• 6347 Timing examples should break “period+units” into two columns
• 6354 Provenance mapping to W3C specification
• 6355 Requirements column in profile spreadsheet does not get filled in for generated profile
• 6365 Improve documentation about element
• 6578 NamingSystem bundle for FHIR distribution
• 6629 Define system URLs for common coding systems
• 6630 Patient.deceased search parameter has wrong xpath
• 6637 Add modifier to string parameters to indicate what kind of partial match is required
• 6783 Add a bundle of NamingSystems for known code systems/identifiers
• 6784 2015May sdc #1 - Can answer lists be independent of questions?
• 6785 2015May sdc #2 - Multi-code system value sets are bad
• 6793 2015May sdc #10 - Use stringency, not specificity
• 6797 2015May sdc #14 - Show the actual data type for References
• 6798 2015May sdc #15 - Explain usefulness in other jurisdictions
• 6799 2015May sdc #16 - Warn about schema-centric implementation.
• 6801 2015May sdc #18 - Explain different id types
• 6803 2015May sdc #20 - Explain how ConceptMap works better
• 6807 2015May sdc #24 - Explain usage of value sets in SDC-context
• 6809 2015May sdc #26 - 404 on link to SDC wiki
• 6810 2015May sdc #27 - Explain what “options” means
• 6811 2015May sdc #28 - Can type be a code?
• 6815 2015May sdc #32 - Can root group be non-required?
• 6817 2015May sdc #34 - Add invariant on cardinality extensions to repeat
• 6819 2015May sdc #35 - Duplicate extensions
• 6821 2015May sdc #38 - Reference to Questionnaire should be profile-specific
• 6823 2015May sdc #40 - Fix indirect link
• 6826 2015May sdc #43 - Change referenced QuestionnaireAnswer resource to "QuestionnaireAnswers".
- 6827 2015May sdc #44 - Fix page numberings
- 6828 2015May sdc #45 - Define terminology for Questionnaire category extension
- 6829 2015May sdc #46 - Declare references as Reference(x)
- 6831 2015May sdc #48 - Missing/bad links
- 6832 2015May sdc #49 - JSON template not in All view
- 6833 2015May sdc #50 - Links to structure definitions don't resolve
- 6834 2015May sdc #51 - XML representation for last "value*" element should have the entire element crossed out not just its description.
- 6836 2015May sdc #53 - Missing publisher
- 6837 2015May sdc #54 - Consistent in use of terms. For example, CCDA and C-CDA.
- 6838 2015May sdc #55 - TOC did not list all sections.
- 6839 2015May sdc #56 - remove extra "?" at end and replace with "."
- 6840 2015May sdc #57 - Labels on different tabs should be different
- 6841 2015May sdc #58 - change FHIR version from 0.2 to 0.5.0
- 6846 2015May sdc #63 - Diagram references "template"
- 6850 2015May sdc #67 - What's behavior for modifier extensions?
- 6853 2015May sdc #70 - Add authorization qualifier to 'read'
- 6862 2015May sdc #79 - Small XSD facets issue.
- 6868 2015May sdc #85 - Why unassessable?
- 6882 2015May sdc #99 - data types inconsistent
- 6883 2015May sdc #100 - Cardinality change from 0..1 to 0..*
- 6885 2015May sdc #102 - Change the term EMR to EHR.
- 6886 2015May sdc #103 - Change CER to PCOR
- 6887 2015May sdc #104 - Change to PCOR use case
- 6888 2015May sdc #105 - Reword introduction section
- 6889 2015May sdc #106 - Forms are not part of an EHR
- 6893 2015May sdc #110 - Correct link
- 6895 2015May sdc #112 - Make endpoint 1.0*. 
- 6897 2015May sdc #114 - Resource is imperrutable
- 6898 2015May sdc #115 - Repetition spelled incorrectly
- 6899 2015May sdc #116 - Add pre-population
- 6901 2015May sdc #118 - Explain signatures of forms with Provenance
- 6904 2015May sdc #126 - Why are extensions needed for answer list?
- 6905 2015May sdc #127 - Why is options a reference rather than a list of embedded content
- 6906 2015May sdc #128 - How do you nest questions under answers?
- 6907 2015May sdc #130 - Valueset could not be expanded
- 6910 2015May sdc #133 - why does the sentences states value set has 0 concepts?
- 6911 2015May sdc #134 - Duplicate "used in"
- 6912 2015May sdc #135 - Episodes of Care can overlap and reference the same encounter
- 6913 2015May sdc #136 - How are "append" relationships handled?
- 6914 2015May sdc #137 - removal of the sentence, removes the issue.
- 6917 2015May sdc #140 - Simply wording about Narrative
- 6918 2015May sdc #141 - What's relationship between class and type
- 6919 2015May sdc #142 - Assert no context flow
- 6920 2015May sdc #143 - Add Author to list
- 6922 2015May sdc #145 - Request that max count be unbounded
- 6923 2015May sdc #146 - Request that max count be unbounded
- 6925 2015May sdc #148 - Inclusion of pagers for contact
- 6927 2015May sdc #150 - A requested fix for profiling.
- 6928 2015May sdc #151 - Make Race and Ethnicity core
- 6931 2015May sdc #154 - Distinguish primary contact
- 6934 2015May sdc #156 - How does escaping work in composite URI searches?
- 6935 2015May sdc #157 - Provide example post requests for complex operations such as the different variants of $validate-code
- 6937 2015May sdc core #2 - Add description to AllergyIntolerance
- 6938 2015May sdc core #3 - Appointment/Encounter Referencing
- 6944 2015May sdc core #9 - Make reason 0..*.
- 6945 2015May sdc core #10 - Make reasonReference 0..*
- 6946 2015May sdc core #11 - Typo on goal
- 6947 2015May sdc core #12 - Add CarePlan.description
- 6949 2015May sdc core #14 - Expand on potential uses
- 6950 2015May sdc core #15 - Message can be sent to many recipient (recipient 0..*). How will the sender know if the message was received by all of them?
- 6952 2015May sdc core #17 - Explain contraindication.author
- 6954 2015May sdc core #19 - Clarification needed - is this who authored the documents in the set? Or is this who authored the document manifest?
- 6955 2015May sdc core #20 - Typo - thorough needs a g
- 6956 2015May sdc core #21 - Typo - change my to by
- 6958 2015May sdc core #23 - Need to identify generic maternal/paternal relationships without specific family member
- 6960 2015May sdc core #25 - Typo - remove "for use"
- 6969 2015May sdc core #34 - typo - fix location of opening parenthesis.
- 6972 2015May sdc core #37 - Make address 0..*
- 6975 2015May sdc core #40 - GET should be POST, name changed
- 6977 2015May sdc core #42 - GET should be POST, name is wrong
- 6983 2015May sdc core #48 - Missing www
- 6984 2015May sdc core #49 - Unabbreviate name
- 6985 2015May sdc core #50 - No detail regarding the Risk Assessment issue
- 6986 2015May sdc core #51 - Typo - missing closing bracket
- 6987 2015May sdc core #52 - In the notes, the incorrect line is stated in reference to the resource's id
- 6988 2015May sdc core #53 - Make last updated match last-modified
- 6989 2015May sdc core #54 - Add HTTP headers to example
• 6990 2015May core #55 - Change "SearchResults" -> Bundle
• 6991 2015May core #56 - Incorrect line number for meta.lastUpdated
• 6992 2015May core #57 - Incorrect line number for base
• 6993 2015May core #58 - Incorrect line number for total
• 6994 2015May core #59 - Incorrect line number for link
• 6995 2015May core #60 - "item" should be "entry" with correct line number
• 6996 2015May core #61 - Typo in word "exist"
• 6997 2015May core #62 - Incorrect line number for id
• 6998 2015May core #63 - It would be useful to have the Update Response return an HTTP Location header with the Updated Resource's new location on the service
• 6999 2015May core #64 - Spelling typo
• 7000 2015May core #65 - Unclosed bracket typo.
• 7001 2015May core #66 - "[Missing]" suggests the spec is incomplete.
• 7002 2015May core #67 - Use "individual resource level"
• 7003 2015May core #68 - Invariants Section content missing
• 7004 2015May core #69 - Table contains a number of values under Status with "Unknown - not stated by committee"
• 7005 2015May core #70 - Typo in word "that"
• 7006 2015May core #71 - Typo in word "is"
• 7007 2015May core #72 - TBD in table of registries
• 7008 2015May core #73 - Missing section on Canonical XML
• 7009 2015May core #74 - todo - develop this at top of section
• 7011 2015May core #76 - remove references to value set from Coding
• 7013 2015May core #78 - Missing introduction or no introduction?
• 7014 2015May core #79 - Content is "todo"
• 7015 2015May core #80 - Missing link
• 7016 2015May core #81 - Response: Happy with mandatory SSL/TLS+Server Certificate, and optional client certificate authentication.
• 7017 2015May core #82 - Spelling typo
• 7018 2015May core #83 - Response: Specifying paging support would be a welcome addition and would further increase interoperability.
• 7019 2015May core #84 - Spelling typo
• 7020 2015May core #85 - Grammar around "the criteria is expressed."
• 7021 2015May core #86 - Typo around "On"
• 7022 2015May core #87 - client makes the call, not the server
