Public FHIR Validation Services

Also see the Validation section of Profile Tooling.

- **validator.fhir.org** provides a web-based interface to the Validator CLI jar.
- The **Simplifier validator** ([https://simplifier.net/validate](https://simplifier.net/validate)) provides a graphical UI for validation against any published FHIR specification
- Only a free account is necessary for using the validator
- The AEGIS WildFHIR Public Servers implement the `$validate` operation endpoint. Each WildFHIR version supports the corresponding FHIR base specification as well as the following additional FHIR Implementation Guides:
  - **WildFHIR v4.0.1 Base URL** - [http://wildfhir4.aegis.net/fhir4-0-1](http://wildfhir4.aegis.net/fhir4-0-1)
    - FHIR R4 (v4.0.0) Base Specification
    - VhDir Implementation Guide CI Build
  - **WildFHIR v3.0.2 Base URL** - [http://wildfhir3.aegis.net/fhir3-0-2](http://wildfhir3.aegis.net/fhir3-0-2)
    - FHIR Release 3 (STU) with 2 technical errata (v3.0.2) Base Specification
    - September 2018 Build of the Australian Base Profiles Implementation Guide
    - C-CDA on FHIR Implementation Guide STU 1 (v1.0.0)
    - Da Vinci CoverageRequirementsDiscovery 0.1.0 - STU1 Ballot 1 (for FHIR 3.0.1)
    - Da Vinci Data Exchange For Quality Measures Implementation Guide CI Build, based on FHIR Version 3.0.1
    - HEDIS® Implementation Guide
    - Mobile access to Health Documents (MHD) With XDS on FHIR, HL7® FHIR® STU 3,Rev. 2.4 – Trial Implementation
    - Nictiz STU3 Zib 2017, Includes MedMij and HL7 NL
    - Qi-Core Implementation Guide: STU (v3.2.0 for FHIR 3.0.1)
  - **WildFHIR v0.9 Base URL** - [http://wildfhir2.aegis.net/fhir1-0-2](http://wildfhir2.aegis.net/fhir1-0-2)
    - FHIR DSTU 2 (Official version) with 1 technical errata (v1.0.2) Base Specification
- **Inferno Validator** is web app for FHIR resource validation against base FHIR spec, profiles, and implementation guide