• 7023 2015May core #88 - It would be useful and informative to demonstrate how this process fulfills the original problem statement in the beginning of this section.
• 7024 2015May core #89 - Typo around "if they are do not"
• 7025 2015May core #90 - Missing content / TODO
• 7026 2015May core #91 - Disagree with timezone approach
• 7027 2015May core #92 - Missing content / TODO
• 7030 2015May core #95 - State whether translation codes are allowed and evaluated
• 7031 2015May core #96 - State whether translation codes are allowed and evaluated
• 7032 2015May core #97 - Reference to feed.category is incorrect.
• 7033 2015May core #98 - More documentation for "cert"
• 7034 2015May core #99 - Content comes from SDC
• 7036 2015May core #101 - Specification generation/tooling error
• 7038 2015May core #103 - Missing content
• 7039 2015May core #104 - List includes "Other" instead of "Basic"
• 7041 2015May core #106 - It would be helpful if this value set had a code to indicate a List is accurate within the context it is used in
• 7042 2015May core #107 - Missing content / TODO
• 7043 2015May core #108 - Add constraint around Locked Date wrt referenced versions
• 7044 2015May core #109 - Is the code list complete and sufficient?
• 7047 2015May core #112 - Explain relationship between AllergyIntolerance and RiskAssessment
• 7052 2015May core #117 - Agree, this isn't necessary.
• 7053 2015May core #118 - What is the recommended approach for recording alerts?
• 7054 2015May core #119 - Typo
• 7055 2015May core #120 - Explain how No Known Allergies is handled
• 7056 2015May core #122 - Did you consider making the status mandatory (1..1)? What does it mean when an AllergyIntolerance is returned with this field empty?
• 7058 2015May core #124 - The movement of sunlight out of this resource directly is different than the design in C-CDA design.
• 7059 2015May core #125 - Remove sentence on 5%
• 7060 2015May core #126 - Typo
• 7061 2015May core #127 - Add mime type list
• 7069 2015May core #128 - Is the person that Authored the plan always the one responsible for the plan? Would it better to say who 'wrote' the plan?
• 7070 2015May core #129 - Please add a suggested value set
• 7072 2015May core #131 - Did you consider making the title 1..1 if the section is present?
• 7073 2015May core #132 - What is the use case for not having a title?
• 7075 2015May core #134 - there's is misspelled
• 7076 2015May core #135 - Remove "are"
• 7077 2015May core #136 - resource misspelled
• 7078 2015May core #137 - whether should not be capitalized
• 7079 2015May core #138 - Copy and paste from 1.12.2
• 7080 2015May core #139 - Copy and paste from 1.12.2
• 7081 2015May core #140 - "that" should be "than"
• 7082 2015May core #141 - "an" should be "a"
• 7083 2015May core #142 - Missing "IDs"?
• 7084 2015May core #143 - Is there a need for a non-bulleted list? list-style-type:none
• 7086 2015May core #145 - Should communication also include a preferable method such as sign language, Braille, email, telephone, etc.
• 7087 2015May core #146 - Is the priority property the patient's priority or the practitioner's priority? Shouldn't both be represented as they may not be the same?
• 7088 2015May core #147 - Both example links return 404.
• 7089 2015May core #148 - "activity" should be "activities"
• 7090 2015May core #149 - "A" should be "An"
• 7091 2015May core #150 - Remove "a"
• 7092 2015May core #151 - Remove the phrase "consumer level" from the introduction.
• 7093 2015May core #152 - Remove the first occurrence of the word "a" in this sentence.
• 7094 2015May core #153 - Change semicolon to a colon, correct spelling of "differently," and add a period at the end of the sentence.
• 7095 2015May core #154 - Move the sentence to section 1.23.6.3.1, and consider expanding it.
• 7096 2015May core #155 - Change "a code" in the first sentence to "codes."
• 7097 2015May core #156 - Capitalize the abbreviation "URL."
• 7103 2015May core #158 - Word ending over complex?
• 7107 2015May core #166 - Request that max count be unbounded
• 7118 2015May core #177 - Explain whether Contraindication is definition or instance
• 7121 2015May core #180 - Statuses aren't sufficient
• 7123 2015May core #182 - What's difference between Procedure.category and type?
• 7124 2015May core #183 - Use approach site, not target
• 7125 2015May core #184 - Don't make Procedure.outcome codes
• 7126 2015May core #185 - Procedure.complication should be narrative
• 7127 2015May core #186 - Procedure.relatedItem is too complicated - make it extension
• 7129 2015May core #188 - Procedure.device is too vague
• 7133 2015May core #192 - Differentiate placer & filler ids
• 7134 2015May core #193 - Rename clinicalNotes to reason or indication
• 7135 2015May core #194 - supporting information isn't clear, includes errors
• 7137 2015May core #196 - Declare relationship with IEEE 11073
• 7141 2015May core #200 - What unit codes are to be used?
• 7143 2015May core #202 - needs more description. Doubt they are talking about color as in the light spectrum, so need something that ordinary folks can understand
• 7144 2015May core #203 - Believe this is really the sampling rate of a signal. If so that should be stated more clearly
• 7148 2015May core #207 - Explain Aggar example
• 7149 2015May core #208 - very unclear. Is this in case it is Coded with exceptions variable gets a free text answer... Need an example
• 7150 2015May core #209 - test not done was reported as part of the status in V2. Would make sense to stay with that both for continuity and because it is NOT really an answer
• 7152 2015May core #211 - to whom. Think it is usually when made available to the clinical providers. It may be available earlier within lab but not yet "verified"
• 7154 2015May core #213 - Explain reliability
• 7155 2015May core #214 - add "instance" to end after "observation". Might comment on the scope of uniqueness. globally unique or unique in the context of the sources
• 7156 2015May core #215 - insert "donor" after fetus
• 7157 2015May core #216 - Subject can be communicated within Observation.code
• 7158 2015May core #217 - change "are often" to "may be"
• 7160 2015May core #219 - Explain grouping more
• 7161 2015May core #220 - Related type is unneeded complexity
• 7167 2015May core #226 - Clarify purpose of MedicationStatement
• 7168 2015May core #227 - Loosen who can capture MedicationStatement
• 7170 2015May core #229 - would help in the US to say this would usually be the RxNorm clinical drug code as mandated by MU regulation
• 7172 2015May core #231 - Does NutritionOrder include hyperalimentation?
• 7175 2015May core #234 - How to handle confusion between intolerance vs. preference
• 7176 2015May core #235 - How to handle confusion between intolerance vs. preference vs. excludeFood
• 7178 2015May core #237 - Distinguish what's in internal order vs. provider order (amount)
• 7184 2015May core #243 - Use route rather than enteral formula
• 7187 2015May core #246 - Add reference to panels & batteries
• 7191 2015May core #250 - add "(revised)" for clarity after updated.
• 7193 2015May core #253 - Overlap of Procedure and Observation is going to be a problem
• 7202 2015May core #262 - Explain how terminology works with local vs. standard code sets.
• 7204 2015May core #264 - Typo - "and" misspelled in second sentence
• 7205 2015May core #265 - Don't understand code system and value set distinction
• 7207 2015May core #267 - Don't use ValueSet for answer lists
• 7210 2015May core #270 - Errors in examples.
• 7211 2015May core #271 - Don't use both SNOMED and LOINC
• 7212 2015May core #272 - no one would do this. Further the oral temperature does not literally measure any thing about the body as a whole
• 7213 2015May core #273 - no one would do this either if the measure is called oral temperature
• 7214 2015May core #274 - Narrative doesn't reflect how data would be reported
• 7219 2015May core #279 - Need phase abnormal flag
• 7220 2015May core #280 - what are these symbols?
• 7222 2015May core #282 - Which are master files vs. patient-specific elements. ClinicalImpression is problematic
• 7223 2015May core #283 - should be distinguished as a master file or knowledge base not patient specific
• 7224 2015May core #284 - Use MedicationOrder rather than MedicationRequest
• 7226 2015May core #286 - more often this will be data about a dispensing. The distinction based on how it arrived is not good
• 7227 2015May core #287 - This is described as an issues at to whether it should be separate
• 7229 2015May core #289 - Use MedicationOrder rather than MedicationRequest
• 7230 2015May core #290 - the LOINC code for blood culture is 600-7 Bacteria identified in Blood by Culture
• 7231 2015May core #291 - Don't use both SNOMED and LOINC
• 7232 2015May core #292 - "entire body" is a bad example
• 7233 2015May core #293 - Fix examples to show pre-coordinated formula
• 7234 2015May core #294 - Use LOINC instead of SNOMED
• 7237 2015May core #297 - Errors in examples
• 7243 2015May core #303 - Don't know what is included
- 7387 2015May core #577 - Add link to documents from Resources page under "Documents & Structure" heading
- 7388 2015May core #578 - Soften language on presentation of the document changing.
- 7392 2015May core #582 - Reword definition
- 7393 2015May core #583 - Remove "final mode" and clarify description of changes list.
- 7394 2015May core #584 - Where is narrative found in a resource?
- 7395 2015May core #585 - Saying "base" resource could be confusing since there is a specific "Base Resource" section (1.10) in the FHIR spec.
- 7396 2015May core #586 - Typos
- 7397 2015May core #587 - Remove (or deprecate) this from the Basic Resource Types value set because Slot is already a FHIR resource in the Scheduling/Ordering category.
- 7398 2015May core #588 - Link is broken, sentence is confusing
- 7399 2015May core #589 - Typos
- 7401 2015May core #591 - Distinguish "element" vs. "backbone element"
- 7402 2015May core #592 - The URL does not work, produces an HTTP 404 error.
- 7403 2015May core #593 - Description of the rules on human-readable text aren't completely accurate
- 7404 2015May core #594 - Is narrative the same for documents vs. other mechanisms?
- 7405 2015May core #595 - Example implies MedicationStatement is a summary, when summary is List
- 7407 2015May core #597 - CarePlanActivityCategory shouldn't be required
- 7408 2015May core #598 - Typos
- 7410 2015May core #600 - Suggest providing a clarification to explicitly allow deprecation (sometimes it just makes sense).
- 7411 2015May core #601 - Typos
- 7412 2015May core #602 - ToC links to wrong page
- 7413 2015May core #603 - Typos, phrase is vague
- 7414 2015May core #604 - How does OperationOutcome represent business issues?
- 7415 2015May core #605 - ToC links to wrong page
- 7417 2015May core #607 - ToC links to wrong page
- 7418 2015May core #608 - Contradiction in definition of Device.location
- 7420 2015May core #610 - ToC links to wrong page
- 7421 2015May core #611 - Typo
- 7422 2015May core #612 - Typo
- 7423 2015May core #613 - Typo
- 7426 2015May core #714 - Reference any resource in Document manifest
- 7427 2015May core #715 - Reference any resources in Document manifest
- 7428 2015May core #716 - Using of Snomed CT
- 7400 2015May core #590 - It does not say where to submit the request for a new code. FHIR Management Group? Vocabulary WG? Where? I suggest that be included in the text.
- 7429 2015May core #717 - Using of Snomed CT
- 7430 2015May core #718 - Harmonization with ISO EN 13606
- 7431 2015May core #719 - AuditEvent source identifier
- 7438 2015May core #726 - Provide help text for flags column
- 7439 2015May core #727 - Typo
- 7440 2015May core #728 - hyperlink is to #modifier, but that does not exist on this page, probably should be to #1.16.0.2
- 7441 2015May core #729 - hyperlink is to search.html#mustSupport, but that does not exist on this page, probably should be to #2.1.1.4.7
- 7444 2015May core #732 - ... except... except what? Seems like there is something missing from the sentence
- 7445 2015May core #733 - nice file cabinet, folder, versioning analogy, but think that read needs to specify it gets the paper from the top of the folder
- 7446 2015May core #734 - missing a space between appropriate and cabinet
- 7447 2015May core #735 - resource instead of resource
- 7448 2015May core #736 - Need life-cycle declared everywhere
- 7450 2015May core #738 - How is unknown extensions support declared?
- 7452 2015May core #740 - How do we avoid duplicate extensions?
- 7454 2015May core #742 - Can only one be declared as primary? Can none?
- 7456 2015May core #744 - The existing text seems to have a sentence fragment and the meaning is unclear.
- 7457 2015May core #745 - should allow for multiple Coding returned, with at most one marked as primary
- 7459 2015May core #747 - Why are_text and _filter missing?
- 7460 2015May core #748 - Allow non-resources to be focus of Provenance
- 7463 2015May core #751 - patient compartment should be lowercase patient, not uppercase Patient, which would be the resource.
- 7464 2015May core #752 - "patient" has wrong case
- 7466 2015May core #754 - Don't snip narrative
- 7468 2015May core #756 - Explain issues around cross-origin resource sharing
- 7469 2015May core #764 - Typo-Binding Definitions
- 7470 2015May core #765 - Finding the Table of Contents and Section numbers
- 7471 2015May core #766 - Clinical Resources vs. Administrative Resource
- 7472 2015May core #767 - Problems with the section "Mixing Custom and Standard Terminologies"
- 7473 2015May core #768 - Permit a code for a MedicationStatement's Medication
- 7476 2015May core #771 - Rendering of choice cardinals
- 7477 2015May core #772 - Guide to Resources needed
- 7479 2015May core #774 - 5.1 isn't referenced in TOC correctly
- 7480 2015May core #775 - These appear to be the same value set but are referenced with different names.
- 7481 2015May core #776 - Value set link broken
- 7482 2015May core #777 - This comment appears to be left over from when dosage was 0..* and is no longer appropriate now that dosage is 0..1.
- 7483 2015May core #778 - consistency of FamilyMemberHistory's condition with the Condition resource
- 7484 2015May core #779 - Clarify Data Element Boundaries and Relationships
- 7485 2015May core #780 - Typos in Data Elements vs. Codes
- 7487 2015May core #782 - Suggested grammar fix in 6.21.8.1
- 7488 2015May core #783 - Clarification needed on the use of Data Element with other resources
- 7489 2015May core #784 - Typo in 1.23.0.0.1
- 7490 2015May core #785 - Grammar in 1.23.0.1
- 7491 2015May core #786 - Typo in 1.23.0.1
• 7492 2015May core #787 - Typo in 1.23.1.1.5
• 7493 2015May core #788 - Sentence re-write is needed.
• 7494 2015May core #789 - Appropriateness of each coded data type
• 7495 2015May core #790 - Typo in 1.23.0.2.1
• 7496 2015May core #791 - Clarify preferred
• 7497 2015May core #792 - Omitted words in Discriminator discussion
• 7498 2015May core #793 - Fix incomplete sentence in Discriminator examples.
• 7499 2015May core #794 - Fix numbering of extensions in Slicing Examples
• 7500 2015May core #795 - DiagnosticReport.issued -- change to instant?
• 7502 2015May core #797 - Question about ordering
• 7503 2015May core #798 - Nested lists?
• 7504 2015May core #799 - History of
• 7505 2015May core #800 - FamilyMemberHistory search parameters needed
• 7506 2015May core #801 - Enforce identifier search parameter
• 7511 2015May core #802 - Make names consistent between Procedure and Encounter
• 7513 2015May core #804 - MedicationStatement should allow dose range
• 7514 2015May core #805 - MedicationStatement- medication as code not Reference(Medication)
• 7515 2015May core #806 - rename MedicationStatement.dosage.schedule to MedicationStatement.dosage.timing
• 7517 2015May core #808 - Bring back Observation.component
• 7518 2015May core #809 - Immunization.protocol cardinality
• 7519 2015May core #810 - Immunization.protocol.does* cardinality
• 7521 2015May core #812 - ICD-9 system URLs
• 7522 2015May core #813 - URL for National Provider
• 7524 2015May core #815 - URL for NDC
• 7525 2015May core #816 - MedicationStatement.status definitions
• 7527 2015May core #818 - Communication.party role type not known?
• 7528 2015May core #819 - DocumentManifest.recipient role type not known?
• 7529 2015May core #820 - ElementDefinition should support quantities too
• 7530 2015May core #821 - remove ElementDefinition.binding.name
• 7534 2015May core #825 - remove page toc
• 7535 2015May core #826 - change driver’s license to naming systems
• 7536 2015May core #827 - Document.xml.lang system URI
• 7537 2015May core #828 - fix json description
• 7538 2015May core #829 - sort out xml attribute whitespace
• 7539 2015May core #830 - PATCH operation
• 7540 2015May core #831 - Fetch by profile
• 7541 2015May core #832 - Simply conditional create header
• 7542 2015May core #833 - registry URLs
• 7543 2015May core #834 - include transmissiveness
• 7544 2015May core #835 - improve transaction documentation
• 7545 2015May core #836 - transaction and base interaction
• 7547 2015May core #838 - Observation.value= true|false
• 7549 2015May core #840 - MedicationAdministration.dosage.method duplication
• 7550 2015May core #841 - AllergyIntolerance negation
• 7551 2015May core #842 - Current Problem List
• 7552 2015May core #843 - Spelling error in 1.23.6.3
• 7553 2015May core #844 - Spelling error in 1.23.6.11
• 7554 2015May core #845 - Spelling error in 6.21.6
• 7555 2015May core #846 - Spelling error in 6.21.7
• 7556 2015May core #847 - Missing entries in table in section 6.21.7.1
• 7557 2015May core #848 - Spelling error in
• 7558 2015May core #849 - militaryservice extension isn’t useful
• 7564 2015May core #855 - AuditEvent.event value set is a mess
• 7565 2015May core #856 - Fix link
• 7566 2015May core #857 - Use the correct term for the AuditEvent.object.sensitivity. This should be AuditEvent.object.confidentiality.
• 7572 2015May core #863 - Explain business-specific details of update
• 7574 2015May core #865 - Add conformance keywords to allow more precision and improve testability. "S" for mandatory is insufficient.
• 7575 2015May core #866 - Support profiling a profile
• 7576 2015May core #867 - How do we specify an "active" or "resolved" problem?
• 7582 2015May core #873 - How do we specify an "active" or "resolved" allergy?
• 7583 2015May core #874 - We need a status to specify whether the med is "active" vs. "discontinued" meds?
• 7587 2015May core #878 - body site is overly complicated (Observation)
• 7589 2015May core #880 - body site is overly complicated (Condition)
• 7590 2015May core #881 - Require GMDN as device kind
• 7591 2015May core #882 - Don’t allow local/proprietary codes
• 7592 2015May core #883 - This binding strengths would allow for gaps in value sets to persist.
• 7593 2015May core #884 - Wordings should be updated to reflect the appropriate SNOMED CT concept.
• 7594 2015May core #885 - Wordings should be updated to reflect the appropriate SNOMED CT concept.
• 7595 2015May core #890 - Typo
• 7596 2015May core #900 - The definition is ambiguous. What does "nominated care provider" mean? Is it the primary care provider?
• 7597 2015May core #901 - Make managing organization 0..*?
• 7598 2015May core #904 - How is encounter diagnosis handled?
• 7599 2015May core #905 - Condition.encounter -> firstEncounter
• 7600 2015May core #906 - If wish to capture date first asserted, should add a sibling attributed called dateFirstAsserted.
• 7601 2015May core #908 - Is Working vs. Confirmed in the 80%?
• 7602 2015May core #909 - Please clarify when/how Range is supposed to be used for Condition.range, abatement
• 7620 2015May core #911 - Are Condition.stage, evidence, dueTo and occurredFollowing in the 80%?
• 7621 2015May core #912 - Aren't these all similar items? Shouldn't they all be called target or detail?
• 7622 2015May core #913 - Allow structures in notes, make 0..*
• 7626 2015May core #917 - ContactPoint should provide a 'rank' attribute
• 7629 2015May core #920 - Suggest renaming to 'bodySite' or 'affectedSite'
• 7630 2015May core #921 - Suggest renaming to 'targetBodySite'. There may be other body sites associated with procedure (e.g., approachBodySite)
• 7631 2015May core #922 - Procedure.device -> targetDevice
• 7633 2015May core #924 - Procedure has evolved since ProcedureRequest was drafted. Suggest re-aligning the two resources to account for changes in one, relevant to the other.
• 7634 2015May core #925 - Procedure.notes is 0..1. ProcedureRequest.notes is 0..*_. Suggest updating both resources based on comment number 19.
• 7636 2015May core #927 - Should 'applies' be renamed to 'physiologicallyRelevant[x]' While short names are good, they must also be more descriptive.
• 7639 2015May core #930 - What's difference between has component and has member?
• 7640 2015May core #931 - Align prescription.status with other resources (e.g. Planned, proposed)
• 7647 2015May core #938 - Recommend renaming to administrationSite
• 7650 2015May core #941 - Typo
• 7651 2015May core #942 - Need to categorize re-admissions
• 7652 2015May core #943 - Extra 'is'.
• 7653 2015May core #944 - Bindings aren't mutually exclusive
• 7654 2015May core #945 - Dietary preference to 0..*
• 7655 2015May core #946 - Recommend renaming this to referralRequestFulfilled
• 7659 2015May core #950 - Where are the present-on-admission diagnoses?
• 7660 2015May core #951 - Why is this 0..1? Are all the other discharge diagnoses supposed to be elsewhere, e.g., under reason?
• 7662 2015May core #953 - How is a diagnostic report not a diagnostic report?
• 7663 2015May core #954 - Explain most common types of data exchange
• 7669 2015May core #960 - Reading through the resource description it's still unclear how to represent an appointment request. Please clarify.
• 7670 2015May core #961 - Differentiate ReferentialActionRequest and AppointmentRequest
• 7672 2015May core #963 - Please populate the actual value set or at least provide a good set of examples based on the logical specification of the value set.
• 7678 2015May core #969 - The text says the contextType shall always be populated, but the definition has it as optional
• 7679 2015May core #970 - Please update use case. From a clinical perspective performing a CT scan for further investigation of an elevated PSA level would be unusual.
• 7681 2015May core #972 - In three cases Retrieve URL maps to the DICOM attribute (0008,1190). Do we really need 4 Retrieve URls for the ImagingObjectSelection resource?
• 7682 2015May core #973 - Need to reference key images too
• 7684 2015May core #975 - Need to distinguish pathologist from technologist comments
• 7687 2015May core #978 - Add authorization qualifier to 'history'
• 7693 2015May core #984 - Who or what should sign a bundle and how is this used? RBAC? What happens if a transaction is not signed?
• 7694 2015May core #985 - Summary says 9 mandatory elements, but only see 1
• 7696 2015May core #987 - Please write this section.
• 7702 2015May core #993 - Can signature be captured by blob?
• 7709 2015May core #1010 - Suggest updating the name of this grouping so it does not conflict with the proper grouping for Medications and Immunizations.
• 7731 2015May core #1022 - Possible additional text for improved understanding.
• 7732 2015May core #1023 - Clarification
• 7733 2015May core #1024 - Missing attribute?
• 7734 2015May core #1025 - Suggest update definition.
• 7735 2015May core #1026 - Clarification
• 7736 2015May core #1027 - Seeking clarification.
• 7737 2015May core #1028 - Suggest adding more info in the comment.
• 7739 2015May core #1030 - If a system wants to communicate the manufacturer, brand, form, packaging, etc., they Should use the full Medication Resource.
• 7743 2015May core #1034 - Suggest updating this introduction text and fixing the link to the example SNOMED CT value set.
• 7744 2015May core #1035 - Suggested edit removed parens.
• 7745 2015May core #1036 - Fix typo
• 7746 2015May core #1037 - Fix the link
• 7750 2015May core #1071 - Rationalize the design of Provenance Resource and decouple from AuditEvent.
• 7751 2015May core #1072 - Replace Provenance extension
• 7753 2015May core #1074 - The use of the DocumentReference.confidentiality element is not conformant with the HCS requirements on Security Labels. This needs to be fixed.
• 7757 2015May core #1078 - Add David Hays excellent description of the Operations Framework to the top of operations.html.
• 7759 2015May core #1080 - It is not clear where CORE extensions begin, DAF extensions begin and QICore extensions begin
• 7760 2015May core #1081 - Add dependsOn element as an input Parameter with parts, and product as an output Parameter with parts.
• 7761 2015May core #1082 - Allow ConceptMap/Translate to have multiple outcomes
• 7765 2015May core #1086 - Harmonize AllergyIntollerance.event, Contraindication and Immunization.reaction
• 7779 2015May core #1100 - Epub is corrupted
• 7782 2015May core #1103 - Default cardinality of ElementDefinition min and max is undefined
• 7785 2015May core #1106 - Make sections of the full table of contents expandable/contractible
• 7786 2015May core #1107 - Need best-practice documentation for creating profiles
• 7787 2015May core #1108 - Need to create and document processes for achieving interoperability using FHIR
• 7788 2015May core #1109 - The normative information on a profile needs to be separable from the rest of FHIR
• 7795 2015May core #1117 - In profiles, a better way to constrain resource references is needed.
• 7796 2015May core #1118 - No way to restrict Resource(Any)
• 7797 2015May core #1119 - Concept look up operation may duplicate functionality
• 7799 2015May core #1121 - Need to list complete rules of what is allowed/not allowed for overrides in derived profiles (cardinality, type, etc.)
• 7800 2015May core #1122 - Tools aren't checking cardinality alignment
• 7801 2015May core #1123 - Need to list complete rules of what is allowed/not allowed for overrides in derived profiles with respect to binding and conformance strength.

• 7802 2015May core #1124 - Tools aren't checking binding strength alignment.

• 7804 2015May core #1126 - Better documentation and examples for extensions both simple primitive and more complex structures.

• 7851 2015May core #1170 - Condition.clinicalStatus HL7v2 mapping.

• 7845 2015May core #1174 - Encounter.type HL7v2 mapping.

• 7855 2015May core #1175 - Condition.asserter definition clarification.

• 7856 2015May core #1176 - Introducing HL7 FHIR page needs to update its Patient example.

• 7857 2015May core #1177 - Base Resource Definition page has a misspelled word (resource).

• 7858 2015May core #1178 - Patient Cause of Death.

• 7859 2015May core #1179 - Condition.dateAsserted definition clarification.

• 7864 2015May core #1184 - Condition.clinicalStatus should not convey both record status (in error) and confirmation Status (working, confirmed, refuted).

• 7866 2015May core #1186 - Add comments or notes to the Immunization resource.

• 7867 2015May core #1187 - Add a record status to communicate active, in error, cancelled.

• 7868 2015May core #1188 - Add Encounter to Risk Assessment.

• 7870 2015May core #1190 - Add Goal.Informant.

• 7873 2015May core #1193 - Period dates in the future.

• 7874 2015May core #1194 - Patient.careProvider HL7v2 mapping.

• 7875 2015May core #1195 - Appointment.reason HL7v2 mapping.

• 7876 2015May core #1196 - Questionnaire.name.

• 7878 2015May core #1198 - Attachment.contentType has conflicting documentation.

• 7883 2015May core #1203 - Add encounter to list.

• 7884 2015May core #1204 - Add Goal.category.

• 7885 2015May core #1205 - Add Goal.startDate.

• 7886 2015May core #1206 - Communication support for phone calls.

• 7887 2015May core #1207 - Immunization.date optional.

• 7889 2015May core #1208 - Encounter participant definition.

• 7889 2015May core #1209 - Using Codes in Resources typo correction.

• 7891 2015May core #1211 - Search-specific page needs to clarify what URL POST should be supported against.

• 7892 2015May core #1212 - Under "identity", it states that if ports differ, the identity of the resource differs, but specifically mentions that http is equivalent to https. This conflicts.

• 7894 2015May core #1214 - Rename AllergyIntolerance.event.

• 7895 2015May core #1215 - "related things" to "Related identifiers or resources associated with the DocumentReference".

• 7896 2015May core #1216 - Encounter Status Management typos.

• 7897 2015May core #1217 - Should immunization be searchable by subject since there is no subject parameter (if yes, should AllergyIntolerance be searchable by subject?)

• 7897 2015May core #1218 - More clarification is needed around how to query for a subset of observations (vitals, labs, social history, etc.).

• 7902 2015May core #1222 - Clarify the purpose of FHIR Core Profiles.

• 7903 2015May core #1223 - Clarify boundary and relationships between Communication and Encounter.

• 7906 2015May core #1226 - Encounter condition relationship.

• 7907 2015May core #1227 - RESTful special characters.

• 7908 2015May core #1228 - Add AllergyIntolerance.severity.

• 7909 2015May core #1229 - Flag Summary Search broken hyperlink.

• 7911 2015May core #1231 - MedicationStatement updates.

• 7912 2015May core #1232 - More timing examples.

• 7913 2015May core #1233 - MedicationStatement.status clarification.

• 7914 2015May core #1234 - IV infusion timing.

• 7915 2015May core #1235 - These concepts need to be split. CRFs is a reserved word in context to clinical trial, data collection.

• 7921 2015May core #1241 - Require 403 Response for Unauthorized Access.

• 7924 2015May core #1244 - Clarify content-location for Reads without Versioning support.

• 7925 2015May core #1245 - Clarification on Resource + OperationOutcome versioning.

• 7926 2015May core #1246 - Remove support for conditional updates.

• 7927 2015May core #1247 - Remove support for conditional deletes.

• 7928 2015May core #1248 - Remove support for conditional creates.

• 7929 2015May core #1249 - Make version metadata support on Creates conditional on version support by servers.

• 7931 2015May core #1251 - Further clarification for variant searches within compartments.

• 7932 2015May core #1252 - Make Etag support for Conformance optional.

• 7933 2015May core #1253 - Remove Transaction requirement for History interaction.

• 7934 2015May core #1254 - Remove SHOULD stipulation for Server Content Manipulation.

• 7935 2015May core #1255 - Transaction Integrity Guidelines in Read and Search.

• 7941 2015May core #1261 - Unclear wording in field requirements in ReferralRequest.

• 7944 2015May core #1264 - Change Asynchronous Operation execution to use Callback URLs.

• 7946 2015May core #1266 - Clarify Document Immutability for Indirect Resource References.

• 7953 2015May core #1273 - Only support POST for FHIR RESTful Search.

• 7954 2015May core #1274 - Remove_language query parameter support.

• 7955 2015May core #1275 - Modifiers should modify content, not names.

• 7957 2015May core #1277 - Alternative suggestion for Date Ranges.

• 7961 2015May core #1281 - Modify Name of Substance.Type Property.

• 7962 2015May core #1282 - Add class property to Substance.

• 7968 2015May core #1286 - Limit Scope of Composition Resource to Documents.

• 7971 2015May core #1291 - Overlap of elements in DocumentReference and Provenance.

• 7972 2015May core #1292 - add code for 'legalAuthenticator'

• 7973 2015May core #1293 - The value set for .entity.type is listed as Required and is composed of FHIR resources, I think this is an error and should be "extensible".

• 7974 2015May core #1294 - Add organization to reference types.

• 7975 2015May core #1295 - Add 'entity' and 'entitytype' as query parameters for provenance.

• 7976 2015May core #1296 - Add option for a receiver to send responses to mailbox endpoint of the source.
• 7980 2015May core #1300 - The phrase literal isn't used until the "Business Identifier" section and it's unclear whether the spec is referring to id or identifier.
• 7981 2015May core #1301 - Typo
• 7982 2015May core #1302 - A simple example, or reference to search, on how to access by business identifier rather than literal resource id might help the new reader.
• 7983 2015May core #1303 - Please spell PI out. Protected information?
• 7984 2015May core #1304 - Does this mean OperationOutcome .issue.severity cannot = error? Why?
• 7985 2015May core #1305 - Typo
• 7986 2015May core #1306 - If possible, add link also.
• 7988 2015May core #1312 - Did you consider creating a diagram for this section?
• 7989 2015May core #1313 - Which status corresponds to admitted?
• 7990 2015May core #1314 - Clarify search returns
• 7991 2015May core #1315 - Does including this in a ballot upgrade the status to proposed? Where can folks track the discussion on this resource?
• 7992 2015May core #1316 - The examples in other spots are very helpful
• 7993 2015May core #1317 - The examples in other spots are very helpful
• 7994 2015May core #1318 - How did the authors decide to include 'to 2 significant figures'? In the next row it states 'to 4 significant figures'.
• 7995 2015May core #1319 - Allow a codeableConcept in addition to the ability to reference Medication Resource. It's very common to just record the medication code.
• 7997 2015May core #1321 - Please add an example.
• 7998 2015May core #1322 - The other sections use the first sentence to define the parameter -- would be great to follow pattern here.
• 7999 2015May core #1323 - Just trying to highlight difference with parallel sentences.
• 8001 2015May core #1325 - Typo
• 8002 2015May core #1326 - Add mode parameters as a value set.
• 8003 2015May core #1327 - Add examples for FHIR operations
• 8004 2015May core #1328 - Add example for code:in
• 8013 2015May core #1338 - When would you ever record a MedicationStatement without a patient?
• 8014 2015May core #1339 - Where would you put a free text SIG? Please include guidance somewhere on this page: /medicationstatement-definitions.html#MedicationStatement.note
• 8015 2015May core #1340 - Did you consider allowing a link between MedicationPrescriptions when the status is superceded?
• 8019 2015May core #1344 - Typo
• 8020 2015May core #1346 - Please add detail on when you expect to just use the MedicationPrescription.dispense vs the full MedicationDispense resource.
• 8022 2015May core #1347 - The value set appears to be route codes. Please update to be medication codes. Linked to the page from Medication. code: /medication.html
• 8023 2015May core #1348 - How did you decide to include this field? Isn't this available through the Medication.code and/or Medication. package?
• 8024 2015May core #1349 - Not clear what framework is referenced here?
• 8026 2015May core #1351 - Clarify resource inclusion in document bundle
• 8027 2015May core #1352 - How would a stylesheet render a document unsafe if it doesn't alter the presentation? Is a common stylesheet supplied?
• 8028 2015May core #1353 - Link to "Profile Tags" is incorrect - takes you to compartment based access Why wouldn't you use the meta tag in the composition resource?
• 8032 2015May core #1357 - Code inconsistent
• 8034 2015May core #1359 - Occurrence misspelling
• 8041 2015May core #1366 - Add "and extended with metadata in the HL7 Value Set Definition specification"
• 8042 2015May core #1367 - Do not understand the use case driving this, nor the need for the recursive containment. Remove.
• 8043 2015May core #1368 - Change Resource Contraindication to DetectedIssue
• 8045 2015May core #1369 - Effective date range for the communication
• 8045 2015May core #1370 - Medication Prescription Status Values
• 8046 2015May core #1371 - Add URI for NDC (National Drug Code)
• 8047 2015May core #1372 - Add URI for NPI (National Provider ID)
• 8049 2015May core #1374 - Support XHTML narrative in extensions
• 8051 2015May core #1376 - Link broken
• 8053 2015May core #1378 - Link broken
• 8054 2015May core #1434 - Why is the patient reference called patient in some resources and subject in others? Should be consistent where possible.
• 8055 2015May core #1435 - Typo
• 8056 2015May core #1436 - Typo
• 8057 2015May core #1437 - Make Composition.class and DocumentReference.class extensions
• 8058 2015May core #1438 - Make clear that Procedure.device includes implanted devices
• 8060 2015May core #1440 - Re-word for clarity
• 8061 2015May core #1441 - MedicationFormalRepresentation - Link to valueset for medication codes points to value set contents for route of administration.
• 8062 2015May core #1442 - MedicationForm - Link to valueset for medication codes points to value set contents for route of administration.
• 8063 2015May core #1443 - MedicationContainer - Link to valueset for medication codes points to value set contents for route of administration.
• 8064 2015May core #1444 - Medication.code - Reference points to value set contents for route of administration.
• 8065 2015May core #1445 - Medication.product.form- Reference points to value set contents for route of administration.
• 8066 2015May core #1446 - Medication.package.container - Reference points to value set contents for route of administration.
• 8067 2015May core #1447 - medicine -> medication
• 8074 2015May core #1454 - Concerns for FamilyMemberHistory
• 8079 2015May core #1461 - More structured approach to conformance resource
• 8080 2015May core #1462 - FHIR section 6.16.3 does not describe all UML classes
• 8081 2015May core #1463 - The concept of profile needs further consolidation
• 8082 2015May core #1464 - What is difference between a profile and implementation guide
• 8086 Create best practice wording on how to deal with large scale OID URI strategy
• 8102 Fix description of Timing datatype components: frequency and frequencyMax
• 8105 DocumentReference.format needs to be type Coding
• 8107 Update the definition of "status" for the MedicationStatement7913
- When "To many codes to display (>1000)", show "some" of them
- Clarify description of OperationDefinition.idempotent
- Recommend adding 'On-Hold' to MedicationStatement.status
- Need additional documentation on List resource about List semantics
- "Example" appears on the description of the Condition-Category valueset even though the values are required if used
- Correct typos in Service Root URL
- Consider Location.status "present"
- Allow additional search results when an advanced search algorithm is available
- Definition of neutered only covers male animals
- AuditEvent constraints are too tight
- Clinical Resource categories
- 2015May daf #5 - Missing Concept Display Name
- 2015May daf #26 - Expand value set
- 2015May daf #27 - Profile title suggestion
- 2015May daf #28 - Profile title suggestion
- 2015May daf #36 - Profile title suggestion
- 2015May daf #45 - Profile title suggestion
- 2015May daf #48 - Duplicate Section Titles
- 2015May daf #96 - Modify Content Search Parameters
- 2015May daf #106 - MedicationPrescription.dispense.numberOfRepeatsAllowed
- 2015May daf #106 - Provide wording to distinguish severity & criticality
- 2015May daf #167 - Notes should be 0..* rather than 0..1
- 2015May daf #181
- 2015May daf #192 - Incorrect encoding of units in SCT
- 2015May daf #210
- 2015May daf #211 - Broken link: http://www.hl7.org/FHIR/2015May/QICoreMedicationCodes.html#1.23.2.1.2088
- 2015May daf #215
- 2015May daf #218
- 2015May daf #975b - Add authorization qualifier to 'read'
- Procedure missing value sets
- "Complete Conformance Statement" is incomplete
- Transaction processing sequence should reflect bundle entry sequence
- Allow batch delete for conditional DELETE operation if multiple match
- 2015May core #975b - Add authorization qualifier to 'read'
- Order should have a search parameter "identifier"
- What to do when I encounter unknown elements in a FHIR payload?
- Small typo in ConceptMap detailed description
- Profile HTML pages should have default values from base resources grayed out if missing in differential
- transaction-operation coding system doesn't correspond to transaction-operation value set
- Typo on REST/API page
- xsd:decimal precludes implied precision
- Typo on REST/API page, conformance operation
- change administrationinstructions to administrationinstruction (remove s)
- fix dangling references to web categories in security labels page
- also change .scheduled to schedule for consistency (remove d)
- schedule[x] (dateTime|Period|Timing) can be just schedule (Timing)
- Add mode of encounter
- Add reference to Condition
- Change DO .item.code and DR .name valueset binding to Example
- Identifier Type needs to use internally defined codes
- Correct Language about outcome of translation operation
- ConceptMap structure doesn't make sense
- Dead link to Profile Tags
- BindingStrength of FamilyMemberHistory.condition.outcome is UNKNOWN
- May2015 QICore #34 - Unreadable documentation page
- MAY2015-QICore#61- Broken "link-to-here"
- MAY2015-QICore #62-63 - Show value set and strength instead of binding name
- MAY2015 QICore#70 - Change CommunicationRequest.orderedOn to requestedOn
- MAY2015-QICore#84 - Null values for modifying attributes?
- Questionnaire_group question missing validation
- The MedicationPrescription resource does not specifically state that it includes the ability to order total parenteral nutrition.
- URI for Medical Device Codes defined in ISO 11073-10101 is wrong
- 2015May QICore#85 Goal.patient cardinality
- Make clear separation of recommendation and plan in CarePlan
- Add unavailable as list empty reason
- Device Scope nad Usage needs editing
- ValueSet.url should be ValueSet.uri
- How to represent a range of infusion rates?
- Display for filter-operator "=" code is " "
- Add ImagingStudy element to ImagingObjectSelection
- Add searchRevInclude to Conformance
- What are "the standard search parameters"
- Return behaviour of named queries: Bundle or Parameters
- terminology system URL syntax
- MedicationAdministration.dosage.rate clarification
- fix typo in updates page
- 2015May daf #104 - Update Data Types Timing.code value set
- 2015May daf #94 - Add preferred binding to condition.severity
- Signature.who can have every dataType in fhir-single.xsd
• Invariants not showing up on Element
• CliniciansonFHIR: Care Plan status value set
• CliniciansonFHIR: Care Plan reference Care Plan
• CliniciansonFHIR: Care Plan roles
• CliniciansonFHIR: Goal - link to goal observation
• CliniciansonFHIR: Goal Status Value
• CliniciansonFHIR: Goal with computable < and >
• Procedure Resource need to reference referral
• 2015May daf #50 - FHIR Version Number
• 2015May daf #54 - Title: Extension: Data Absent Reason
• ValueSet.compose.include should have codes or filters, but not both
• ValueSet observation-values has no codes as defined
• Value set specimen-collection-priority references nonsensical code system www.example.com
• CarePlan Definition - how zero or more providers in a team with the person/patient intend to guide care.
• Add a value for Clinical Research Sponsor to Organization type Value Set
• Rename ProcedureRequest.timing[x] to scheduled[x]
• Typos on Inter-Version Compatibilty page
• Profile vs StructureDefinition on Conformance rules
• Profiling examples are still DSTU1
• Profile still used as example
• Typo in Life Cycle page
• Typo in narrative page
• Typo overview clinical page
• Typo in overview page
• Typo on profiling page
• New explanation for discriminator
• Profile to StructureDefinition
• Profile still used as example
• Typo in references page
• Typo on references page
• Value set manifestation-c-cda-codes has no codes as defined
• Description of Condition/Problem/Diagnosis Codes off Condition.category has redundant "condition"
• Allow a server to specify that eTags are required for updates
• conformance versioning detail not consistent
• include the option for a client to specify whether the updated resource is to be included in a transaction response
• 2015May QICore #56 - Copyright Statement not appearing in generated valueset HTML page
• Non-resource-specific pages should include responsible WG
• valueOrdinal should be decimal, not integer
• Add a note about ordinals and reference to extension on Questionnaire
• Extension display doesn't show cardinality for extension
• ATNA REST action codes do not cover DSTU2 operations
• Clarify Condition, code and evidence
• No place for a displayname in SearchParameter
• Relative URLs in reference search parameter
• "it's" vs "its"
• We're ambiguous about allowing relative urls for reference-type search parameters
• content-type=application/x-www-form-urlencoded
• Support multiple discharge diagnoses
• Encounter participant type value set - add addtl V3 ParticipationType codes
• Observation indirect target is confusing
• Extend OrganizationType to include other commercial types
• Incorrect code in patient-example.xm
• LOINC copyright query should not allow “All” as a value
- 8388 doc-types codes filter value for LOINC should match case with LOINC db
- 8389 Create codes in special value code system for "L" (below detection limit) and "U" (above detection limit)
- 8393 Operations defined on profiles do not work
- 8394 Conformance, security search param path is wrong
- 8395 Error First child element must be of type... when defining a nested complex type extension
- 8396 json-edge-cases.js:json is invalid
- 8397 MedAdmin clarifications needed
- 8399 observation-methods includes an invalid filter for LOINC
- 8401 Add ConceptMap search parameter for sourceUri
- 8403 Need 21090 ordinal extension on Coding
- 8407 Add AllergyIntolerance.onset
- 8408 Add identifier field to search parameters for Procedure resource
- 8416 Remove batch operations now that we have a batch interaction
- 8417 Concept Designation Use binding - clarify SCT licensing issues
- 8418 Add Period to Group Characteristic
- 8419 adjust binding strength of DocumentReference value sets
- 8421 Conflicting advise in ValueSet expansion and define/compose
- 8423 Care Plan Status missing draft and cancelled(or similar)
- 8426 What is the effect of operations on _history?
- 8427 Custodian of a Resource should be accessible through Provenance
- 8429 $everything operation support _include directive?
- 8430 Clarify how non-transaction/batch Bundle posts work when sent to the base URL
- 8431 add Signature to the datatype graphic on the top of the datatype page
- 8432 Add Encounter to MedicationStatement
- 8433 Add "logical" to StructureDefinition.kind
- 8434 Document content expectations too tight
- 8437 Remove Social Security Number from the Identifier type value set and improve definition
- 8438 Add identifier systems to the system list
- 8439 Add a value set for yes/no/don't know (common questionnaire combination)
- 8440 Change references from Supply to SupplyRequest
- 8441 Provide support for a CodeableConcept for answer to question
- 8444 Test Script should note relationship to other resources
- 8446 typo in narrative for mode - create
- 8449 OperationOutcome.issue.code is either extendable CodeableConcept or not Code - Prefer extendable
- 8450 OperationOutcome.issue.location is unfriendly to JSON based applications only using HTTP Get parameters
- 8452 Add StructureDefinition.invariants
- 8454 Support for multiple authors and sections they've completed
- 8455 Provide support for other roles involved in questionnaire/assessment completion
- 8456 Inconsistent extension element links
- 8457 Add section on IP considerations
- 8466 Allow Communication resource to have Group as a recipient
- 8469 StructureDefinition notes refer to "type" instead of "contextType"
- 8470 Rendering of extensions includes a 'Summary' with no content
- 8471 StructureDefinition.context needs a clearer definition
- 8473 When StructureDefinition.contextType is 'extension', rules are unclear
- 8474 Condition laterality
- 8479 Remove Observation.value[x] binding
- 8480 Rename QuestionnaireAnswers to QuestionnaireResponse
- 8481 Don't force use of ValueSet for questionnaire question choices
- 8482 Criticality terminology for AllergyIntolerance resource
- 8483 Update element description for ElementDefinition.type.profiles
- 8485 published xml extensions missing "-->"'
- 8486 DataElement should have stringency as a search criteria
- 8487 Need a system url for mime type
- 8488 The presentation of Goal is not clear
- 8490 Timing documentation is out of date
- 8492 Searching for codes by valueset should use ValueSet.url
- 8494 Qi-Core and CQF are two non-names for QiCore
- 8495 HealthcareService missing Identifier search property
- 8497 valueset-c80-doc-classcodes should include four missing C-CDA document-level codes
- 8498 DocumentReference.format belongs inside content
- 8499 DocumentReference: "Document Formats" section is out of date
- 8500 Profile schematron rules do not trigger
- 8501 Document the "system" for Patient.communication.language
- 8502 MedicationAdministration rate changes
- 8504 change DR.requestdetail to DR.request to harmonize with PC resources
- 8505 add choice of ProcedureRequst and ReferralRequest to DR.requestDetail
- 8508 Invariant rules in profiles not populated in schematron files
- 8509 Conformance should have a "kind"
- 8510 Rename NamingSystem.type to NamingSystem.kind
- 8511 NamingSystem.country .category should become useContext
- 8512 NamingSystem.category should have same binding as Identifier.type
- 8514 change name of element serviceCategory to category
- 8520 Duplicate profile ids overwrite
- 8521 Questionnaire Extension defaultasfixed - clarification
- 8522 The Questionnaire parameter on the $populate operation should permit by reference
- 8535 Search documentation missing anchor for " _security"
- 8539 StructureDefinition invariants needed
- How interpret StructureDefinition differential?
- Extension example - value[x]
- Request multi-level extension example
- Duplicate search parameter "familymemberhistory-daf-FamilyMemberHistory-condition"
- Complex extensions not showing proper icon
- Reject modifiers inside complex extensions
- create and extension for O.refrange to allow for ...or equal to
- Remove Medication.name from Medication Resource
- Need enableWhen to work for non-answered questions too
- Clean up profile list
- Profile examples not published in IG section.
- Bad link generated in published pages to raw XML of IG-defined valuesets
- Need example valueset on ProcedureRequest.asNeeded[x] and indication elements
- Define MPI search for patient resource
- Erroneous warnings on path being generated by build
- Elements repeating in differential view
- QA: All properties are included in the Summary
- Questionnaire Summary items missing "name" of the Questionnaire
- ElementDefinition.type.code values not in data-type valueset
- add two codes to provenance-participant-role for assembler and composer
- profile element comments not displaying in element details
- clarification for identifier.system
- typo for comparators in inclusive extension -fix = instead of <= and =>
- AllergyIntolerance.status value set
- Datatype Boolean - explanation required
- Don't require use of data elements for SDC
- change EPUB link to readable version of FHIR Book
- Clarify description of slicing, not limited to element lists
- validation.zip's dataelements.xml contains duplicate fullUrl and canonical urls
- validation.zip conceptmap.xml contains incorrect canonical url
- Clarify that Subscription.criteria should not have a leading "/
- Fix missing Provenance HL7 Extension
- build not expanding Provenance valueset v3 Value Set ProvenanceEventCurrentState
- some slice members lack f:name
- The schema for Parameter resource is missing.
- Extensions missing in differential view
- Description of string search w/ :exact is slightly ambiguous
- Search Parameter Crossmap w/ Data Types Missing All Number Types
- Search Needs Clarification Regarding Quantities With Comparators
- Quantity Search Needs Clarification Regarding Value Semantics
